APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q15-Q20):

NEW QUESTION # 15

Which of the following statements about the differences between an internal audit and a certification audit is true?

An internal audit is conducted at planned intervals and a certification audit is conducted annually An internal audit is known as a 1st party audit and a certification audit is known as a 3rd party audit

- A. Neither 1 or 2 is true
- B. Both 1 and 2 are true
- C. Only 1 is true
- D. Only 2 is true

Answer: D

Explanation:

ISO/IEC 27001 Clause 9.2 requires internal audits to be conducted at planned intervals, but it does not specify an annual frequency.

Certification audits, under ISO/IEC 17021 rules, typically occur on a 3-year cycle with annual surveillance, not strictly "annually."

This makes statement 1 inaccurate.

Audit types are defined in ISO/IEC 19011:

First-party audits: conducted internally by or on behalf of the organization (internal audits).

Third-party audits: conducted by independent external certification bodies.

Thus, statement 2 is correct. Therefore, the accurate choice is B: Only 2 is true.

NEW QUESTION # 16

Which action is an organization required to take to ensure that personnel are competent to perform their assigned tasks within the ISMS?

- A. Ensure all personnel are trained to ISO/IEC 27001 Foundation level
- B. Identify products which could be used in the organization to improve ISMS performance and effectiveness
- C. Hold up-to-date records on training, skills, experience and qualifications
- D. Ensure that the controls for compliance with legal and contractual requirements are implemented

Answer: C

Explanation:

Clause 7.2 (Competence) requires the organization to:

* "determine the necessary competence of person(s) doing work under its control that affects its information security performance;"

* "ensure that these persons are competent on the basis of appropriate education, training, or experience;"

* "retain appropriate documented information as evidence of competence." This makes holding up-to-date records on training, skills, experience, and qualifications (D) the correct answer. Option A is irrelevant to competence. Option B is incorrect since ISO does not require Foundation- level training - competence is context-based. Option C is related to compliance but does not ensure individual competence.

Thus, the verified correct answer is D.

NEW QUESTION # 17

Which item is required to be included in an information security policy?

- A. A framework enabling concerns with the information security policy to be addressed
- B. A Statement of Applicability which defines the necessary controls to be implemented
- **C. A commitment to satisfy applicable requirements related to information security**
- D. A plan for the continual improvement of the information security management system

Answer: C

Explanation:

Clause 5.2 (Information security policy) requires that the policy:

- * "includes information security objectives (or provides a framework for setting them)"
- * "includes a commitment to satisfy applicable requirements related to information security"
- * "includes a commitment to continual improvement of the ISMS."

Among the listed options, the exact mandatory requirement is "a commitment to satisfy applicable requirements related to information security". Option B partially reflects Clause 5.2 (commitment to continual improvement), but the wording given in the standard prioritizes the satisfaction of applicable requirements (e.g., legal, regulatory, contractual). Option C is not a policy requirement. Option D (Statement of Applicability) is a separate mandatory document (Clause 6.1.3) and not part of the policy itself.

Thus, the correct answer is A.

NEW QUESTION # 18

What is a requirement for a corrective action made in response to a nonconformity?

- **A. They are appropriate to the effects of the nonconformity**
- B. They always eliminate the cause of the nonconformity
- C. They are proportionate to the likelihood of the nonconformity recurring
- D. They do NOT change the organization's information security policies

Answer: A

Explanation:

Clause 10.1 (Nonconformity and corrective action) specifies:

"The organization shall react to the nonconformity and, as applicable: take action to control and correct it; deal with the consequences; evaluate the need for action to eliminate the cause(s)..."

Corrective actions shall be appropriate to the effects of the nonconformities encountered." This confirms option B. Option A is inaccurate-ISO requires actions appropriate to effects, not probability alone. Option C is false-policies may need updating to correct nonconformities. Option D is incorrect, as not every cause can always be eliminated; residual issues may exist.

Thus, the verified requirement is B.

NEW QUESTION # 19

What is the name of the control clause used to control information security breaches within Annex A of ISO/IEC 27001?

- **A. Information security event reporting**
- B. Information security event management
- C. Response to information security events
- D. Reporting information security incidents

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A in ISO/IEC 27001 refers directly to ISO/IEC 27002 for control guidance. In ISO/IEC 27002:2022, Clause 6.8 is titled: "Information security event reporting - Information security events should be reported through appropriate management channels as quickly as possible." This control ensures breaches, incidents, or suspected issues are reported for action. The other options (B, C, D) are not the exact titles in Annex A. The official title is Information security event reporting, confirming
