

ISO-45001-Lead-Auditor Quizfragen Und Antworten, ISO-45001-Lead-Auditor Prüfungsvorbereitung

Fast2test ist eine Website, die den Kandidaten, die sich an den PECB ISO-45001-Lead-Auditor IT-Zertifizierungsprüfungen beteiligen, Bequemlichkeiten bietet. Viele Kandidaten, die Produkte von Fast2test benutzt haben, haben die IT-Zertifizierungsprüfung einmalig bestanden. Ihre Feedbacks haben gezeigt, dass die Hilfe von Fast2test sehr wirksam ist. Das Expertenteam von Fast2test setzt sich aus den erfahrungsreichen IT-Experten zusammen. Sie bearbeiten nach ihren Fachkenntnissen und Erfahrungen die Schulungsunterlagen zur PECB ISO-45001-Lead-Auditor Zertifizierungsprüfung. Die Schulungsunterlagen werden Ihnen sicher viel Hilfe leisten. Die Simulationssoftware und Fragen zur PECB ISO-45001-Lead-Auditor Zertifizierungsprüfung werden nach dem Prüfungsprogramm zielgerichtet bearbeitet. Sie werden Ihnen sicher helfen, die PECB ISO-45001-Lead-Auditor Zertifizierungsprüfung zum ersten Mal zu bestehen.

Warum versprechen wir, dass wir Ihnen Geld zurückgeben, wenn Sie die PECB ISO-45001-Lead-Auditor Prüfung nicht bestehen? Denn zahllose Kunden, die unsere Prüfungssoftware benutzt haben, bestehen die PECB ISO-45001-Lead-Auditor Zertifizierungsprüfung, was uns die Konfidenz bringt. PECB ISO-45001-Lead-Auditor Prüfung ist eine sehr wichtige Beweis der IT-Fähigkeit für die Angestellte im IT-Gewerbe. Aber die Prüfung ist auch schwierig. Die Arbeiter von Fast2test haben die PECB ISO-45001-Lead-Auditor Prüfungsunterlagen mit große Einsätze geforscht. Die Software ist das Geistesprodukt vieler IT-Spezialist.

ISO-45001-Lead-Auditor Zertifizierungsfragen, PECB ISO-45001-Lead-Auditor PrüfungFragen

Wir Fast2test bieten Ihnen verschiedene Unterlagensversionen, die Ihre Nutzung erleichtern können. Die PDF-Versionen können das Lesen erleichtern und Ihnen die aktuellen PECB ISO-45001-Lead-Auditor Prüfungsfragen zeigen, Die Software-Versionen sind die Simulationssoftwares, die Ihre Vorbereitungssituation auf jeden Fall testen. Wenn Sie wissen wollen, ob Sie sich für PECB ISO-45001-Lead-Auditor Prüfung gut bereit sind, können Sie helfen, Ihre Stärke und Schwäche ganz schnell finden, um Ihren nächsten Lernplan zu erstellen.

PECB Certified ISO 45001 Lead Auditor Exam ISO-45001-Lead-Auditor Prüfungsfragen mit Lösungen (Q10-Q15):

10. Frage

Select two options that are corrections.

- A. Updating the emergency preparedness plan as a result of carrying out a practical test.
- **B. Adding a missing signature to a corrective action record.**
- C. Changing a process to reduce its inherent risk.
- D. Using OHSMS induction training to address an identified lack OHSMS awareness among winkers.
- **E. Changing the name of a tutor that did not deliver a course to the name of the tutor that did.**
- F. Reviewing workers training records.

Antwort: B,E

Begründung:

Comprehensive Detailed Explanation along with All ISO 45001 Audit References Corrections address immediate issues, such as errors or omissions, without addressing root causes. Clause 10.2 of ISO 45001:2018 allows for corrections alongside corrective actions.

Analysis of Options:

- * A. Adding a missing signature to a corrective action record:Correct. This is a correction addressing an administrative oversight.
- * B. Changing a process to reduce its inherent risk:Incorrect. This is a corrective action aimed at addressing root causes, not a correction.
- * C. Changing the name of a tutor that did not deliver a course to the name of the tutor that did: Correct. This corrects an error in records without addressing systemic issues.
- * D. Reviewing workers' training records:Incorrect. This is part of ongoing monitoring or auditing, not a correction.
- * E. Updating the emergency preparedness plan as a result of carrying out a practical test:Incorrect. This is a corrective action resulting from performance evaluation, not a correction.
- * F. Using OHSMS induction training to address an identified lack of OHSMS awareness among workers:Incorrect. This is a preventive or corrective action, not a correction.

