A generally accepted view on society is only the professionals engaged in professional work, and so on, only professional in accordance with professional standards of study materials, as our CISSP-ISSEP study materials, to bring more professional quality service for the user. Our study materials can give the user confidence and strongly rely on feeling, lets the user in the reference appendix not alone on the road, because we are to accompany the examinee on CISSP-ISSEP Exam, candidates need to not only learning content of teaching, but also share his arduous difficult helper, so believe us, we are so professional company.

ISC2 ISSEP Exam Syllabus Topics:

Topic	Details
Systems Security Engineering Foundations - 25%	
Apply systems security engineering fundamentals	- Understand systems security engineering trust concepts and hierarchies - Identify the relationships between systems and security engineering processes - Apply structural security design principles
Execute systems security engineering processes	- Identify organizational security authority - Identify system security policy elements - Integrate design concepts (e.g., open, proprietary, modular)
Integrate with applicable system development methodology	- Integrate security tasks and activities - Verify security requirements throughout the process - Integrate software assurance method

Perform technical management	- Perform project planning processes - Perform project assessment and control processes - Perform decision management processes - Perform risk management processes - Perform configuration management processes - Perform information management processes - Perform measurement processes - Perform Quality Assurance (QA) processes - Identify opportunities for security process automation
Participate in the acquisition process	- Prepare security requirements for acquisitions - Participate in selection process - Participate in Supply Chain Risk Management (SCRM) - Participate in the development and review of contractual documentation
Design Trusted Systems and Networks (TSN)	
Risk Management - 14%	
Apply security risk management principles	- Align security risk management with Enterprise Risk Management (ERM) - Integrate risk management throughout the lifecycle
Address risk to system	- Establish risk context - Identify system security risks - Perform risk analysis - Perform risk evaluation - Recommend risk treatment options - Document risk findings and decisions
Manage risk to operations	- Determine stakeholder risk tolerance - Identify remediation needs and other system changes - Determine risk treatment options - Assess proposed risk treatment options - Recommend risk treatment options
Security Planning and Design - 30%	
Analyze organizational and operational environment	- Capture stakeholder requirements - Identify relevant constraints and assumptions - Assess and document threats - Determine system protection needs - Develop Security Test Plans (STP)
Apply system security principles	- Incorporate resiliency methods to address threats - Apply defense-in-depth concepts - Identify fail-safe defaults - Reduce Single Points of Failure (SPOF) - Incorporate least privilege concept - Understand economy of mechanism - Understand Separation of Duties (SoD) concept
Develop system requirements	- Develop system security context - Identify functions within the system and security Concept of Operations (CONOPS) - Document system security requirements baseline - Analyze system security requirements
Create system security architecture and design	- Develop functional analysis and allocation - Maintain traceability between specified design and system requirements - Develop system security design components - Perform trade-off studies - Assess protection effectiveness

Key Notes before Taking Official Validation

Before you take this exam, make sure to review the (ISC)² exam procedures and (ISC)² Candidate Information Bulletin for details on the testing process, which are available on their official website. Also, go over the exam outline to understand the domains that will be tested, so that you can sufficiently prepare for them. Finally, if you want to reschedule or cancel your exam, please contact Pearson VUE either online or by phone at least one day before the main exam. You will be charged a reschedule fee of USD 50 and a cancellation fee of USD 100.
