

ISO-45001-Lead-Auditor Online Tests - ISO-45001-Lead-Auditor PDF Testsoftware

In den letzten Jahren ist die Konkurrenz in der IT-Branche immer heftiger geworden. IT-Zertifizierung ist ganz notwendig in der IT-Branche. Wenn Sie im Beruf eine gute Beförderungsmöglichkeit bekommen wollen, können Sie die Schulungsunterlagen zur PECB ISO-45001-Lead-Auditor Zertifizierungsprüfung von PrüfungFrage wählen, um die ISO-45001-Lead-Auditor Zertifizierungsprüfung zu bestehen. Unsere Schulungsunterlagen enthalten alle Fragen, die die PECB ISO-45001-Lead-Auditor Zertifizierungsprüfung erfordert. So können Sie die ISO-45001-Lead-Auditor Prüfung 100% bestehen.

PECB ISO-45001-Lead-Auditor Prüfungsplan:

Thema	Einzelheiten
Thema 1	Managing an ISO 45001 audit program: This section of the exam measures the skills of Audit Managers and covers the management of an ongoing ISO 45001 audit program. It focuses on scheduling audits, maintaining auditor competency, and ensuring continuous improvement within the auditing process. One skill to be measured is implementing strategies for effective audit program management.
Thema 2	ISO 45001 requirements for an OH&S MS – Clauses 4 to 10: This section of the exam measures the skills of Auditors related to specific requirements outlined in ISO 45001 about occupational health and safety management systems. It emphasizes understanding clauses that address context, leadership, planning, support, operation, performance evaluation, and improvement. A skill to be measured is applying ISO 45001 requirements to organizational practices.
Thema 3	Conducting an ISO 45001 audit: This section of the exam measures the skills of Lead Auditors and covers the execution of an ISO 45001 audit. It focuses on gathering evidence, interviewing personnel, and assessing compliance with OHSMS requirements during the audit process.
Thema 4	Closing an ISO 45001 audit: This section of the exam measures the skills of Audit Consultants and covers the procedures for concluding an ISO 45001 audit. It emphasizes reporting results, discussing findings with stakeholders, and ensuring follow-up actions are planned.
Thema 5	Fundamental principles and concepts of an occupational health and safety management system: This section of the exam measures the skills of Health and Safety Managers and covers the essential principles and concepts underlying an occupational health and safety management system (OHSMS). It focuses on understanding the framework for managing health and safety risks to prevent workplace injuries and illnesses. One skill to be measured is identifying key components of an effective OHSMS.

ISO-45001-Lead-Auditor Übungstest: PECB Certified ISO 45001 Lead

Auditor Exam & ISO-45001-Lead-Auditor Braindumps Prüfung

Die Fragenkataloge von PECB ISO-45001-Lead-Auditor von unserem PrüfungFrage existieren in der Form von PDF und Stimulationsoftware. Wir aktualisieren unsere Materialien regelmäßig, so dass Sie immer die aktuellen und genauen Informationen über die Fragenkataloge von PECB ISO-45001-Lead-Auditor erhalten können. Nach langjährigen Bemühungen haben unsere Erfolgsquote von der PECB ISO-45001-Lead-Auditor Zertifizierungsprüfung 100% erreicht.

PECB Certified ISO 45001 Lead Auditor Exam ISO-45001-Lead-Auditor Prüfungsfragen mit Lösungen (Q57-Q62):

57. Frage

What does ISO 45001 say are the hazards that have to be considered when planning a health and safety management system? Select the ONE best answer.

- A. Work activities, workplace design, and human factors such as hours of work and bullying and harassment
- B. Hot-work, working at height, enclosed space entry, and work on electrical equipment
- C. Work hazards and environmental factors such as bad weather
- D. Work activities where there is the possibility of danger

Antwort: A

Begründung:

ISO 45001:2018 requires a holistic approach to occupational health and safety. This means considering all aspects that could impact worker well-being, not just obvious physical hazards. The correct answer encompasses work activities (the tasks themselves), workplace design (the physical environment), and human factors (psychological and social aspects like working hours and harassment). It's the most comprehensive and aligned with the standard's philosophy ISO 45001:2018, Clause 6.1.2, outlines requirements for hazard identification. Hazards to consider include work activities, workplace design, human factors, and social factors that may impact OH&S. These go beyond traditional physical risks and include psychosocial and organizational hazards.

Analysis of Options:

* A. Work activities, workplace design, and human factors such as hours of work and bullying and harassment: Correct. This comprehensively addresses hazard categories outlined in ISO 45001, Clause 6.1.2.

* B. Work activities where there is the possibility of danger: Too general. ISO 45001 includes broader categories of hazards, including those related to organizational and social factors.

* C. Hot-work, working at height, enclosed space entry, and work on electrical equipment: Too narrow. These are specific hazards but do not encompass the full range outlined in ISO 45001.

* D. Work hazards and environmental factors such as bad weather: Incomplete. While environmental factors are relevant, ISO 45001 also includes workplace design, human factors, and psychosocial hazards.

