Using ISTQB-CTFL exam prep is an important step for you to improve your soft power. I hope that you can spend a little time understanding what our study materials have to attract customers compared to other products in the industry. ISTQB-CTFL exam dumps have a higher pass rate than products in the same industry. If you want to pass ISTQB-CTFL Certification, then it is necessary to choose a product with a high pass rate. Our study materials guarantee the pass rate from professional knowledge, services, and flexible plan settings. According to user needs, ISTQB-CTFL exam prep provides everything possible to ensure their success.

As long as you enter the learning interface of our soft test engine of ISTQB-CTFL quiz guide and start practicing on our Windows software, you will find that there are many small buttons that are designed to better assist you in your learning. When you want to correct the answer after you finish learning, the correct answer for our ISTQB-CTFL Test Prep is below each question, and you can correct it based on the answer. In addition, we design small buttons, which can also show or hide the ISTQB-CTFL exam torrent, and you can flexibly and freely choose these two modes according to your habit.

## ISTQB-CTFL Test Passing Score, ISTQB-CTFL Latest Exam Pass4sure

Test your knowledge of the ISTQB-Foundation Level Exam (ISTQB-CTFL) exam dumps with Itcertkey ISTQB-Foundation Level Exam (ISTQB-CTFL) practice questions. The software is designed to help with ISTQB-Foundation Level Exam (ISTQB-CTFL) exam dumps preparation. ISTQB ISTQB-CTFL practice test software can be used on devices that range from mobile devices to desktop computers.

## ISTQB-Foundation Level Exam Sample Questions (Q100-Q105):

### NEW QUESTION # 100

Which ONE of the following work products TYPICALLY belongs to test execution?

- A. Test logs that document the results of test execution.
- B. A list of test conditions prioritized during test analysis.
- C. A test plan that describes the test strategy and test objectives.
- D. Automated test scripts used for test execution.

**Answer: A**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Test execution involves running test cases and documenting results. Test logs (A) provide evidence of executed tests, failures, and actual outcomes. Automated test scripts (B) are part of test implementation, test plans (C) belong to test planning, and test

conditions (D) are identified during test analysis.

#### NEW QUESTION # 101

Following a risk-based testing approach you have designed 10 tests to cover a product risk with a high-risk level. You want to estimate, adopting the three-point test estimation technique, the test effort required to reduce the risk level to zero by executing those 10 tests. You made the following three initial estimates:

- \* most optimistic = 6 person hours
- \* most likely = 30 person hours
- \* most pessimistic = 54 person hours

Based only on the given information, which of the following answers about the three-point test estimation technique applied to this problem is true?

- A. The final estimate is between 6 person hours and 54 person hours
- B. The final estimate is exactly 30 person hours because the technique uses the arithmetic mean of the three initial estimates as the final estimate
- C. The final estimate is exactly 30 person hours because the technique uses the initial most likely estimate as the final estimate
- **D. The final estimate is between 22 person hours and 38 person hours**

**Answer: D**

Explanation:

The three-point test estimation technique is a method of estimating the test effort based on three initial estimates: the most optimistic, the most likely, and the most pessimistic. The technique uses a weighted average of these three estimates to calculate the final estimate, which is also known as the expected value. The formula for the expected value is:

Expected value = (most optimistic + 4 \* most likely + most pessimistic) / 6 Using the given values, the expected value is:

Expected value =  $(6 + 4 * 30 + 54) / 6$  Expected value = 30 person hours However, the expected value is not the only factor to consider when estimating the test effort. The technique also calculates the standard deviation, which is a measure of the variability or uncertainty of the estimates.

The formula for the standard deviation is:

Standard deviation =  $(\text{most pessimistic} - \text{most optimistic}) / 6$

Using the given values, the standard deviation is:

Standard deviation =  $(54 - 6) / 6$  Standard deviation = 8 person hours

The standard deviation can be used to determine a range of possible values for the test effort, based on a certain level of confidence.

For example, using a 68% confidence level, the range is:

Expected value  $\pm$  standard deviation

Using the calculated values, the range is:

$30 \pm 8$  person hours

Therefore, the final estimate is between 22 person hours and 38 person hours, which is option A.

#### NEW QUESTION # 102

A test manager decided to skip static testing since he believes bugs can be found easily by doing dynamic testing. Was this decision right or wrong?

- A. The decision was right. Static testing is usually redundant if a product is planned to go through a full-cycle of dynamic testing.
- **B. The decision was wrong. Static testing can find defects early in the development process, reducing the overall cost of testing and development**
- C. The decision was wrong. Ensuring quality mandates that static testing is performed after performing the dynamic testing.
- D. The decision was right. Most of the bugs are easier to identify during the dynamic testing.

