## ISACA Certified Data Privacy Solutions Engineer Sample Questions (Q83-Q88):

### NEW QUESTION # 83

An email opt-in form on a website applies to which privacy principle?

- A. Integrity
- B. Transparency
- C. Consent
- D. Accuracy

**Answer: C**

### NEW QUESTION # 84

The purpose of consent tagging is to:

- A. Log and track consent from a user visiting a website
- B. Track and manage individuals' consent preferences
- C. Request consent from a user visiting a website
- D. Ensure users have given consent to use cookies

**Answer: B**

Explanation:

Consent tagging is a metadata-driven process that associates consent preferences with an individual's data, enabling organizations to manage consent dynamically across systems. It is not limited to cookies (A), one-time logging (C), or initial requests (D).

"Consent tagging links an individual's data with their recorded consent choices for compliant processing."

### NEW QUESTION # 85

Which of the following is the BEST way to ensure third-party providers that process an organization's personal data are addressed as part of the data privacy strategy?

- A. Require data dictionaries from service providers that handle the organization's personal data.
- B. Outsource personal data processing to the same third party
- C. Require independent audits of the providers' data privacy controls
- D. Require service level agreements (SLAs) to ensure data integrity while safeguarding confidentiality

**Answer: C**

Explanation:

Explanation

Requiring independent audits of the providers' data privacy controls is the best way to ensure third-party providers that process an organization's personal data are addressed as part of the data privacy strategy.

Independent audits can verify that the providers are complying with the applicable data privacy laws and regulations, as well as the organization's own policies and standards. Independent audits can also identify any gaps or weaknesses in the providers' data privacy controls and recommend corrective actions or improvements.

### NEW QUESTION # 86

Which key stakeholder within an organization should be responsible for approving the outcomes of a privacy impact assessment (PIA)?

- A. Data custodian
- B. Data processor
- C. Privacy data analyst
- **D. Data owner**

**Answer: D**

Explanation:

Reference:

The data owner is the key stakeholder within an organization who should be responsible for approving the outcomes of a privacy impact assessment (PIA). A PIA is a systematic process of identifying and evaluating the potential privacy risks and impacts of a data processing activity or system. The data owner is the person who has the authority and accountability for the data processing activity or system, and who determines the purpose and means of the data processing. The data owner should approve the outcomes of a PIA, such as the risk assessment, the risk mitigation plan, and the residual risk level, to ensure that they are consistent with the business objectives and legal obligations of the data processing activity or system.
