Enhance Your Success Rate with Test4Cram's ISTQB ISTQB-CTAL-TA Exam Dumps

Our ISTQB-CTAL-TA study materials are willing to stand by your side and provide attentive service, and to meet the majority of customers, we sincerely recommend our ISTQB-CTAL-TA practice guide to all customers, for our rich experience and excellent service are more than you can imagine. Here are several advantages of ISTQB-CTAL-TA training guide for your reference: we have free demos for you to download before payment, and we offer one year free updates of our ISTQB-CTAL-TA exam questions after payment and so on.

ISTQB (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) Sample Questions (Q37-Q42):

NEW QUESTION # 37

Ticket machines are to be installed at the train station of a major European airport to enable newly arriving passengers to quickly purchase their tram tickets.

You are testing this new application and the following Use Case has been provided:

USE CASE: Credit Card Purchase

* Use Case ID: UC-001401

* Purpose: To purchase a single ticket to the city center

* Actors: User

* Preconditions: Ticket machine is at the "select language" screen, user has a valid credit card

User Action	System Action
1. User selects 'French'	2. French language is displayed throughout, firstly on the 'select journey' screen
3. User accepts the suggested route	4. Journey details are displayed, with the price given
5. User proceeds to payment	6. Payment screen displayed
7. User selects 'credit card' and completes details	8. Payment is accepted, tickets are produced, and screen returns to 'select language' screen

You have been asked to review this Use Case. Which ONE of the following checklist items are TRUE and will pass?
SELECT ONE OPTION:

- A. Each path is testable
- B. All error messages are defined
- C. All alternate paths are identified
- **D. The main path is clearly defined**

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

- * A (All alternate paths are identified):Incorrect. The use case does not mention any alternate paths or exceptions.
- * B (All error messages are defined):Incorrect. There are no error message details provided.
- * C (Each path is testable):Incorrect. The absence of alternate paths makes this questionable.
- * D (The main path is clearly defined):Correct. The use case clearly outlines the main (happy) path from language selection to ticket purchase.

Therefore, the correct answer is D (The main path is clearly defined).

NEW QUESTION # 38

To enhance both the effectiveness and efficiency of the test design phase, the purchase of a test design tool is being considered. Which one of these statements best characterizes a test design tool?

- A. A test design tool enables tests to be executed automatically.
- B. A test design tool validates models of the software.
- **C. A test design tool generates test inputs from requirements**
- D. A test design tool enables individual tests to be traced to requirements

Answer: C

Explanation:

The statement that best characterizes a test design tool is that a test design tool generates test inputs from requirements. A test design tool is a tool that supports the test design activity by generating test inputs or test cases from a specified source, such as requirements, models, or code. A test design tool can use various techniques, such as equivalence partitioning, boundary value analysis, decision tables, state transition diagrams, etc., to generate test inputs or test cases. Verified References: [ISTQB Certified Tester Advanced Level Test Analyst CTAL-TA], Section 6.2.1, page 77.

