Valid ISO-IEC-27001-Foundation Exam Forum - ISO-IEC-27001-Foundation Exam Tips

Even in a globalized market, the learning material of similar ISO-IEC-27001-Foundation doesn't have much of a share, nor does it have a high reputation or popularity. In this dynamic and competitive market, the ISO-IEC-27001-Foundation learning questions can be said to be leading and have absolute advantages. In order to facilitate the user real-time detection of the learning process, we ISO-IEC-27001-Foundation Exam Material provided by the questions and answers are all in the past. It is closely associated, as our experts in constantly update products every day to ensure the accuracy of the problem, so all ISO-IEC-27001-Foundation practice materials are high accuracy.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q35-Q40):

NEW QUESTION # 35

To whom does the scope of the Terms and conditions of employment control apply?

- A. All employees, contractors and third-party users
- B. Contractors only
- C. Personnel and the organization
- D. Employees only

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.6.1 (Terms and conditions of employment) states:

"The contractual agreements with employees and contractors shall state their and the organization's responsibilities for information security." This means the control applies not just to employees, but also contractors and, where relevant, third-party users who are subject to contractual obligations with the organization. The goal is to ensure that all parties engaged in work under the organization's control understand their security responsibilities before, during, and after employment or contract engagement.

Options A and B are too narrow, excluding key groups. Option C misrepresents the scope by implying a mutual responsibility but not identifying the individuals covered. The explicit scope includes employees, contractors, and third-party users.

Therefore, the correct answer is D.

NEW QUESTION # 36

Which item is required to be included in an information security policy?

- A. A Statement of Applicability which defines the necessary controls to be implemented
- B. A framework enabling concerns with the information security policy to be addressed
- C. A commitment to satisfy applicable requirements related to information security
- D. A plan for the continual improvement of the information security management system

Answer: C

Explanation:

Clause 5.2 (Information security policy) requires that the policy:

* "includes information security objectives (or provides a framework for setting them)"

* "includes a commitment to satisfy applicable requirements related to information security"

* "includes a commitment to continual improvement of the ISMS."

Among the listed options, the exact mandatory requirement is "a commitment to satisfy applicable requirements related to information security". Option B partially reflects Clause 5.2 (commitment to continual improvement), but the wording given in the standard prioritizes the satisfaction of applicable requirements (e.g., legal, regulatory, contractual). Option C is not a policy requirement.

Option D (Statement of Applicability) is a separate mandatory document (Clause 6.1.3) and not part of the policy itself.

Thus, the correct answer is A.

NEW QUESTION # 37

Which action is a required response to an identified residual risk?

- A. Top management shall delegate its treatment to risk owners
- B. It shall be reviewed by the risk owner to consider acceptance
- C. The organization shall change practices to avoid the risk occurring
- D. By default, it shall be controlled by information security awareness and training

Answer: B

Explanation:

Clause 6.1.3 (e) specifies:

"The organization shall obtain risk owners' approval of the information security risk treatment plan and acceptance of the residual information security risks." This confirms that residual risks - those remaining after risk treatment - must be reviewed and formally accepted by the designated risk owner. Option A is incorrect; awareness training is not a default control for all residual risks. Option B misrepresents leadership responsibility; top management ensures processes exist, but risk owners formally approve residual risk.

Option D (avoiding risk) is a treatment option, not the mandated requirement for residual risks.

Thus, the required response is C: Review and acceptance by the risk owner.

NEW QUESTION # 38

Identify the missing word(s) in the following sentence.

"Information security, cybersecurity and privacy protection - [?]" is the title of ISO/IEC 27005.

- A. Information security management systems - Requirements
- B. Information security controls
- **C. Guidance on managing information security risks**
- D. Guidelines for information security management systems auditing

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27005 standards:

ISO/IEC 27005:2022 is titled:

"Information security, cybersecurity and privacy protection - Guidance on managing information security risks." This standard provides structured methodologies for identifying, analyzing, evaluating, and treating risks, in alignment with ISO/IEC 27001's risk management requirements (Clause 6.1.2 and 6.1.3). It supports organizations in implementing the risk management process that underpins an ISMS. Options A and B are titles of other ISO standards (ISO/IEC 27007 for auditing, ISO/IEC 27001 for requirements). Option D refers to ISO/IEC 27002 (controls).

Thus, the correct answer is C: Guidance on managing information security risks.

NEW QUESTION # 39

What international standard provides guidance on the integration of ISO/IEC 27001 and the IT Service Management standard?

- A. ISO/IEC 27002
- **B. ISO/IEC 27013**
- C. None of the above
- D. ISO/IEC 20000-1

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27013 standards:

ISO/IEC 27013 is titled:

"Information technology - Security techniques - Guidance on the integrated implementation of ISO/IEC 27001 and ISO/IEC 20000-1."

This standard provides organizations with specific advice on how to integrate an Information Security Management System (ISMS) with an IT Service Management System (ITSMS). ISO/IEC 20000-1 is the IT Service Management requirements standard, but integration guidance is provided in 27013. ISO/IEC 27002 (A) is guidance for controls, not integration. Option D is incorrect since ISO/IEC 27013 explicitly exists for this purpose.

Therefore, the correct verified answer is B: ISO/IEC 27013.

NEW QUESTION # 40

.....

Certification ISO-IEC-27001-Foundation exam on the first attempt. The demand of the ISO/IEC 27001 (2022) Foundation Exam exam is growing at a rapid pace day by day and almost everyone is planning to pass it so that they can improve themselves for better futures in the ExamCost sector. ISO-IEC-27001-Foundation has tried its best to make this learning material the most user-friendly so the applicants don't face excessive issues.