ISO References:

* Clause 6.1.2.1: Hazard identification.

* Annex A.6.1.2: Examples of hazard categories, including workplace design and human factors.

58. Frage

You are auditing a site of Good Food Shack, a restaurant chain. In the kitchen area, you notice a half-filled open drum sitting in a pool of liquid, which is dribbling across a work area. You ask the head Chef what is in the drum and are told it is waste the frying process. When you ask why it is kept there, You are told that it is not normally kept there, but it not a problem and says that he will arrange it to be moved to a storeroom and will give the floor a good clean.

Look around the kitchen, you observe knives and cleavers lying around on worktops, staff wearing no protective gloves and a large pot of boiling water with nobody near it. There is no evidence of any fire extinguishers or fire blankets within sight.

You decide to raise a nonconformance. Select one of the options that best describes the finding against clause 8.1.2 of ISO 45001.

- A. Failure to reduce risks associated with working in the kitchen.
- B. Measures to prevent slippage in the kitchen from waste cooking oil were not taken.
- C. Staff are at risk of serious injury while working in the kitchen.
- D. Training of the kitchen staff was not effective enough to prevent poor safety awareness in the kitchen area.

Antwort: A

Begründung:

Comprehensive Detailed Explanation along with All ISO 45001 Audit Reference Clause 8.1.2 of ISO 45001 pertains to Eliminating Hazards and Reducing OH&S Risks. Organizations must implement appropriate controls to manage workplace hazards effectively.
Issue Identified:

The kitchen environment at the audited site presents multiple hazards, including:

Oil spillage creating a slip hazard.

Open drums of waste material posing a chemical or hygiene hazard.

Unsecured knives and cleavers increasing the risk of cuts.

Boiling water left unattended, posing a risk of burns.

Lack of visible fire extinguishers or fire blankets, increasing fire risk.

Analysis of Options:

A . Failure to reduce risks associated with working in the kitchen.

This option accurately captures the broader failure to implement effective measures to eliminate or reduce hazards across multiple areas in the kitchen.

B . Measures to prevent slippage in the kitchen from waste cooking oil were not taken.

This is specific to one hazard (oil spillage) and does not address other significant risks observed, such as fire safety or sharp tools.

C . Staff are at risk of serious injury while working in the kitchen.

While true, this is more of a general observation and does not address the root cause of the hazards or the failure of controls.

D . Training of the kitchen staff was not effective enough to prevent poor safety awareness in the kitchen area.

Although training deficiencies may contribute to the issue, this option does not reflect the overarching systemic failure to manage hazards effectively.

Best Description of the Nonconformance:

Failure to reduce risks associated with working in the kitchen (Option A) is the most comprehensive finding, reflecting the organization's lack of adequate controls to mitigate hazards.

ISO Reference:

Clause 8.1.2: Organizations must establish controls to eliminate or minimize OH&S risks systematically.

Clause 7.2: Ensuring competency through training is important but must be coupled with hazard control measures.

59. Frage

You are an audit team leader conducting an ISO 45001 Stage 2 audit of a nautical college that provides courses for those working in the maritime sector. The College Principal is absent, and the Deputy Principal represents top management.

At the closing meeting attended solely by the Deputy Principal, you inform him that you have found numerous gaps in the OHSMS processes which constitute poor planning and control of the OHSMS. Your team raises a large number of findings including major nonconformities, minor nonconformities, and opportunities for improvement.

Select three of the options which would represent major nonconformities from the evidence described.

- A. College staff members were not consulted by an external OH&S consultant who was appointed to plan, establish, and maintain the OHSMS.
- B. Some of the college staff did not wear personal protective equipment (PPE) during fire drills.
- C. Rainwater dripping from the ceiling in a corridor presented a slip hazard with no mitigating action being taken.
- D. Fire Marshalls had not been appointed to manage emergency response in the event of a fire breaking out at the college.
- E. No internal audits of the OHSMS had been conducted because the report from the consultant appointed to plan, implement, and maintain the internal audit programme was not complete.
- F. Student Union representatives were unaware of the OH&S policy of the college.
- G. The college curriculum did not include detailed coverage of maritime regulations concerning the safety of life at sea.
- H. Students were not given OH&S safety training during their initiation to the courses being undertaken.

Antwort: D,E,H

60. Frage

Match the correct responsibility with each participant of a second-party audit:

Responsibility	Audit Participant
Prepares the audit report	
Prepares audit checklists for use during the audit	
Participates under the direction and guidance of an auditor	
Follows-up on audit findings within an agreed timeframe	
A person who accompanies the audit team but does not act as an auditor	
Escorts the auditors but does not participate in the audit	

To complete the table click on the blank section you want to complete so that it is highlighted in red, and then click on the applicable text from the options below. Alternatively, drag and drop each option to the appropriate blank section.