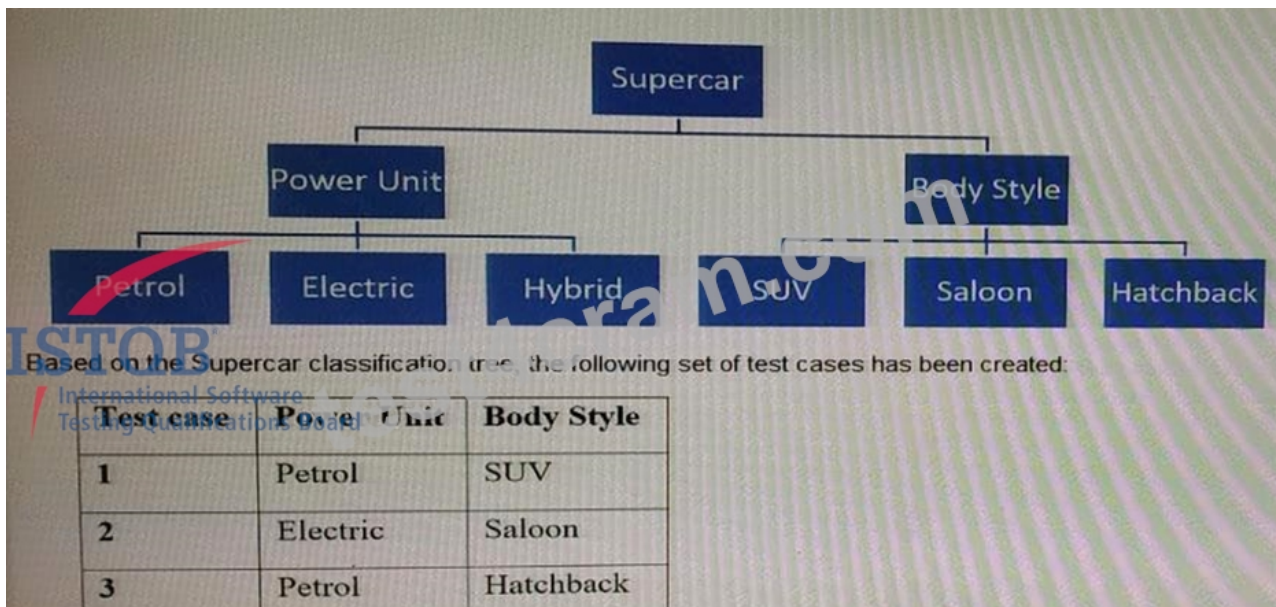

NEW QUESTION # 39

Supercar.

Supercar is an online vehicle sales website specializing in a single manufacturer's Sports Utility Vehicles (SUVs) and saloons. A vehicle has two key elements, power unit and body style. The manufacturer offers three choices of power unit: petrol, electric and hybrid. There are 3 main body styles: Saloon, Hatchback and SUV.

SUVs are available only as petrol and electric options. Hybrid is available for Hatchback only. The website will allow an order to be processed if the chosen vehicle configuration is in stock, otherwise a message will be displayed asking the user to try again later.

Based on the specification, the following classification tree has been developed:

Which test case is needed to complete the test set and achieve minimum class coverage?

- A. Power Unit Hybrid Body Style: Hatchback
- B. Power Unit: Hybrid Body Style: Saloon
- C. Power Unit: Electric Body Style: Hatchback
- D. Power Unit: Petrol Body Style: Saloon

Answer: A

Explanation:

The test case D is needed to complete the test set and achieve minimum class coverage, based on the classification tree. A classification tree is a technique that shows the combinations of inputs and outputs for a given scenario using a graphical representation of classes and subclasses. Minimum class coverage is achieved when at least one representative of each class is tested. The classes for this scenario are:

- * Power Unit: Petrol, Electric, Hybrid
- * Body Style: Saloon, Hatchback, SUV

The test case D covers the class Power Unit Hybrid and the class Body Style Hatchback, which are not covered by any other test case. Verified References: [ISTQB Certified Tester Advanced Level Test Analyst CTAL-TA], Section 3.5.1, page 41.

NEW QUESTION # 40

When would the Test Analyst's involvement in an Agile project normally start?

SELECT ONE OPTION

- A. As soon as the user stories have been signed-off
- B. At the beginning of the project
- C. At the beginning of the first iteration
- D. In parallel with coding for the first iteration

Answer: B

Explanation:

Comprehensive and Detailed in Depth Explanation:

In Agile projects, the Test Analyst's involvement typically starts at the beginning of the project.

* Test Analysts work collaboratively with developers, product owners, and other team members from the outset to ensure that testing is integrated into the development process.

* Option A (Beginning of the first iteration) is too late since planning and discussing test approaches begin earlier.

* Option B (After signing off user stories) contradicts the Agile principle of continuous involvement.

* Option C (In parallel with coding) also occurs too late since testing considerations should start during planning.

The correct answer is D (At the beginning of the project).

NEW QUESTION # 41

company in the medical domain has adopted methodical testing as its preferred test strategy. Before being able to release to the market, an external audit on the test process is mandatory. The test team consists of a mix of highly experienced domain-based testers and junior testers who only recently joined the company.

What is the BEST option regarding the level of detail and documentation required for test cases in the project?

- A. High-level test cases since this is consistent with the chosen test strategy
- **B. Low-level test cases since this will support both the external audit and the new junior testers.**
- C. High-level test cases since it will make the process more effective and it will make the best use of the knowledge and skills of the experienced domain testers.
- D. Low-level test cases since it will make the process more effective and it will make the best use of the knowledge and skills of the experienced domain testers.

Answer: B

Explanation:

Low-level test cases are the best option for this project, as they provide more detail and documentation that will support both the external audit and the new junior testers. The external audit will require evidence of how testing was performed and what results were obtained, which can be provided by low-level test cases. The new junior testers will benefit from having more guidance and instructions on how to execute the tests and what to expect as outcomes, which can also be provided by low-level test cases.
