Ace Your Career with Microsoft PL-300 Certification

As a famous brand in this field, we have engaged for over ten years to offer you actual PL-300 exam questions as your exams preparation. Our company highly recommends you to try the free demo of our PL-300 study material and test its quality feature before purchase. You can find the three demos easily on our website. And you may find out that they are accordingly corresponding to our three versions of the PL-300 learning braindumps. Once you click on them, then you can experience them at once.

Benefits

The Microsoft Power BI Data Analyst certification is a globally recognized certification that validates your ability to design, build, and optimize data models using Power BI. It also demonstrates your expertise in building queries and reports with appropriate visuals, including dashboards, scorecards, and visualizations. This certification focuses on the intermediate-level skills required for data modeling and analysis.

The Microsoft Power BI Data Analyst certification provides many benefits to you. It helps you boost your career growth by validating your knowledge in building business intelligence solutions using Power BI platform. It validates your skills in designing reports and visualizations for various business needs. It increases your credibility among employers as most companies look for professionals who have this certification. It provides an opportunity to earn a higher salary package compared to those without this certification. VCE4Plus Microsoft **PL-300 Dumps** will help you to pass your certification exam and get highly paid job.

Microsoft Power BI Data Analyst Sample Questions (Q92-Q97):

NEW QUESTION # 92

How should you distribute the reports to the board? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 93

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this scenario, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a clustered bar chart that contains a measure named Salary as the value and a field named Employee as the axis. Salary is present in the data as numerical amount representing US dollars.

You need to create a reference line to show which employees are above the median salary.

Solution: You create a percentile line by using the Salary measure and set the percentile to 50%.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

The 50th percentile is also known as the median or middle value where 50 percent of observations fall below.

NEW QUESTION # 94

You have a Power BI app named App1. The privacy for the App1 workspace is set to Private.

A user named User1 reports that App1 does not appear in the My organization AppSource. App1 appears in the My organization AppSource for your account. You need to ensure that User sees App1 from the My organization AppSource.

What should you do?

- A. From the app workspace settings, add a member.
- B. From the app workspace, click Update app, configure the Access setting, and then click Update app.
- C. From the app workspace, click Update app, configure the Content settings, and then click Update app.
- D. From the app workspace, share the dashboard.

Answer: B

Explanation:

NEW QUESTION # 95

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is the same in each question in this series.

You have a Microsoft SQL Server database that contains the following tables.

Table name	Column name	Data type
Order	Order_ID	Integer
	Order_date	Integer
	Order_amount	Currency
	Customer_ID	Integer
	Order_ship_date	Integer
	Store_ID	Integer
Customer	Customer_ID	Integer
	First_name	Varchar(100)
	Last_name	Varchar(100)
	Customer_photo	Binary
Date	Date_ID	Integer
	Date_name	Datetime
	Month	Integer
	Week	Integer
	Year	Integer
Monthly_returns	Month_ID	Integer
	Total_returns	Float
	Store_ID	Varchar(100)
Store	Store_ID	Integer
	Name	Varchar(100)
	City	Varchar(100)
	Sales_target	Float

The following columns contain date information:

- Date[Month] in the mmyyyy format
- Date[Date_ID] in the ddmmyyyy format
- Date[Date_name] in the mm/dd/yyyy format
- Monthly_returns[Month_ID] in the mmyyyy format

The Order table contains more than one million rows.

The Store table has a relationship to the Monthly_returns table on the Store_ID column. This is the only relationship between the tables.

You plan to use Power BI Desktop to create an analytics solution for the data.

You need to create a relationship between the Monthly_returns table and Date[Date_ID].

What should you do before you create the relationship?

- A. In the Monthly_returns table, create a new calculated column named DateJD that uses the ddmmyyyy format.
- B. To the Order table, add a calculated column that uses the RELATED(Monthly_returns[Month_ID]) DAX formula.
- C. In the Date table, create a new calculated column named MonthJD that uses the yyyydd format.
- D. To the Date table, add a calculated column that uses the RELATED(Monthly_returns[Month_ID]) DAX formula.

Answer: A

Explanation:

NEW QUESTION # 96

You have two CSV files named Products and Categories.

The Products file contains the following columns:

- * ProductID
- * ProductName
- * SupplierID

* CategoryID

The Categories file contains the following columns:

* CategoryID

* CategoryName

* CategoryDescription

From Power BI Desktop, you import the files into Power Query Editor.

You need to create a Power BI dataset that will contain a single table named Product. The Product table includes the following columns:

* ProductID

* ProductName

* SupplierID

* CategoryID

* CategoryName

* CategoryDescription

How should you combine the queries, and what should you do on the Categories query? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Combine the queries by performing a:

Append
Merge
Transpose

On the Categories query:

Delete the query.
Disable the query load.
Exclude the query from report refresh.

Answer:

Explanation:

Answer Area

Combine the queries by performing a:

Append
Merge
Transpose

On the Categories query:

Delete the query.
Disable the query load.
Exclude the query from report refresh.

Explanation:

Answer as selected

Answer Area

Combine the queries by performing a: Merge

On the Categories query: Disable the query load.

Microsoft

NEW QUESTION # 97
