# Useful ISA-IEC-62443 Exam Questions Pdf & Leading Provider in Qualification Exams & First-Grade ISA-IEC-62443 Latest Test Practice

Once you have practiced and experienced the quality of our ISA-IEC-62443 exam preparation, you will remember the serviceability and usefulness of them. It explains why our ISA-IEC-62443 practice materials helped over 98 percent of exam candidates get the certificate you dream of successfully. Believe me you can get it too and you will be benefited by our ISA-IEC-62443 Study Guide as well. Just have a try on our ISA-IEC-62443 learning prep, and you will fall in love with it.

## ISA/IEC 62443 Cybersecurity Fundamentals Specialist Sample Questions (Q186-Q191):

### NEW QUESTION # 186

Which characteristic is MOST closely associated with the deployment of a demilitarized zone (DMZ)?

Available Choices (select all choices that are correct)

- A. Internet access through the firewall is allowed.
- B. Level 0 can only interact with Level 1 through the firewall.
- C. Level 4 systems must use the DMZ to communicate with Level 3 and below.
- D. Email is prevented, thereby mitigating the risk of phishing attempts.

### Answer: A

Explanation:

In cybersecurity, a demilitarized zone (DMZ) refers to a physical or logical subnetwork that contains and exposes an organization's external-facing services to an untrusted network, typically the internet. The main characteristic of a DMZ is that it acts as a buffer zone between the public internet and the private network.

This allows for internet access through the firewall while keeping the internal network secure. Internet-facing servers are placed in the DMZ so that they are separated from the rest of the internal network. By doing so, if a server in the DMZ is compromised, the attacker would not have direct access to the internal network. This architecture is commonly used to host services such as web servers, mail servers, and FTP servers. Choice C is the most closely associated with the deployment of a DMZ as it allows for regulated and monitored internet access through a firewall.

### NEW QUESTION # 187

As related to IACS Maintenance Service Providers, when do maintenance activities generally start?

- A. During the design phase
- B. At the beginning of the project
- C. Before the handover of the solution
- D. After the handover of the solution

### Answer: D

Explanation:

Maintenance service activities typically begin after the system is deployed and handed over to the asset owner. This is aligned with the Operation and Maintenance phase of the IACS lifecycle.

"Maintenance service providers typically become responsible for cybersecurity-related activities after the asset owner takes ownership of the system, following handover."

- ISA/IEC 62443-2-4:2015, Clause 4.2.3 - Transition and Handover

Prior to handover, integrators and product suppliers manage the system. Maintenance providers take over only post-commissioning.

ISA/IEC 62443-1-1 - IACS lifecycle phases

### NEW QUESTION # 188

How many element groups are in the "Addressing Risk" CSMS category?

Available Choices (select all choices that are correct)

- A. 0

- B. 1
- C. 2
- D. 3

**Answer: B**

#### **NEW QUESTION # 189**

Which of the following can be employed as a barrier device in a segmented network?

Available Choices (select all choices that are correct)

- A. Unmanaged switch
- B. Domain controller
- C. Router
- D. VPN

**Answer: C**

#### **NEW QUESTION # 190**

Which of the following is NOT listed under Organizational Security Measures (SP Element 1)?

- A. Supply chain security
- B. Background checks
- C. Security awareness training
- D. Malware protection

**Answer: D**

Explanation:

SP Element 1 - Organizational Security Measures focuses on policies, roles, and governance at the organizational level. It includes:

Background checks

Security awareness training

Supply chain security governance

However, malware protection is not considered part of SP Element 1, as it falls under technical or system integrity controls, typically found in SP Element 4 (System Integrity).

"SP Element 1 includes activities such as assigning roles and responsibilities, background checks, training, and supply chain oversight - not technical malware defenses."

- ISA/IEC 62443-2-1:2010, Clause 4.3.4 - Table 2 (SP Elements Overview) References:

ISA/IEC 62443-2-1 - Clause 4.3.4

SP Element 4 - Where malware protection is categorized

#### **NEW QUESTION # 191**

.....

Pass the ISA/IEC 62443 Cybersecurity Fundamentals Specialist ISA-IEC-62443 certification exam which is a challenging task. To make ISA-IEC-62443 exam success journey simple, quick, and smart, you have to prepare well and show a firm commitment to passing this exam. The real, updated, and error-free ISA/IEC 62443 Cybersecurity Fundamentals Specialist ISA-IEC-62443 Exam Dumps are available over the TroytecDumps.