Auditor
Auditor in training
Audit Team Leader
Observer
Auditee
Guide

Antwort:

Begründung:

Responsibility	Audit Participant
Prepares the audit report	Audit Team Leader
Prepares audit checklists for use during the audit	Auditor
Participates under the direction and guidance of an auditor	Auditor in training
Follows-up on audit findings within an agreed timeframe	Auditee
A person who accompanies the audit team but does not act as an auditor	Observer
Escorts the auditors but does not participate in the audit	Guide

To complete the table click on the blank section you want to complete so that it is highlighted in red, and then click on the applicable text from the options below. Alternatively, drag and drop each option to the appropriate blank section.

Auditor
Auditor in training
Audit Team Leader
Observer
Auditee
Guide

Explanation:

A screenshot of a computer Description automatically generated

Here is the correct matching of responsibilities with the audit participants:

Responsibility	Audit Participant
Prepares the audit report	Audit Team Leader
Prepares audit checklists for use during the audit	Auditor
Participates under the direction and guidance of an auditor	Auditor in Training
Follows up on audit findings within an agreed timeframe	Auditee
A person who accompanies the audit team but does not act as an auditor	Observer
Escorts the auditors but does not participate in the audit	Guide

Explanation:

* Prepares the audit report # Audit Team Leader: The Audit Team Leader is responsible for compiling and preparing the final audit report, summarizing findings and conclusions.

* Prepares audit checklists for use during the audit # Auditor: Auditors create checklists to ensure a thorough and systematic evaluation during the audit.

* Participates under the direction and guidance of an auditor # Auditor in Training: An auditor in training works under supervision to gain experience and contribute to the audit process.

* Follows up on audit findings within an agreed timeframe # Auditee: The auditee is responsible for addressing and resolving audit findings and providing evidence of corrective actions.

* A person who accompanies the audit team but does not act as an auditor # Observer: Observers are typically external parties or internal personnel who watch the audit process but do not participate actively.

* Escorts the auditors but does not participate in the audit # Guide: A guide facilitates the audit by helping auditors navigate the site and access relevant areas or documents.

* ISO 19011:2018: Guidelines for auditing management systems.

61. Frage

Whistleklean is a national dry cleaning and laundry organization with 50 shops. You are conducting an OHSMS surveillance audit of the head office and are sampling health and safety performance monitoring.

You find that 80 per cent of incidents originate from five shops in the same region. Most of these relate to staff and customer feeling unwell due to breathing in the pungent atmosphere. Some required to be hospitalized.

The OHS Manager tells you that these are the oldest shops in the organization. The cleaning equipment emits Volatile Organic Compounds (VOCs) and needs replacing but the organisation cannot afford it at the moment.

You raise the following nonconformity against clause 10.2 of ISO 45001.

"The organization failed to act after incidents in the five old shops involving the release of VOCs from laundry operations, which resulted in injury in some instances. The equipment used was not capable of consistently operating to the required level of safety"

Select one of the options which would constitute the most effective corrective action for the nonconformity.

- A. Evaluate and update the Personal protective equipment (PPE) requirements for employees working with strong chemicals such as face masks and gloves.
- B. Display an emergency phone number in a prominent place to ensure that injured workers and shoppers
- **C. Reassess the OH&S risks associated with the laundry process in the five old shops.**
- D. Review the current safety procedures related to handling and use of chemicals in the laundry process to ensure their effectiveness.

Antwort: C

Begründung:

Comprehensive Detailed Explanation along with All ISO 45001 Audit References Clause 10.2 of ISO 45001 pertains to Nonconformity and Corrective Action. Organizations are required to evaluate incidents, investigate their causes, and implement effective corrective actions to prevent recurrence.

* Issue Identified: The incidents in the five old shops are related to VOC emissions from outdated equipment, leading to staff and customer health concerns. This indicates inadequate risk management and failure to act on known safety issues.

* Analysis of Options:

* A. Display an emergency phone number. This is a reactive approach and does not address the root cause of the issue, i.e., VOC emissions. It also does not align with ISO 45001's emphasis on preventive measures.

* B. Evaluate and update the PPE requirements. While PPE is important, relying solely on PPE without addressing the root cause (emission of VOCs) is insufficient. PPE is considered the last line of defense under the hierarchy of controls.

* C. Reassess the OH&S risks associated with the laundry process in the five old shops. This option aligns with ISO 45001, Clause 8.1.2, and Clause 10.2, as it emphasizes reassessing risks and taking steps to mitigate them. A thorough risk assessment could lead to interim measures such as process improvements or administrative controls until the equipment is replaced.

* D. Review the current safety procedures. While reviewing safety procedures is useful, it does not address the specific nonconformity related to the equipment's inability to operate safely.

* Best Action: Reassessing the risks in the five shops (Option C) ensures a comprehensive review of the hazards posed by outdated equipment, leading to appropriate preventive and corrective actions.

ISO References:

* Clause 10.2: Requires identifying and addressing nonconformities to prevent recurrence.

* Clause 8.1.2: Emphasizes the hierarchy of controls and risk assessment as a foundation for mitigating hazards.
