BTW, DOWNLOAD part of TestsDumps ISTQB-CTAL-TA dumps from Cloud Storage: <https://drive.google.com/open?id=1IP7GREoNnpY7Hi62BRXuJD-Ywpb2LpnV>

The key trait of our product is that we keep pace with the changes of syllabus and the latest circumstance to revise and update our ISTQB-CTAL-TA study materials, and we are available for one-year free updating to assure you of the reliability of our service. Our company has established a long-term partnership with those who have purchased our ISTQB-CTAL-TA Exam guides. We have made all efforts to update our product in order to help you deal with any change, making you confidently take part in the exam.

The ISTQB-CTAL-TA exam prep is produced by our expert, is very useful to help customers pass their ISTQB-CTAL-TA exams and get the certificates in a short time. If you want to know the quality of our ISTQB-CTAL-TA guide braindumps before you buy it, you can just free download the demo of our ISTQB-CTAL-TA Exam Questions. We can sure that our ISTQB-CTAL-TA training guide will help you get the certificate easily. If you are willing to believe us and try to learn our ISTQB-CTAL-TA exam torrent, you will get an unexpected result.

## Exam ISTQB ISTQB-CTAL-TA Materials | Real ISTQB-CTAL-TA Questions

Students often feel helpless when purchasing test materials, because most of the test materials cannot be read in advance, students often buy some products that sell well but are actually not suitable for them. But if you choose ISTQB-CTAL-TA test prep, you will certainly not encounter similar problems. Before you buy ISTQB-CTAL-TA learning question, you can log in to our website to download a free trial question bank, and fully experience the convenience of PDF, APP, and PC three models of ISTQB-CTAL-TA learning question. During the trial period, you can fully understand our study materials' learning mode, completely eliminate any questions you have about ISTQB-CTAL-TA test prep, and make your purchase without any worries. At the same time, if you have any questions during the trial period, you can feel free to communicate with our staff, and we will do our best to solve all the problems for you.

## ISTQB (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) Sample Questions (Q12-Q17):

### NEW QUESTION # 12

A game component calculates a player's trophy level based on Points Earned and Level of Difficulty. The total score is calculated as (Points Earned \* Level of Difficulty). Trophy levels are as follows:

- \* Blue:# 40
- \* Silver:> 40
- \* Gold:> 70

\* Diamond:> 80

\* Platinum:> 90

Test cases:

\* Player 1:Points earned 25, level of difficulty 2 # Total Score = 50 (Silver)

\* Player 2:Points earned 20, level of difficulty 3 # Total Score = 60 (Silver)

\* Player 3:Points earned 30, level of difficulty 1 # Total Score = 30 (Blue) What percentage of output partitions have been exercised by the following suite of test cases?

SELECT ONE OPTION

- A. 60%
- B. 20%
- C. 10%
- D. 40%

**Answer: A**

Explanation:

Comprehensive and Detailed in Depth Explanation:

Equivalence Partitioning divides input or output data into partitions that are treated similarly by the system.

\* Output Partitions:

\* Blue (# 40)

\* Silver (> 40 and # 70)

\* Gold (> 70 and # 80)

\* Diamond (> 80 and # 90)

\* Platinum (> 90)

Test Case Coverage:

\* Player 1:Silver (covered)

\* Player 2:Silver (covered)

\* Player 3:Blue (covered)

\* The test cases cover 2 out of 5 partitions (Blue and Silver).

\* Coverage Percentage:  $25 \times 100 = 40 \frac{2}{5} \times 100 = 40\%$

Therefore, the correct answer is A (40%).

### NEW QUESTION # 13

Based on the tax system specification as described below, using boundary value analysis, which would be the best test set to explicitly test on single boundary value fully?

Tax system

A tax system needs to be updated due to new legislation. For a person with a salary of less than € 20 000 and who is married, the tax needs to be recalculated.

If a person has at least three and less than six children, an additional 10% reduction is applicable.

