We sincerely hope we can help you solve your problem and help you pass the Integration-Architect exam.

Salesforce Certified Integration Architect Sample Questions (Q107-Q112):

NEW QUESTION # 107

A developer has been tasked by the integration architect to build a solution based on the Streaming API. The developer has done some research and has found there are different implementations of the events in Salesforce (PushTopic Events, Change Data Capture, Generic Streaming, Platform Events), but is unsure of how to proceed with the implementation and asks the system architect for some guidance.

What should the architect consider when making the recommendation?

- A. PushTopic Events can define a custom payload.
- **B. Change Data Capture does not have record access support.**
- C. Change Data Capture can be published from Apex.

Answer: B

NEW QUESTION # 108

Universal Containers (UC) is a leading provider of management training globally, UC embarked on a Salesforce transformation journey to allow students to register for courses in the Salesforce community. UC has a learning system that masters all courses and student registration.

UC requested a near real-time feed of student registration from Salesforce to the learning system. The integration architect recommends using Salesforce event.

Which API should be used for the Salesforce platform event solution?

- A. SOAP API
- B. O REST AP
- **C. Tooling API**
- D. Streaming API

Answer: C

Explanation:

Explanation

The API that should be used for the Salesforce platform event solution is Tooling API.

Tooling API is a specialized API that exposes metadata used in developer tooling that you can access through REST or SOAP.

You can use Tooling API to create, update, or delete platform event definitions and fields⁴ Streaming API is used to subscribe to platform events and receive notifications when they are published⁵

NEW QUESTION # 109

Northern Trail Outfitters (NTO) uses a custom mobile app to interact with their customers.

One of the features of the app are Salesforce Chatter Feeds. NTO wants to automatically post a Chatter item to Twitter whenever the post includes the #thanksNTO hashtag.

Which API should an Integration Architect use to meet this requirement?

- A. REST API
- **B. Connect REST API**
- C. Apex REST
- D. Streaming API

Answer: B

NEW QUESTION # 110

Northern Trail Outfitters (NTO) has an integration set up between a Salesforce org and a quoting system.

NTO would like to show a notification to all sales representatives that use Salesforce anytime the quoting system will be taken down for maintenance.

Which Salesforce API should an Integration Architect use to fulfill this requirement?

- A. Connect REST API
- B. REST API
- C. Tooling API
- **D. Streaming API**

Answer: D

Explanation:

Streaming API is the best option for sending real-time notifications of changes to Salesforce data. Streaming API uses a publish-subscribe model to push relevant data to subscribers without polling. Streaming API supports PushTopic events, which are based on SOQL queries that define the data changes to listen for. The affiliate company can subscribe to a PushTopic event on the NTO Salesforce org and receive notifications whenever the data that matches the query changes. This way, the affiliate company can be informed of any updates to the opportunities in the NTO Salesforce instance.

NEW QUESTION # 111

Only authorized users are allowed access to the EBS and the Enterprise DMS.

Customers call Customer Support when they need clarification on their bills. Customer Support needs seamless access to customer billing information from the E and view generated bills from the DMS.

Which three authorization and authentication needs should an integration consultant consider while integrating the DMS and ESB with Salesforce?

should an integration consultant consider while integrating the DMS and ESB with Salesforce?

Choose 3 answers

- **A. Users should be authenticated into DMS and EBS without having to enter username and password.**
- B. Users should be authorized to view information specific to the customer they are servicing without a need to search for customer.
- C. Consider Enterprise security needs for access to DMS and EBS.
- **D. Identify options to maintain DMS and EBS authentication and authorization details in Salesforce.**
- **E. Consider options to migrate DMS and EBS into Salesforce.**

Answer: A,D,E

NEW QUESTION # 112

.....
