## Salesforce Certified Integration Architecture Designer Sample Questions (Q94-Q99):

### NEW QUESTION # 94

Which protocol should an Integration Architect utilize to create a secure channel between Salesforce and other system?

- A. SFTP
- B. SMTP
- C. SSH

- **D. TLS**

**Answer: D**

#### NEW QUESTION # 95

A global financial company sells financial products and services that include the following:

1. Bank Accounts
2. Loans
3. Insurance

The company has a core banking system that is state of the art and is the master system to store financial transactions, financial products and customer information. The core banking system currently processes 10M financial transactions per day. The CTO for the company is considering building a community port so that customers can review their bank account details, update their information and review their account financial transactions.

What should an integration architect recommend as a solution to enable customer community users to view their financial transactions?

- A. Use Salesforce Connect to display the financial transactions as an external object.
- B. Use Iframe to display core banking financial transactions data in the customer community.
- C. Use Salesforce Connect to display the financial transactions as an external object.
- **D. Use Salesforce External Service to display financial transactions in a community lightning page.**

**Answer: D**

#### NEW QUESTION # 96

Universal Containers has an integration that runs nightly to update the Product (Product2) object in Salesforce with updated product availability for over 500,000 products. The source system is green screen ERP that must be taken offline to produce nightly production reports such as the inventory availability report used for this integration. The Salesforce integration frequently reports failures due to data validation errors.

Which two steps should the Technical Architect should recommend?

Choose 2 answers

- A. Use SOAP headers to turn off validation rules and triggers during the integration.
- **B. Implements a regression testing policy to detect issues following development.**
- C. Ask the ERP report designers to redesign the report to provide properly formatted data.
- **D. Review the Salesforce data model and Validation rules and modify the integration as necessary.**

**Answer: B,D**

#### NEW QUESTION # 97

Universal containers is building an integration between their instance of Salesforce and their business partner's fulfillment systems, the security officer would like to ensure that only the authorized data for each business partner is accessible across all interfaces.

How should the architect ensure this requirement is met?

- A. Provide each business partner their own username/password with a shared integration profile provisioned to the appropriate data.
- B. Provide each business partner their own username/password with an Apex custom web service to filter the data appropriately.
- **C. Provide each business partner their own username/password with a specific role/profile provisioned to the appropriate data.**
- D. provide each business partner a shared integration username/password with a specific role/profile provisioned to the appropriate data.

**Answer: C**

#### NEW QUESTION # 98
