

Itcertmaster EMC D-PVM-OE-01 Desktop Practice Exam Software

What's more, part of that Itcertmaster D-PVM-OE-01 dumps now are free: <https://drive.google.com/open?id=1biYKtIUuO-JOg7w8k-HD01q36CxcMAVH>

From the Itcertmaster platform, you will get the perfect match D-PVM-OE-01 actual test for study. D-PVM-OE-01 practice download pdf are researched and produced by Professional Certification Experts who are constantly using industry experience to produce precise, and logical EMC training material. D-PVM-OE-01 Study Material is constantly beginning revised and updated for relevance and accuracy. You will pass your real test with our accurate D-PVM-OE-01 practice questions and answers.

EMC D-PVM-OE-01 Exam Syllabus Topics:

Topic	Details
Topic 1	• Solutions Enabler 10 Implementation: This section of the exam measures the skills of Infrastructure Engineers and focuses on the fundamentals of Solutions Enabler. Candidates must understand its installation, upgrade processes, gatekeeper management, and daemon functions across different platforms. One crucial skill tested is managing Solutions Enabler daemons.
Topic 2	• Unisphere for PowerMax 10 Implementation and Administration: This section of the exam measures the skills of System Administrators and covers the implementation and management of Unisphere for PowerMax. Candidates must understand the installation process, post-installation tasks, and interface navigation to efficiently operate the platform. One key skill evaluated is setting up Unisphere for PowerMax.
Topic 3	• PowerMax Family Management in a Virtual Environment: This section of the exam measures the skills of Virtualization Engineers and evaluates the integration of PowerMax storage in virtualized environments. Candidates must understand VMware vSphere, the functionalities of Virtual Storage Integrator (VSI), and how to monitor virtualized workloads using Unisphere for PowerMax. One critical skill assessed is tracking virtual machine storage performance.
Topic 4	• PowerMax Family Monitoring and Workload Planning: This section of the exam measures the skills of Performance Analysts and focuses on monitoring storage environments and workload planning using Unisphere for PowerMax. Candidates must understand how to track performance metrics, detect issues, and optimize workloads to enhance storage efficiency. One key skill tested is monitoring storage health through Unisphere.

EMC D-PVM-OE-01 Discount: Dell Technologies PowerMax Operate - Itcertmaster Help you Pass Once

Once you have selected the D-PVM-OE-01 study materials, please add them to your cart. Then when you finish browsing our web pages, you can directly come to the shopping cart page and submit your orders of the D-PVM-OE-01 study materials. Our payment system will soon start to work. Then certain money will soon be deducted from your credit card to pay for the D-PVM-OE-01 study materials. The whole payment process only lasts a few seconds as long as there has money in your credit card. Then our system will soon deal with your orders according to the sequence of payment. Usually, you will receive the D-PVM-OE-01 Study Materials no more than five minutes. Then you can begin your new learning journey of our study materials. All in all, our payment system and delivery system are highly efficient.

EMC Dell Technologies PowerMax Operate Sample Questions (Q55-Q60):

NEW QUESTION # 55

What is the default size of a Gatekeeper on a PowerMax array1?

- A. 3 cylinder
- B. 3 KB
- C. 6 KB
- D. 6 cylinder

Answer: A

Explanation:

Step by Step Comprehensive Detailed Explanation:

A Gatekeeper in PowerMax is a small, dedicated device used for communication between the storage array and Solutions Enabler (SYMCLI), the command-line management interface. The default size of a Gatekeeper on a PowerMax array is 3 cylinders.

While the size can technically be specified in kilobytes (KB), the traditional and preferred unit for Gatekeeper size is cylinders. This is because cylinders represent a specific number of blocks on the physical disks, and using cylinders helps ensure consistent sizing across different disk types and configurations.

Why other options are incorrect:

* A. 3 KB, C. 6 KB: These sizes are too small to be practical for a Gatekeeper.

* D. 6 cylinder: While older VMAX models might have used 6 cylinders, the current default for PowerMax is 3 cylinders.

References and documents of Dell's public documentation for PowerMax Operate v.2:

* Dell Solutions Enabler 10.0.0 CLI User Guide: This guide provides information about Gatekeepers and their role in Solutions Enabler. While it might not explicitly state the default size, it mentions that Gatekeepers are typically small devices. You can find this document on the Dell Support website by searching for "Solutions Enabler CLI User Guide."

* Dell PowerMax Family: Essentials and Best Practices Guide: This guide might offer general information about Solutions Enabler and its configuration, which can provide context for understanding the purpose and sizing of Gatekeepers.

NEW QUESTION # 56

A company is setting up a multi-tenant environment where multiple departments share the same storage array with SID 1762. The IT department requires 2 TB of storage to be available on the ESXi1 host. Use

"ESXi1_SG" for the storage group name, create a port group with Dir- Ports "OR-1C:0 and OR-2C:0," and leave all other settings at their default.