**Answer: B**

Explanation:

Static testing is a form of testing that does not involve executing the software or system under test. It includes activities such as reviews, inspections, walkthroughs, and analysis of documents, code, and models. Static testing can find defects early in the development process, before they become more expensive and difficult to fix in later stages. Static testing can also improve the quality of the software or system by preventing defects from being introduced in the first place. Static testing can complement

dynamic testing, which involves executing the software or system under test and checking the results against expected outcomes. Dynamic testing can find defects that static testing may miss, such as performance, usability, or integration issues. However, dynamic testing alone is not sufficient to ensure quality, as it may not cover all possible scenarios, inputs, or paths. Therefore, a test manager who decides to skip static testing is making a wrong decision, as he or she is ignoring the benefits of static testing and relying solely on dynamic testing, which may not be effective or efficient enough to find and prevent defects. ### NEW QUESTION # 103

A class grade application for instructors assigns letter grades based on students' numerical grades.

The letter grades for different numerical grades should be:

Above 89, up to 100 - A

Above 79, up to 89 \* B

Above 69, up to 79 \* C

Above 59, up to 69 - D

Below 60- F

Which of the following sets of test inputs would achieve the relatively highest equivalence partition coverage?

- A. 79, 89, 90, 99, 100
- B. 74, 79, 84, 85, 89
- **C. 69, 79, 80, 89, 90**
- D. 0, 58, 59, 70, 80

**Answer: C**

Explanation:

The set of test inputs that achieve the relatively highest equivalence partition coverage for grading students is option D: 69, 79, 80, 89, 90. This set effectively tests the boundaries between each grade category, ensuring that the grading system accurately transitions from one grade to another at the correct thresholds (ISTQB Main Web). ### NEW QUESTION # 104

Which of the following statements about test estimation approaches is CORRECT?

- A. Burndown charts used in Agile development is an example of the expert-based approach
- **B. The Wideband Delphi estimation technique is an example of the expert-based approach**
- C. The Wideband Delphi estimation technique is an example of the risk-based approach
- D. Burndown charts used in Agile development is an example of the risk-based approach

**Answer: B**

Explanation:

There are two main approaches to test estimation:

Expert-based approach:

The Wideband Delphi estimation technique is an example of this approach.

Involves consulting expert (ISTQB not-for-profit association) testing efforts.

This technique gathers estimates from multiple experts, discusses their differences, and achieves consensus.

Metrics-based approach:

Relies on historical data and metrics to predict future testing efforts.

According to the ISTQB Certified Tester Foundation Level (CTFL) v4.0 syllabus, the expert-based approach relies on experts' experience and knowledge, which aligns with the Wideband Delphi technique 【6 source】.

### NEW QUESTION # 105

.....

Through years of marketing, our ISTQB-CTFL latest certification guide has won the support of many customers. The most obvious data is that our products are gradually increasing each year, and it is a great effort to achieve such a huge success thanks to our product development. First of all, we have done a very good job in studying the updating of materials. In addition, the quality of our ISTQB-CTFL real ISTQB-CTFL study guide materials is strictly controlled by teachers. So, believe that we are the right choice, if you have any questions about our ISTQB-CTFL study materials, you can consult us.

**ISTQB-CTFL Test Passing Score:** [https://www.itcertkey.com/ISTQB-CTFL\\_braindumps.html](https://www.itcertkey.com/ISTQB-CTFL_braindumps.html)

Guarantee you pass your ISTQB-CTFL exam, Maybe you have less time and energy to prepare for the ISTQB-CTFL exam, Once you become our customers we provide you one-year free updates download and service warranty for our all ISTQB-CTFL dump collection, Our ISTQB-CTFL learning materials can assure you that you only need to spend twenty to thirty hours to pass the exam, ISTQB ISTQB-CTFL Best Preparation Materials You will get high mark followed by our materials.

You can also select the grouped objects by clicking the Object Thumbnail in the Layers panel, Now I can keep score along with the best, Guarantee you pass your ISTQB-CTFL Exam.

Maybe you have less time and energy to prepare for the ISTQB-CTFL exam, Once you become our customers we provide you one-year free updates download and service warranty for our all ISTQB-CTFL dump collection.

## Ace Your Exam with Itcertkey ISTQB ISTQB-CTFL Desktop Practice Test Software

Our ISTQB-CTFL learning materials can assure you that you only need to spend twenty to thirty hours to pass the exam, You will get high mark followed by our materials.