<i>Test set (i)</i>		
<b>Civil Status</b>	<b>Salary</b>	<b>Number of Children</b>
<i>Married</i>	<i>€ 20.000</i>	<i>4</i>
<i>Not Married</i>	<i>€ 22.000</i>	<i>3</i>
<i>Married</i>	<i>€ 18.000</i>	<i>2</i>
<i>Test set (ii)</i>		
<b>Civil Status</b>	<b>Salary</b>	<b>Number of Children</b>
<i>Not Married</i>	<i>€ 19.000</i>	<i>8</i>
<i>Not Married</i>	<i>€ 20.000</i>	<i>6</i>
<i>Married</i>	<i>€ 50.000</i>	<i>4</i>
<i>Test set (iii)</i>		
<b>Civil Status</b>	<b>Salary</b>	<b>Number of Children</b>
<i>Married</i>	<i>€ 20.000</i>	<i>10</i>
<i>Not Married</i>	<i>€ 22.000</i>	<i>5</i>
<i>Not Married</i>	<i>€ 20.001</i>	<i>0</i>
<i>Test set (i ∪ v)</i>		
<b>Civil Status</b>	<b>Salary</b>	<b>Number of Children</b>
<i>Not Married</i>	<i>€ 22.000</i>	<i>1</i>
<i>Not Married</i>	<i>€ 18.000</i>	<i>2</i>
<i>Married</i>	<i>€ 18.000</i>	<i>10</i>

- A. Test set (iv)
- B. Test set (i)
- C. Test set (iii)
- D. Test set (ii)

**Answer: D**

Explanation:

The test set B is the best test set to explicitly test on single boundary value fully, using boundary value analysis. Boundary value analysis is a technique that tests the values at or near the boundaries of an input domain. The boundaries for this scenario are:

\* Salary less than €20 000

\* Number of children at least three and less than six

The test set B tests the boundary values of each boundary (€19 999, €20 000, three children, six children) and one value inside each

boundary (€19 998, €20 001, four children). Verified References: [ISTQB Certified Tester Advanced Level Test Analyst CTAL-TA], Section 3.2.2, page 35.

#### NEW QUESTION # 14

As a Test Analyst you are involved in the early stages of an acceptance test for a Product Data Management system. You are asked to write test designs and test cases based on use cases. An early version of the system is already available. It is expected that many things will change (including the user interface) during implementation of the new version.

The tests will be conducted by end-users with much domain knowledge who have also been involved in the project defining the user requirements (in the format of use cases) and reviewing other documentation.

What Is the BEST option regarding the level of detail and documentation required for test cases in the project?

- A. Detailed low-level test cases since many re-runs of the tests are expected.
- **B. High-level test cases only since the end-users have extensive domain knowledge and many changes are expected**
- C. Low-level test cases only since the end-users have extensive domain knowledge.
- D. High-level test cases supported by low-level test cases to allow for traceability and enable future changes.

**Answer: B**

Explanation:

High-level test cases only are the best option for this project, as they provide enough guidance for the end-users who have extensive domain knowledge and can fill in the details as they execute the tests. Moreover, high-level test cases are easier to maintain and adapt when many changes are expected in the system under test, as opposed to detailed low-level test cases that would require more effort and time to update. Verified References: ISTQB Certified Tester Advanced Level Test Analyst CTAL-TA, Section 3.1.1, page 29.