Using the simulator, provision the storage required with a single volume using auto-provisioning groups.

Answer:

Explanation:

See the explanation for step by step solution.

Explanation:

We need to provision 2 TB of storage to the ESXi1 host on a PowerMax array (SID 1762) using Unisphere, in a multi-tenant environment. We'll use auto-provisioning with the following specifics:

- * Storage Group Name: ESXi1_SG
- * Port Group: (A new port group with Directors OR-1C:0 and OR-2C:0)
- * Volume Size: 2 TB (single volume)
- * Other Settings: Default

Here are the step-by-step instructions, tailored for the Unisphere simulator as described in the question:

Steps:

1. Launch the Simulator and Navigate to Storage Groups
 - * Open Unisphere for PowerMax in your web browser.
 - * You should already be logged in to the simulator, with the PowerMax array with SID 1762.
 - * In the left-hand navigation pane, click on Storage > Storage Groups.
2. Initiate Storage Group Creation
 - * Click the Create button (likely a plus "+" icon) in the Storage Groups section to start the Create Storage Group wizard.
3. Name the Storage Group
 - * In the "Create Storage Group" wizard:
 - * Storage Group Name: Enter ESXi1_SG.
 - * Enable FAST/Service Level: Do not check this option, as we are leaving all other settings at their default.
 - * Click Next or Continue (the exact wording might vary).
4. Add Volumes
 - * Ensure "Create new volumes" is selected.
 - * Number of Volumes: Enter 1.
 - * Volume Size:
 - * Enter 2.
 - * Select TB from the dropdown for the unit.
 - * Click Next.

5. Create the Port Group

* You should now be on the "Connectivity" or "Host" step, where you will add a new port group.

* Select "Create Port Group"

* Port Group Name: Give the new port group a name. You can use something descriptive like "ESXi1_PG," or any name that follows your organization's naming conventions.

* Select Ports:

* Find and select the following Directors and ports from the list of available ports:

* OR-1C:0

* OR-2C:0

* Note: The simulator may not allow you to highlight the exact director ports as in a production environment. It will likely display all directors and ports under the selected array. Just ensure they are selected as part of the port group.

* ClickNext.

6. Add host to the Masking View

* Select "Add Host"

* Select "Create New Host"

* Host Name: ESXi1

* Initiators: You don't have specific initiators to add in this simulation, so you can skip this part or add any from the available options. This is because we are working within a simulated environment.

* ClickNext

7. Review and Create

* You'll be presented with a summary page that shows:

* Storage Group: ESXi1_SG

* Volume: 1 x 2 TB volume

* Port Group: (The new port group you created with OR-1C:0 and OR-2C:0)

* Host: ESXi1

* Carefully review all the settings to make sure they are correct.

* ClickRun NoworFinish(or similar wording) to create the storage group, volume, port group, and masking view.

8. Verification (Optional)

* After the operation completes, you can verify the results:

* Go back to theStorage Groupslist. You should see the ESXi1_SG storage group.

* Click on ESXi1_SG to view its details. You should see the 2 TB volume and the associated host (ESXi1) and port group.

* You can also navigate toHosts>Port Groupsto verify that the new port group was created correctly.

* Finally, you can navigate toHosts>Masking Viewsto verify that a masking view was created correctly.

NEW QUESTION # 57

An RDF group on a VMAX3 array is being replicated in SRDF/A mode to a remote VMAX3 array To accommodate application growth a new R1 device needs to be added to the RDF group SRDF/A consistency of the existing devices in the RDF group should be maintained when the new device is added.

What is the correct sequence of steps for adding the new R1 device and making it available for application use?

Answer:

Explanation:

NEW QUESTION # 58

A host is connected to two PowerMax arrays with SRDF/Metro Host I/Os cannot be delivered across the SRDF link. The devices in the SRDF group have been forced into a Not Ready state to the host Which attribute is set on the SRDF group to cause this behavior?

- A. Local Auto Link Recovery
- B. Local Link Domino
- C. Limbo Period
- D. Update After Resume Link

Answer: A

NEW QUESTION # 59

When is the Unisphere Lockbox password required?

- A. Upgrading Unisphere for PowerMax
- B. Logging into Unisphere for PowerMax
- C. Performing administration tasks
- D. Creating performance charts

Answer: A

NEW QUESTION # 60

.....

The study system of our company will provide all customers with the best study materials. If you buy the D-PVM-OE-01 latest questions of our company, you will have the right to enjoy all the D-PVM-OE-01 certification training materials from our company. More importantly, there are a lot of experts in our company; the first duty of these experts is to update the study system of our company day and night for all customers. By updating the study system of the D-PVM-OE-01 Training Materials, we can guarantee that our company can provide the newest information about the D-PVM-OE-01 exam for all people.
