## Certification Path

The Certified Information Security Manager CISM certification includes only one CISM exams.

## Isaca CISM Practice Test Questions, Isaca CISM Exam Practice Test Questions

Certified Information Security Manager (CISM) is a sought-after certification offered by ISACA. ISACA is a non-profit independent association that helps those professionals who are involved in risk management, information security, assurance, and governance. The exam that you need to pass for this certificate evaluates if you are experienced and has the knowledge for the management of the information security program.

The Certified Information Security Manager (CISM) certification exam is a globally recognized qualification for information security professionals. It is offered by the Information Systems Audit and Control Association (ISACA), a non-profit professional association focused on information technology governance, security, and audit. The CISM Certification is designed to validate the skills and knowledge required to manage, design, and oversee an organization's information security program.

## ISACA Certified Information Security Manager Sample Questions (Q565-Q570):

### NEW QUESTION # 565

Which of the following has the MOST direct impact on the usability of an organization's asset classification policy?

- A. The granularity of classifications in the hierarchy
- B. The frequency of updates to the organization's risk register
- C. The business objectives of the organization
- D. The support of IT management for the classification scheme

**Answer: A**

### NEW QUESTION # 566

Which of the following is the BEST indicator that security awareness training has been effective?

- A. Employees sign to acknowledge the security policy
- B. More incidents are being reported
- C. A majority of employees have completed training
- D. No incidents have been reported in three months

**Answer: B**

Explanation:

Explanation/Reference:

Explanation:

More incidents being reported could be an indicator that the staff is paying more attention to security.

Employee signatures and training completion may or may not have anything to do with awareness levels.

The number of individuals trained may not indicate they are more aware. No recent security incidents do not reflect awareness levels, but may prompt further research to confirm.

### NEW QUESTION # 567

When training an incident response team, the advantage of using tabletop exercises is that they:

- A. ensure that the team can respond to any incident
- B. provide the team with practical experience in responding to incidents.
- C. remove the need to involve senior managers in the response process.
- D. enable the team to develop effective response interactions.

**Answer: A**

### NEW QUESTION # 568

Which of the following elements of a service contract would BEST enable an organization to monitor the information security risk associated with a cloud service provider?

- A. Indemnification clause
- B. Breach detection and notification
- C. Physical access to service provider premises
- D. Compliance status reporting

**Answer: D**

Explanation:

Explanation

Compliance status reporting is the best element of a service contract that would enable an organization to monitor the information security risk associated with a cloud service provider, as it provides the organization with regular and timely information on the cloud service provider's compliance with the agreed-upon security requirements, standards, and regulations. Compliance status reporting

also helps the organization to identify any gaps or issues that need to be addressed or resolved, and to verify the effectiveness of the cloud service provider's controls. (From CISM Review Manual 15th Edition) References: CISM Review Manual 15th Edition, page 184, section 4.3.3.2.

### NEW QUESTION # 569

An information security manager uses security metrics to measure the:

- A. effectiveness of the incident response team.
- B. performance of the information security program.
- C. performance of the security baseline.
- D. effectiveness of the security risk analysis.

**Answer: B**

Explanation:

Explanation

The security metrics should be designed so that there is a relationship to the performance of the overall security program in terms of effectiveness measurement. Use of security metrics occurs after the risk assessment process and does not measure it. Measurement of the incident response team performance is included in the overall program performance, so this is an incomplete answer.

### NEW QUESTION # 570

• • • • •

Additionally, students can take multiple ISACA CISM exam questions, helping them to check and improve their performance. Three formats are prepared in such a way that by using them, candidates will feel confident and crack the Certified Information Security Manager (CISM) actual exam.