ISO References:

- * Clause 10.2: Nonconformity and corrective action.
- * Clause 7.5: Control of documented information

11. Frage

Wash-it-up is an organization that provides window cleaning services for the industrial sector. It has been certified to ISO 45001 for some time and has appointed a new OHS Manager. The audit plan during a surveillance audit includes the improvement actions and the auditor asks to see the most recent management review meeting minutes. Which six of the statements would represent output audit evidence for the management review?

- A. Minutes of previous management reviews
- B. Opportunities to integrate the OHS management system with other business processes
- C. Updates to the risk register
- D. Procurement of new safety harnesses for workers
- E. Decisions related to continual improvement opportunities
- F. Report showing the trend of an increase in safety incidents
- G. Improvements in the OHSMS
- H. Plan to prioritize health and safety issues as a business strategy
- I. Allocation of a bigger budget for the OHS department
- J. Worker feedback of positive and negative comments

Antwort: B,C,E,G,H,I

Begründung:

Comprehensive Detailed Explanation along with All ISO 45001 Audit Reference Clause 9.3 of ISO 45001:2018 outlines the requirements for management reviews. These reviews must evaluate the performance of the OHSMS and identify opportunities for improvement. Outputs of management reviews typically include decisions and actions that align with strategic and operational priorities.

Analysis of Options:

- A . Decisions related to continual improvement opportunities:
This is a valid output, as continual improvement is a key objective of management reviews under Clause 10.3.
- B . Allocation of a bigger budget for the OHS department:
Resource allocation is a common output of management reviews to address identified needs.
- C . Improvements in the OHSMS:
Improvements reflect the organization's commitment to enhancing safety performance.
- D . Minutes of previous management reviews:
While minutes provide context, they are not an output of the current management review.
- E . Opportunities to integrate the OHS management system with other business processes:
Integration opportunities are valid outputs, as they enhance the system's effectiveness.
- F . Plan to prioritize health and safety issues as a business strategy:
Strategic alignment of health and safety with business objectives is an expected output.
- G . Procurement of new safety harnesses for workers:
This is an operational action, not a direct output of the management review process.

H . Report showing the trend of an increase in safety incidents:

This is an input to the management review, not an output.

I . Updates to the risk register:

Risk register updates reflect changes in identified hazards and risks, making this a valid output.

J . Worker feedback of positive and negative comments:

Worker feedback is an input to the management review, not an output.

ISO Reference:

Clause 9.3: Management review inputs and outputs.

Clause 10.3: Continual improvement actions.

12. Frage

An internal auditor of a manufacturer of plastic packaging products for the food industry raised a nonconformity against section 10.2 of ISO 45001 in Report IA202. The nonconformity (NC3) stated: "The level of reported health and safety incidents has increased by 9.7% over the last 12 months. This included an increase in reported accidents." A third-party auditor reviewing the internal audit process came across the nonconformity and found that there was no evidence of having been reported to relevant staff. Select three of the following nonconformities that the auditor could raise to ISO 45001.

- A. 9.2.2.e - Management failed to take any action to deal with the audit nonconformity.
- B. 9.2.2 - Report IA202 contained a poorly worded nonconformity (NC3).
- C. 10.2.b - The root cause of the increase in reported health and safety accidents was not investigated.
- D. 7.4.3 - The results of the internal audit IA202 were not communicated to interested parties.
- E. 9.2.2.d - Staff were not made aware that health and safety incidents were increasing.
- F. 8.1.1 - Operations were not properly controlled to avoid health and safety incidents.

Antwort: A,C,D

Begründung:

Clause 10.2 requires organizations to investigate nonconformities, determine their causes, and take corrective actions to prevent recurrence. Clause 9.2.2 specifies the requirements for managing internal audit processes, while Clause 7.4.3 emphasizes the need to communicate relevant information effectively.

Analysis of Options:

A . 9.2.2.e - Management failed to take any action to deal with the audit nonconformity:

Correct. Management must ensure that internal audit findings are addressed promptly. The lack of action violates Clause 9.2.2.e.

B . 9.2.2.d - Staff were not made aware that health and safety incidents were increasing:

Incorrect. This clause pertains to the planning and conduct of audits, not the communication of findings.

C . 8.1.1 - Operations were not properly controlled to avoid health and safety incidents:

Incorrect. While increased incidents may suggest operational issues, this option does not directly relate to the internal audit findings.

D . 9.2.2 - Report IA202 contained a poorly worded nonconformity (NC3):

Incorrect. The clarity of the nonconformity wording is not directly relevant to Clause 9.2.2.

E . 10.2.b - The root cause of the increase in reported health and safety accidents was not investigated:

Correct. Failure to investigate root causes violates Clause 10.2.b.

F . 7.4.3 - The results of the internal audit IA202 were not communicated to interested parties:

Correct. Effective communication of audit results is required under Clause 7.4.3.

