Accurate APMG-International ISO-IEC-27001-Foundation Exam Questions

PDF Material

When finding so many exam study material for SureTorrent ISO-IEC-27001-Foundation exam dumps, you may ask why to choose APMG-International ISO-IEC-27001-Foundation training dumps. Now, we will clear your confusion. Firstly, our questions and answers of ISO-IEC-27001-Foundation pdf dumps are compiled and edited by highly-skilled IT experts. Besides, we have detailed explanation for the complex issues, thus you can easy to understand. What's more, the high hit rate of ISO-IEC-27001-Foundation Questions can ensure you 100% pass.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	• Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.
Topic 2	• Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.
Topic 3	• Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.
Topic 4	• Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q49-Q54):

NEW QUESTION # 49

What activity is done first when preparing for an initial certification audit?

- A. Provide documents to the Certification Body auditor for the Stage 1 audit
- **B. Agree the scope of the ISMS with the Certification Body auditor**
- C. Provide records to the Certification Body auditor for the Stage 2 audit
- D. Provide evidence that nonconformities from an internal audit have been actioned

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001:2022 standards and certification guidance:

Before a certification audit can begin, the scope of the ISMS must be clearly defined and agreed with the Certification Body.

ISO/IEC 27001 Clause 4.3 requires: "The scope shall be available as documented information." Certification Bodies require this scope statement to plan audit duration, resources, and coverage. Only after the scope is agreed does the Stage 1 audit begin, which reviews documented information and readiness. Stage

2 focuses on implementation and effectiveness. Evidence of corrective actions (C) is checked at Stage 2 if issues were identified earlier. Records provision (D) occurs during Stage 2, not first.

Thus, the first step in preparing for certification is A: Agreeing the scope of the ISMS with the Certification Body auditor.

NEW QUESTION # 50

To whom does the scope of the Terms and conditions of employment control apply?

- A. Employees only
- B. Personnel and the organization
- **C. All employees, contractors and third-party users**
- D. Contractors only

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.6.1 (Terms and conditions of employment) states:

"The contractual agreements with employees and contractors shall state their and the organization's responsibilities for information security." This means the control applies not just to employees, but also contractors and, where relevant, third-party users who are subject to contractual obligations with the organization. The goal is to ensure that all parties engaged in work under the organization's control understand their security responsibilities before, during, and after employment or contract engagement.

Options A and B are too narrow, excluding key groups. Option C misrepresents the scope by implying a mutual responsibility but not identifying the individuals covered. The explicit scope includes employees, contractors, and third-party users.

Therefore, the correct answer is D.

NEW QUESTION # 51

Identify the missing words in the following sentence.

The organization shall establish, implement, maintain and [?] an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document.

- A. continually improve
- B. communicate the importance of
- C. report on
- D. enforce standards for

Answer: A

Explanation:

Clause 4.4 of ISO/IEC 27001:2022 states:

"The organization shall establish, implement, maintain and continually improve an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document." This requirement highlights that an ISMS is not static; it must evolve continuously to adapt to new risks, technologies, and business changes. Options A, C, and D are not mentioned in the clause. The continual improvement cycle is central to ISO standards, aligning with the Plan-Do-Check-Act (PDCA) model.

Thus, the missing words are "continually improve."

NEW QUESTION # 52

What international standard provides guidance on the integration of ISO/IEC 27001 and the IT Service Management standard?

- A. ISO/IEC 27002
- B. ISO/IEC 27013
- C. ISO/IEC 20000-1
- D. None of the above

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27013 standards:

ISO/IEC 27013 is titled:

"Information technology - Security techniques - Guidance on the integrated implementation of ISO/IEC 27001 and ISO/IEC 20000-1."

This standard provides organizations with specific advice on how to integrate an Information Security Management System (ISMS) with an IT Service Management System (ITSMS). ISO/IEC 20000-1 is the IT Service Management requirements standard, but integration guidance is provided in 27013. ISO/IEC 27002 (A) is guidance for controls, not integration. Option D is incorrect since ISO/IEC 27013 explicitly exists for this purpose.

Therefore, the correct verified answer is B: ISO/IEC 27013.

NEW QUESTION # 53

Which statement describes a requirement for information security objectives?

- A. They shall be consistent with the information security policy

- B. They shall be reviewed at least annually
- C. They shall be contractually transferred to third parties
- D. They shall all be measurable

Answer: A

Explanation:

Clause 6.2 (Information security objectives) requires that objectives:

- * "be consistent with the information security policy"
- * "be measurable (if practicable)"
- * "take into account applicable information security requirements"
- * "be monitored, communicated, and updated as appropriate."

From this, option A is correct since consistency with policy is an explicit requirement. Option B is incorrect because the standard allows objectives to be measurable "if practicable" (not mandatory for all). Option C is incorrect-objectives are not transferred contractually to third parties, though third-party agreements may include security requirements. Option D is incorrect because the standard requires regular review "as appropriate," not a fixed annual cycle.

Thus, the verified requirement is A: They shall be consistent with the information security policy.

NEW QUESTION # 54

.....

Our company according to the situation reform on conception, question types, designers training and so on. Our latest ISO-IEC-27001-Foundation exam torrent was designed by many experts and professors. You will have the chance to learn about the demo for if you decide to use our ISO-IEC-27001-Foundation quiz prep. We can sure that it is very significant for you to be aware of the different text types and how best to approach them by demo.
