New ISTQB ISTQB-CTAL-TA Exam Question & Reliable ISTQB-CTAL-TA Test Online

Our ISTQB-CTAL-TA exam simulation is accumulation of knowledge about the exam strictly based on the syllabus of the exam. They give users access to information and exam, offering simulative testing environment when you participate it like in the classroom. Besides, contents of ISTQB-CTAL-TA study guide are selected by experts which are appropriate for your practice in day-to-day life. It is especially advantageous for busy workers who lack of sufficient time to use for passing the ISTQB-CTAL-TA Preparation materials. And as the high pass rate of more than 98%, you will pass for sure with it.

ISTQB (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) Sample Questions (Q72-Q77):

NEW QUESTION # 72

You work for an insurance company that is running several parallel projects. You need to recommend the best approach for test case design for each project.

- * Project C: Previous releases had vague and inconsistent requirements. More formal reviews have been introduced to improve quality.
- * Project D: Emphasis on regression testing, with most test cases forming part of the regression pack, initially manual but planned for automation.

SELECT ONE OPTION

- A. Project C - High level test cases. Project D - High level test cases
- B. Project C - Low level test cases. Project D - High level test cases
- **C. Project C - High level test cases. Project D - Low level test cases**
- D. Project C - Low level test cases. Project D - Low level test cases

Answer: C

Explanation:

Comprehensive and Detailed in Depth Explanation:

- * Project C: Since the requirements are vague and inconsistent, creating high-level test cases is more suitable. High-level test cases are flexible and allow for interpretation, which is crucial when requirements are not clearly defined.
 - * Project D: Since the project aims for regression testing, low-level test cases are more appropriate. They are detailed and specific, essential for consistency during repeated manual or automated regression testing.
- Therefore, the correct answer is D (Project C - High level test cases. Project D - Low level test cases).

NEW QUESTION # 73

REQ1 a sun cancer warning system shall produce a daily score sheet based on the number of hours exposed to the sun and the intensity of sun radiation.

REQ2 The number of hours exposed to the sun shall be categorized in A (below 2), B (2 to 4 hours) or C (more than 4 hours)

REQ3 The intensity of sun radiation shall be labelled as low, medium, high, or extreme.

Based on the requirements stated above a Test Analyst has defined the following three test cases:

How many test conditions to be identified from requirements REQ2 and REQ3, are NOT covered by the three test cases:

	Hour exposed to the sun	Sun intensity
TC 1	1.5	Low
TC 2	6.0	Medium
TC 3	1.0	low

- **A. 0**
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

Four test conditions to be identified from requirements REQ2 and REQ3 are not covered by the three test cases. A test condition is an item or event of a component or system that could be verified by one or more test cases, such as a function, transaction, feature, quality attribute, or structural element. The test conditions to be identified from REQ2 and REQ3 are:

- * Number of hours exposed to the sun = A
- * Number of hours exposed to the sun = B
- * Number of hours exposed to the sun = C
- * Intensity of sun radiation = low
- * Intensity of sun radiation = medium
- * Intensity of sun radiation = high
- * Intensity of sun radiation = extreme

The test conditions that are not covered by the three test cases are:

- * Number of hours exposed to the sun = A
- * Intensity of sun radiation = low
- * Intensity of sun radiation = high
- * Intensity of sun radiation = extreme

NEW QUESTION # 74

A PIN entry component of an ATM system has been developed using the following state table:

	Insert Card	Enter Pin	Valid Pin	Invalid Pin
S1) Start State	S2	-	-	-
S2) Wait for PIN	-	S3	-	-
S3) 1st try	-	-	S6	S4
S4) 2nd try	-	-	S6	S5
S5) 3rd try	-	-	S6	S7
S6) Access account	-	-	-	-
S7) Eat card	-	-	-	-

Using the state transition test technique, how many 0-switch test cases are needed to achieve 100% 0-switch coverage?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

Eight 0-switch test cases are needed to achieve 100% 0-switch coverage. A state transition test technique is a technique that tests the behavior of a system or component based on its states and transitions between them. A

0-switch test case is a test case that covers one state and its associated actions and events. To achieve 100% 0-switch coverage, all states and their associated actions and events must be covered by at least one test case.

The states for this scenario are:

- * Enter PIN
- * PIN OK
- * PIN not OK
- * 1st try
- * 2nd try
- * 3rd try
- * Access to act
- * Eat card

NEW QUESTION # 75

What is the MOST important reason why test conditions should be understandable by business stakeholders?

- A. They should be able to use them as a basis for designing test cases.
- B. They should be able to use them to establish traceability to requirements
- C. They should be able to review the test conditions and provide feedback to the Test Analyst
- D. Test documentation should always be understandable by all stakeholders.

Answer: C

Explanation:

The most important reason why test conditions should be understandable by business stakeholders is that they should be able to review them and provide feedback to the Test Analyst, as they are the ones who know the business needs and expectations best. This way, the Test Analyst can ensure that the test conditions cover all the relevant aspects of the test basis and are aligned with the business objectives. The other reasons are not as important or not directly related to test conditions. Verified References: ISTQB Certified Tester Advanced Level Test Analyst CTAL-TA, Section 2.2.1, page 21.

NEW QUESTION # 76

Consider the following decision table:

	1	2	3	4	5	6	7	8
C1	1	1	1	1	0	0	0	0
C2	1	1	0	0	1	1	0	0
C3	1	0	1	0	1	0	1	0
A1	X	X						
A2	X							

This decision table has been created to test the following specification: Persons that study at a university (C1) and have parents whose total annual income is less than € 30.000 (C2), receive a scholarship. In addition to these qualifications, if they also live away from home (C3), they receive an addition to their scholarship (A2). How many cases are left when this decision table is collapsed?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

Two cases are left when this decision table is collapsed. A decision table is a technique that shows the combinations of conditions and actions for a given scenario. A decision table that is collapsed eliminates the combinations that are invalid or impossible, such as having a scholarship without meeting the qualifications.

The two valid cases for this scenario are:

* C1 = Y, C2 = Y, C3 = Y, A1 = Y, A2 = Y

* C1 = Y, C2 = Y, C3 = N, A1 = Y, A2 = N
