ISO/IEC 27001 is a globally recognized standard for Information Security Management System (ISMS). It provides a framework for implementing and managing information security to protect the confidentiality, integrity, and availability of information. The standard outlines best practices and requirements for establishing, implementing, maintaining, and continually improving an ISMS.

PECB ISO-IEC-27001-Lead-Implementer certification exam covers a wide range of topics, including information security management principles, risk management, ISMS implementation, monitoring and reviewing, and continual improvement. ISO-IEC-27001-Lead-Implementer Exam consists of multiple-choice questions and requires a passing score of 70%. Candidates who pass the exam will receive a PECB Certified ISO/IEC 27001 Lead Implementer certificate, which is recognized globally as a mark of excellence in information security management.

PECB Certified ISO/IEC 27001 Lead Implementer Exam Sample Questions (Q163-Q168):

NEW QUESTION # 163

Scenario 10: NetworkFuse develops, manufactures, and sells network hardware. The company has had an operational information security management system (ISMS) based on ISO/IEC 27001 requirements and a quality management system (QMS) based on ISO 9001 for approximately two years. Recently, it has applied for a j