ISO Reference:

Clause 9.2.2: Internal audit process requirements.

Clause 10.2: Nonconformity and corrective action.

Clause 7.4.3: Communication requirements.

13. Frage

ISO 45001 requires the organisation to retain OHSMS documented information. From the following list of documented information, which four examples must be retained by the organisation?

- A. Workers' current level of competency
- B. Effectiveness of corrective actions
- C. Results of management review
- D. The relevant requirements of workers
- E. OH&S Policy
- F. Results of compliance evaluation

- G. Risks and opportunities
- H. Assigned responsibilities and authorities

Antwort: B,C,E,F

Begründung:

Analysis of Options:

A . Results of management review:

Correct. Clause 9.3 requires retention of management review results as documented information.

B . Risks and opportunities:

Incorrect. Risks and opportunities must be considered and managed, but retaining this as documented information is not mandatory.

C . Results of compliance evaluation:

Correct. Clause 9.1.2 requires retention of compliance evaluation results.

D . Workers' current level of competency:

Incorrect. Competency must be ensured, but retaining specific competency records is not explicitly required.

E . Assigned responsibilities and authorities:

Incorrect. These must be defined and communicated but are not required to be retained as documented information.

F . The relevant requirements of workers:

Incorrect. Relevant worker requirements must be considered but not retained as documented information.

G . Effectiveness of corrective actions:

Correct. Clause 10.2 requires retention of evidence of corrective actions taken.

H . OH&S Policy:

Correct. Clause 5.2 requires the OH&S policy to be maintained as documented information.

ISO Reference:

Clause 5.2: OH&S policy.

Clause 9.1.2: Compliance evaluation.

Clause 9.3: Management review.

Clause 10.2: Corrective actions.

14. Frage

Whistlekleen is a national dry cleaning and laundry organization with 50 shops. You are conducting an OHSMS surveillance audit of the head office and are sampling health and safety performance monitoring. You find that 80 per cent of incident originate from five shops in the same region. Most of these relate to staff and customer feeling unwell due to breathing in the pungent atmosphere. Some required to be hospitalized. The OHS Manager tells you that these are the oldest shops in the organization. The cleaning equipment emits Volatile Organic Compounds (VOCs) and needs replacing but the organisation cannot afford it at the moment.

You raise the following nonconformity against clause 10.2 of ISO 45001.

"The organization failed to act after incidents in the five old shops involving the release of VOCs from laundry operations, which resulted in injury in some instances. The equipment used was not capable of consistently operating to the required level of safety" Select one of the options which would constitute the most effective corrective action for the nonconformity.

- **A. Reassess the OH&S risks associated with the laundry process in the five old shops.**
- B. Evaluate and update the Personal protective equipment (PPE) requirements for employees working with strong chemicals such as face masks and gloves.
- C. Display on emergency phone number in a prominent place to ensure that injured workers and shoppers
- D. Review the current safety procedures related to handling and use of chemicals In the laundry process to ensure their effectiveness.

Antwort: A

Begründung:

Comprehensive Detailed Explanation along with All ISO 45001 Audit Reference Clause 10.2 of ISO 45001 pertains to Nonconformity and Corrective Action. Organizations are required to evaluate incidents, investigate their causes, and implement effective corrective actions to prevent recurrence.

Issue Identified:

The incidents in the five old shops are related to VOC emissions from outdated equipment, leading to staff and customer health concerns. This indicates inadequate risk management and failure to act on known safety issues.

Analysis of Options:

A . Display an emergency phone number.

This is a reactive approach and does not address the root cause of the issue, i.e., VOC emissions. It also does not align with ISO 45001's emphasis on preventive measures.

B . Evaluate and update the PPE requirements.

While PPE is important, relying solely on PPE without addressing the root cause (emission of VOCs) is insufficient. PPE is considered the last line of defense under the hierarchy of controls.

C . Reassess the OH&S risks associated with the laundry process in the five old shops.

This option aligns with ISO 45001, Clause 8.1.2, and Clause 10.2, as it emphasizes reassessing risks and taking steps to mitigate them. A thorough risk assessment could lead to interim measures such as process improvements or administrative controls until the equipment is replaced.

D . Review the current safety procedures.

While reviewing safety procedures is useful, it does not address the specific nonconformity related to the equipment's inability to operate safely.

Best Action:

Reassessing the risks in the five shops (Option C) ensures a comprehensive review of the hazards posed by outdated equipment, leading to appropriate preventive and corrective actions.

ISO Reference:

Clause 10.2: Requires identifying and addressing nonconformities to prevent recurrence.

Clause 8.1.2: Emphasizes the hierarchy of controls and risk assessment as a foundation for mitigating hazards.
