PECB NIS-2-Directive-Lead-Implementer Exam Syllabus Topics:

Topic	Details
Topic 1	Fundamental concepts and definitions of NIS 2 Directive: This section of the exam measures the skills of Cybersecurity Professionals and IT Managers and covers the basic concepts and definitions related to the NIS 2 Directive. Candidates gain understanding of the directive's scope, objectives, key terms, and foundational requirements essential to lead implementation efforts effectively within organizations.
Topic 2	Testing and monitoring of a cybersecurity program: This domain assesses the abilities of Security Auditors and Compliance Officers in testing and monitoring the effectiveness of cybersecurity programs. Candidates learn to design and conduct audits, continuous monitoring, performance measurement, and apply continual improvement practices to maintain NIS 2 Directive compliance.
Topic 3	Planning of NIS 2 Directive requirements implementation: This domain targets Project Managers and Implementation Specialists focusing on how to initiate and plan the rollout of NIS 2 Directive requirements. It includes using best practices and methodologies to align organizational processes and cybersecurity programs with the directive's mandates.

Topic 4	• Cybersecurity roles and responsibilities and risk management: This section measures the expertise of Security Leaders and Risk Managers in defining and managing cybersecurity roles and responsibilities. It also covers comprehensive risk management processes, including identifying, assessing, and mitigating cybersecurity risks in line with NIS 2 requirements.

PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q34-Q39):

NEW QUESTION # 34

According to Article 7 of the NIS 2 Directive, what is one of the aspects that the national cybersecurity strategy adopted by Member States must include?

- A. A list of authorities and stakeholders
- B. Plans for infrastructure development
- C. Policies on foreign trade agreements

Answer: A

NEW QUESTION # 35

Scenario 1:

into incidents that could result in substantial material or non-material damage. When it comes to identifying and mitigating risks, the company has employed a standardized methodology. It conducts thorough risk identification processes across all operational levels, deploys mechanisms for early risk detection, and adopts a uniform framework to ensure a consistent and effective incident response. In alignment with its incident reporting plan, SecureTech reports on the initial stages of potential incidents, as well as after the successful mitigation or resolution of the incidents.

Moreover, SecureTech has recognized the dynamic nature of cybersecurity, understanding the rapid technological evolution. In response to the ever-evolving threats and to safeguard its operations, SecureTech took a proactive approach by implementing a comprehensive set of guidelines that encompass best practices, effectively safeguarding its systems, networks, and data against threats. The company invested heavily in cutting-edge threat detection and mitigation tools, which are continuously updated to tackle emerging vulnerabilities. Regular security audits and penetration tests are conducted by third-party experts to ensure robustness against potential breaches. The company also prioritizes the security of customers' sensitive information by employing encryption protocols, conducting regular security assessments, and integrating multi-factor authentication across its platforms.

SecureTech reports on the initial stages of potential incidents and after the successful mitigation or resolution of the incidents. Is this in compliance with the NIS 2 Directive requirements? Refer to scenario 1.

- A. No, the Directive requires that incidents are reported only after they have been resolved
- B. No, the Directive requires that incidents are reported only in their initial stages
- C. Yes, the Directive introduces a two-stage approach to incident reporting, requiring initial and final reports.

Answer: C

NEW QUESTION # 36

What is the maximum administrative fine that important entities may face for noncompliance with the NIS 2 Directive?

- A. Up to a maximum of least €7 million or at least 1.4% of the total annual worldwide turnover
- B. Up to a maximum of least €15 million or at least 4% of the total annual worldwide turnover
- C. Up to a maximum of least €10 million or at least 2% of the total annual worldwide turnover

Answer: A

NEW QUESTION # 37

Which type of vulnerability assessment scans is primarily focused on evaluating websites and mobile applications of known software vulnerabilities and incorrect configurations?

- A. Web-based scans
- B. Network-based scans
- C. Application scans

Answer: C

NEW QUESTION # 38

Scenario 3: Founded in 2001, SafePost is a prominent postal and courier company headquartered in Brussels, Belgium. Over the years, it has become a key player in the logistics and courier in the region. With more than 500 employees, the company prides itself on its efficient and reliable services, catering to individual and corporate clients. SafePost has recognized the importance of cybersecurity in an increasingly digital world and has taken significant steps to align its operations with regulatory directives, such as the NIS 2 Directive.

SafePost recognized the importance of thoroughly analyzing market forces and opportunities to inform its cybersecurity strategy. Hence, it selected an approach that enabled the analysis of market forces and opportunities in the four following areas: political, economic, social, and technological. The results of the analysis helped SafePost in anticipating emerging threats and aligning its security measures with the evolving landscape of the postal and courier industry.

To comply with the NIS 2 Directive requirements, SafePost has implemented comprehensive cybersecurity measures and procedures, which have been documented and communicated in training sessions. However, these procedures are used only on individual initiatives and have still not been implemented throughout the company. Furthermore, SafePost's risk management team has developed and approved several cybersecurity risk management measures to help the company minimize potential risks, protect customer data, and ensure business continuity.

Additionally, SafePost has developed a cybersecurity policy that contains guidelines and procedures for safeguarding digital assets, protecting sensitive data, and defining the roles and responsibilities of employees in maintaining security. This policy will help the company by providing a structured framework for identifying and mitigating cybersecurity risks, ensuring compliance with regulations, and fostering a culture of security awareness among employees, ultimately enhancing overall cybersecurity posture and reducing the likelihood of cyber incidents.

As SafePost continues to navigate the dynamic market forces and opportunities, it remains committed to upholding the highest standards of cybersecurity to safeguard the interests of its customers and maintain its position as a trusted leader in the postal and courier industry.

Based on scenario 3, what type of policy has SafePost established for protecting digital assets and maintaining security?

- A. High-level general policy
- B. Topic-specific policy
- C. High-level topic-specific policy

Answer: C