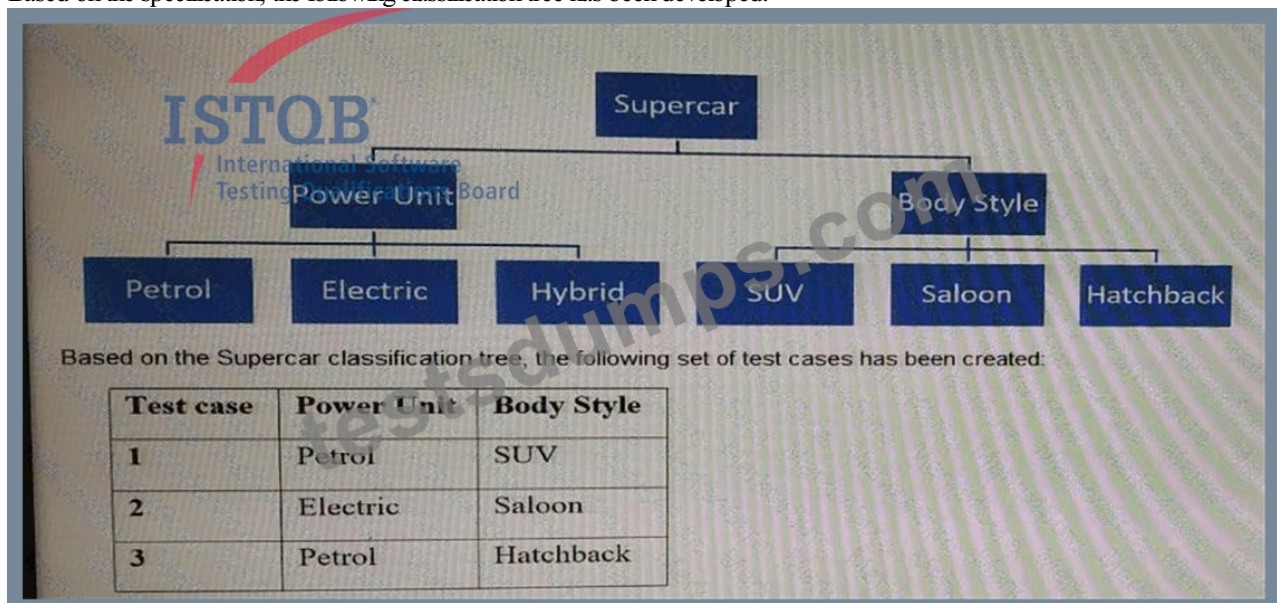

#### NEW QUESTION # 15

Supercar.

Supercar is an online vehicle sales website specializing in a single manufacturer's Sports Utility Vehicles (SUVs) and saloons. A vehicle has two key elements, power unit and body style. The manufacturer offers three choices of power unit: petrol, electric and hybrid. There are 3 main body styles: Saloon, Hatchback and SUV.

SUVs are available only as petrol and electric options. Hybrid is available for Hatchback only. The website will allow an order to be processed if the chosen vehicle configuration is in stock, otherwise a message will be displayed asking the user to try again later.

Based on the specification, the following classification tree has been developed:

Which test case is needed to complete the test set and achieve minimum class coverage?

- A. Power Unit: Hybrid Body Style: Saloon
- B. Power Unit: Electric Body Style: Hatchback
- C. Power Unit: Petrol Body Style: Saloon
- **D. Power Unit: Hybrid Body Style: Hatchback**

**Answer: D**

Explanation:

The test case D is needed to complete the test set and achieve minimum class coverage, based on the classification tree. A classification tree is a technique that shows the combinations of inputs and outputs for a given scenario using a graphical representation of classes and subclasses. Minimum class coverage is achieved when at least one representative of each class is tested. The classes for this scenario are:

- \* Power Unit: Petrol, Electric, Hybrid
- \* Body Style: Saloon, Hatchback, SUV

The test case D covers the class Power Unit Hybrid and the class Body Style Hatchback, which are not covered by any other test case. Verified References: [ISTQB Certified Tester Advanced Level Test Analyst CTAL-TA], Section 3.5.1, page 41.

#### NEW QUESTION # 16

You work for a software testing consultancy firm, SOFTEST, specializing in the travel industry. A project has started for a new cruise sector client to develop a new user interface allowing customers to search for cruises using several drop-down fields. The project uses a SCRUM methodology with 2-week sprints.

Which option below describes the BEST test techniques to apply for each project?

SELECT ONE OPTION

- A. Decision table testing and checklist-based testing
- B. Classification Tree (class combination coverage) and exploratory testing
- C. Pairwise and use case testing
- **D. Pairwise and exploratory testing**

**Answer: D**

Explanation:

Comprehensive and Detailed in Depth Explanation:

- \* The project has multiple drop-down fields with many values, resulting in numerous combinations.
  - \* Pairwise testing is ideal for testing combinations efficiently.
  - \* Since the project uses SCRUM methodology, it requires exploratory testing to accommodate changes and rapid feedback during sprints.
  - \* Use case testing (Option A) is not suitable since the focus is on combinations rather than functional sequences.
  - \* Decision table testing (Option B) would be less efficient due to the large number of combinations.
  - \* Classification Tree (Option C) is more suitable for class-based testing, not pairwise combinations.
- Thus, the correct answer is D (Pairwise and exploratory testing).

#### NEW QUESTION # 17

.....

The more times you choose us, the more discounts you may get. To make your whole experience more comfortable, we also provide considerate whole package services once you make decisions of our ISTQB-CTAL-TA test question. If you have any questions related to our ISTQB-CTAL-TA exam prep, pose them and our employees will help you as soon as possible. It is a mutual benefit job, that is why we put every exam candidates' goal above ours, and it is our sincere hope to make you success by the help of ISTQB-CTAL-TA Guide question and elude any kind of loss of you and harvest success effortlessly.
