Accurate Scrum PSM-I Prep Material - Valid PSM-I Exam Vce

Now in such a Internet so developed society, choosing online training is a very common phenomenon. CertkingdomPDF is one of many online training websites. CertkingdomPDF's online training course has many years of experience, which can provide high quality learning material for examinee participating in Scrum Certification PSM-I Exam and satisfy all the needs of the students.

Scrum PSM-I (Professional Scrum Master I) Exam is an internationally recognized certification for professionals who want to demonstrate their knowledge and expertise in Scrum methodology. PSM-I exam is designed to test the candidate's understanding of the Scrum framework, its principles, and its application in real-world scenarios. Professional Scrum Master I certification is awarded by Scrum.org, which is one of the leading organizations in the field of Scrum.

Scrum PSM-I Exam consists of 80 multiple-choice questions that must be completed within 60 minutes. PSM-I exam is conducted online and can be taken from anywhere in the world. The passing score for the exam is 85%, which means that the candidate must answer at least 68 questions correctly. PSM-I exam fee varies depending on the country of residence and ranges from \$150 to

\$200.

Scrum Professional Scrum Master I Sample Questions (Q250-Q255):

NEW QUESTION # 250

Which are characteristics of the Daily Scrum?
(choose the best two answers)

- A. Its location and time remain constant
- B. Its purpose is to inspect progress toward the Sprint Goal and adapt the Sprint Backlog.
- C. It consists of the Scrum Master asking the team for status.
- D. It is free form and designed to promote conversation
- E. It is held first thing in the morning.
- F. It is facilitated by the team lead.

Answer: A,B

Explanation:

According to the Scrum Guide, two characteristics of the Daily Scrum are its location and time remain constant and its purpose is to inspect progress toward the Sprint Goal and adapt the Sprint Backlog. These characteristics promote consistency, transparency, and adaptation within the Development Team. The other options are not valid characteristics of the Daily Scrum, as they are either irrelevant (such as being held first thing in the morning) or inappropriate (such as being free form, facilitated by the team lead, or consisting of the Scrum Master asking for status).

NEW QUESTION # 251

Which of the following is an example of an Increment? (Choose the best answer.)

- A. A valuable, useful set of products featured.
- B. A plan for the overall product release.
- C. All of the above.
- D. A design for the product.
- E. A product roll-out plan.
- F. A mock-up of the product marketing materials.

Answer: A

Explanation:

An example of an Increment is a valuable, useful set of product features, as stated in [4]: "An Increment is a concrete stepping stone toward the Product Goal. Each Increment is additive to all prior Increments and thoroughly verified, ensuring that all Increments work together. In order to provide value, each Increment must be usable."

NEW QUESTION # 252

During a Sprint Retrospective, the Development Team proposes moving the Daily Scrum to only occur on Tuesdays and Thursdays. Which two are the most appropriate responses for the Scrum Master? (Choose two.)

- A. Acknowledge and support the self-organizing team's decision.
- B. Coach the team on why the Daily Scrum is important as an opportunity to update the plan.
- C. Learn why the Development Team wants this and work with them to improve the outcome of the Daily Scrum.
- D. Consider the request and decide on which days the Daily Scrum should occur.
- E. Have the developers vote.

Answer: B,C

NEW QUESTION # 253

When do Development Team members take ownership of a Sprint Backlog item?

- A. Whenever a team member can accommodate more work.

- B. During the Daily Scrum
- C. At the Sprint planning meeting
- D. Never. All Sprint Backlog Items are "owned" by the entire Development Team, even though each one may be done by an individual Development Team member.

Answer: D

NEW QUESTION # 254

user documentation is part of your Definition of Done. However, there are not enough technical writers for all teams. Your Scrum Team does not have a technical writer. What should the Scrum Team do?

(choose the best answer)

- A. The Developers on the Scrum Team should write the user documentation
- B. Let the user documentation remain undone and accumulate until after the last development Sprint. It will then be done by any available technical writers.
- C. Wait until you have a technical writer on your Scrum Team to take care of this.
- D. Form a separate team of technical writers that will work on an on-demand basis for the various Product Owners. Work order will be first in, first out.

Answer: A

Explanation:

According to the Scrum Guide, the Developers on the Scrum Team should write the user documentation, as they are responsible for creating a "Done" Increment that meets the Definition of Done and the Sprint Goal. The other options are not valid, as they imply that the user documentation can be deferred, ignored, or outsourced, which is not consistent with Scrum values and principles.

NEW QUESTION # 255

.....
