ISO-IEC-27001-Foundation Real Dumps Free & New ISO-IEC-27001-Foundation Test Pass4sure

Now is the ideal time to prepare for and crack the ISO-IEC-27001-Foundation exam. To do this, you just need to enroll in the ISO-IEC-27001-Foundation examination and start preparation with top-notch and updated APMG-International ISO-IEC-27001-Foundation actual exam dumps. All three formats of ISO/IEC 27001 (2022) Foundation Exam ISO-IEC-27001-Foundation Practice Test are available with up to three months of free ISO/IEC 27001 (2022) Foundation Exam exam questions updates, free demos, and a satisfaction guarantee. Just pay an affordable price and get ISO-IEC-27001-Foundation updated exam dumps.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.
Topic 2	Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.

Topic 3	• Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.
Topic 4	• Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.
Topic 5	• Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.
Topic 6	• Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.
Topic 7	• Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q31-Q36):

NEW QUESTION # 31

In an audit, what is the definition of an observation?

- A. An issue raised by an interested party
- B. An issue excluded from the scope of the standard
- **C. A conformity to the standard where there is an opportunity for improvement**
- D. A non-fulfilment of a requirement of ISO/IEC 27001

Answer: C

Explanation:

ISO/IEC 27001 mandates internal audits (Clause 9.2) and continual improvement (Clause 10.1) but does not define the specific audit term "observation." However, the audit framework in 9.2 requires an audit programme and impartial auditors, and management review inputs include "feedback on the information security performance including trends in... audit results" and "opportunities for continual improvement."

"The companion implementation guidance (ISO/IEC 27002) reinforces the concept of opportunities for improvement in the review of policies: "The reviews should include assessing opportunities for improvement and the need for changes to the approach to information security..." In practical ISO audit usage (aligned with ISO 19011 guidance referenced in the Study Guide), an observation is a recorded conformity where improvement is advisable—commonly termed an Opportunity for Improvement (OFI). The Study Guide's internal audit section emphasizes running an audit programme to identify "potential areas of weakness or non-compliance," supporting the notion of recording improvement opportunities alongside nonconformities. Therefore, within ISO/IEC 27001 audit practice, the best-fit definition is B: a conformity where there is an opportunity for improvement.

NEW QUESTION # 32

Which International Standard can be used to implement an integrated management system with ISO/IEC 27001?

- **A. ISO/IEC 27013**
- B. ISO/IEC 27003
- C. None of the above
- D. ISO 9001

Answer: A

Explanation:

ISO/IEC 27013 provides specific guidance on the integration of ISO/IEC 27001 (Information Security Management) and ISO/IEC 20000-1 (IT Service Management). It offers practical advice for organizations seeking a unified management system approach.

While ISO/IEC 27003 (A) provides guidance on ISMS implementation, it does not address integration. ISO 9001 (C) is the Quality Management Standard and can be integrated, but the specific standard designed for integrating 27001 with ITSM is ISO/IEC 27013. Therefore, the correct answer is B: ISO/IEC 27013, as it is explicitly published for this purpose.

NEW QUESTION # 33

What is a requirement for a corrective action made in response to a nonconformity?

- A. They are proportionate to the likelihood of the nonconformity recurring
- **B. They are appropriate to the effects of the nonconformity**
- C. They always eliminate the cause of the nonconformity
- D. They do NOT change the organization's information security policies

Answer: B

Explanation:

Clause 10.1 (Nonconformity and corrective action) specifies:

"The organization shall react to the nonconformity and, as applicable: take action to control and correct it; deal with the consequences; evaluate the need for action to eliminate the cause(s)..."

Corrective actions shall be appropriate to the effects of the nonconformities encountered." This confirms option B. Option A is inaccurate-ISO requires actions appropriate to effects, not probability alone. Option C is false-policies may need updating to correct nonconformities. Option D is incorrect, as not every cause can always be eliminated; residual issues may exist.

Thus, the verified requirement is B.

NEW QUESTION # 34

Which statement is a factor that will influence the implementation of the information security management system?

- A. The ISMS will be operated as an independent process within the organization
- B. The ISMS will encompass all controls specified within ISO/IEC 27001
- C. The ISMS will be separate from the organization's overall management structure
- **D. The ISMS will be scaled to the controls according to the needs of the organization**

Answer: D

Explanation:

ISO/IEC 27001 makes clear that the ISMS is intended to be tailored to the organization. The standard states: "This document also includes requirements for the assessment and treatment of information security risks tailored to the needs of the organization. The requirements set out in this document are generic and are intended to be applicable to all organizations regardless of type, size or nature." This means implementation is scaled based on each organization's risk, context, and needs, not a fixed one-size-fits-all set of activities or controls. Clause 6.1.3 further reinforces that control selection is flexible and risk-driven: "Organizations can design controls as required or identify them from any source," and "Annex A contains a list of possible information security controls... The information security controls listed in Annex A are not exhaustive and additional information security controls can be included if needed." Together, these extracts verify that the ISMS implementation is influenced by and scaled to the organization's needs and selected controls, not separated from management processes (A, D) nor mandated to include "all controls" (B).

NEW QUESTION # 35

Which activity is an operational planning and control requirement?

- **A. Review the consequences of unintended changes**
- B. Scheduling of second party audits
- C. Perform information security risk assessments at planned intervals
- D. Document information security objectives

Answer: A

Explanation:

Clause 8.1 (Operational planning and control) requires organizations to:

"Ensure that changes are controlled. The organization shall review the consequences of unintended changes, taking action to mitigate any adverse effects, as necessary." This requirement ensures that operational processes are planned, controlled, and adjusted where

unexpected changes occur. Risk assessments (B) are covered in Clause 6.1.2 (Planning), not operations. Scheduling second-party audits (C) is not an ISMS requirement but part of supplier/customer arrangements. Documenting objectives (D) belongs to Clause 6.2 (Planning).

Thus, the required operational planning and control activity is A: Review the consequences of unintended changes.

NEW QUESTION # 36

.....

Success does not come only from the future, but it continues to accumulate from the moment you decide to do it. At the moment you choose ISO-IEC-27001-Foundation practice quiz, you have already taken the first step to success. The next thing you have to do is stick with it. ISO-IEC-27001-Foundation Training Materials will definitely live up to your expectations. Not only our ISO-IEC-27001-Foundation study materials contain the latest exam questions and answers, but also the pass rate is high as 98% to 100%.
