To retrieve all Outlook emails with the word "UiPath" in the subject, a developer should use the Filter property and the filter schema "@SQL=""urn:schemas:httpmail:subject"" like "%UiPath%". The Filter property allows developers to specify a DASL query that filters the emails based on various criteria, such as subject, sender, date, etc. The filter schema "@SQL=""urn:schemas:httpmail:subject"" like "%UiPath%" uses the SQL dialect of DASL to search for emails that have the word "UiPath" anywhere in the subject.
