The main thing for you is to take IT certification exam that is accepted commonly which will help you to open a new journey. And you must be familiar with Juniper JN0-105 Certification test. To obtain the certificate will help you to find a better job. What? Do you have no confidence to take the exam? It doesn't matter that you can use our ITdumpsfree dumps.

## Juniper JN0-105 Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                                                                            |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"><li>Networking Fundamentals: The topic networking fundamentals covers identifying the concepts and functionality of different fundamental elements of networking.</li></ul>                                                                                      |
| Topic 2 | <ul style="list-style-type: none"><li>Routing Policy and Firewall Filters: The topic of Routing Policy and Firewall Filters covers routing policy and firewall filters on Junos devices. Furthermore, the topic also deals with routing policies and firewall filters on a Junos device.</li></ul> |
| Topic 3 | <ul style="list-style-type: none"><li>Routing Fundamentals: This topic discusses pointing out basic routing concepts or functionality for Junos devices. Moreover, the topic also describes configuring or monitoring basic routing elements for a Junos device.</li></ul>                         |
| Topic 4 | <ul style="list-style-type: none"><li>Configuration Basics: Identification of the main elements for configuring Junos devices is discussed in this topic. Moreover, it describes configuring basic components of a Junos device</li></ul>                                                          |
| Topic 5 | <ul style="list-style-type: none"><li>User Interfaces: This topic delves into identifying the concepts, operation, or functionality of the Junos user interface.</li></ul>                                                                                                                         |
| Topic 6 | <ul style="list-style-type: none"><li>Operational Monitoring and Maintenance: Different methods of monitoring or maintaining Junos devices are identified in this topic. Lastly, it discusses monitoring or maintenance procedures for a Junos device.</li></ul>                                   |

## Pass Guaranteed 2025 Juniper Authoritative JN0-105 Practice Mock

Though our JN0-105 study guide has three formats which can meet your different needs, PDF version, software version and online version, i love the PDF version to the best. If you choose the PDF version, you can download our JN0-105 exam material and print it for studying everywhere. And you can take notes on them as long as any new thoughts come to you. If a new version of the JN0-105 learning guide comes out, we will send you a new link to your E-mail box and you can download it again.

### Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q75-Q80):

#### NEW QUESTION # 75

By default, how does the PFE manage unicast traffic destined for an existing forwarding table entry?

- A. It sends the traffic through multiple ports toward its destination.
- **B. It sends the traffic through one port toward its destination.**
- C. It sends the traffic through the fxpl interface to the RE.
- D. It sends all traffic to the control plane for further processing.

**Answer: B**

Explanation:

In a Juniper Networks device, the Packet Forwarding Engine (PFE) processes unicast traffic by forwarding it according to the existing entries in the forwarding table. When the PFE encounters unicast traffic destined for an address that has a corresponding entry in the forwarding table, it directs the traffic through a specific outgoing interface or port toward its destination. This process is based on the most efficient path determined by the routing protocols in use, ensuring that the packet reaches its intended destination through a singular path, unless specific configurations such as load balancing are in place.

#### NEW QUESTION # 76

Exhibit

Exhibit

[edit]

```
root# set system host-name TEST_DEVICE [edit]
```

```
root# commit
```

[edit]

'system'

Missing mandatory statement: 'root-authentication' error: commit failed: (missing mandatory statements) [edit] root# You are configuring a new device.

Which action solves the error shown in the exhibit?

- A. configuring a non-root username and password
- B. reinstalling Junos
- **C. configuring a password for the root account**
- D. loading the factory-default configuration

**Answer: C**

Explanation:

The error message in the exhibit indicates that the root-authentication statement is missing, which is mandatory for committing the configuration. In Junos OS, it is required to set a password for the root account to commit any configuration changes. This is a security measure to ensure that unauthorized users cannot access the device's configuration mode. To solve the error shown in the exhibit, configuring a password for the root account is necessary. This can be done by using the set system root-authentication plain-text-password command, after which the user will be prompted to enter a new password for the root account.

#### NEW QUESTION # 77

Which two fields are you required to enter when you create a new user account? (Choose two.)

- A. username
- B. login class
- C. full name
- D. user ID

**Answer: A,B**

Explanation:

In Junos OS, when creating a new user account, the minimum required fields are the username and the login class. The username is the identifier for the account, while the login class specifies the level of access or permissions the user has on the device. Login classes allow for the differentiation between various roles, such as read-only access or full administrative rights. Other information, such as full name or user ID, is optional and not strictly necessary for the creation of a functional user account.

#### NEW QUESTION # 78

Which command modifier would you use to see all possible completions for a specific command?

- A. extensive
- B. |
- C. ?
- D. detail

**Answer: C**

Explanation:

In Junos OS, the ? command modifier is used to display all possible completions for a specific command. This helps users understand the available options and syntax for a command they are trying to use.

#### NEW QUESTION # 79

Which command displays all IPv6 routes in the default routing instance?

- A. show route table inet6.0
- B. show route table inet.0
- C. show route table inet.1
- D. show route table inet6.1

**Answer: A**

Explanation:

In Junos OS, the command to display IPv6 routes in the default routing instance is show route table inet6.0.

The routing table inet6.0 specifically holds IPv6 routes. The command show route table inet.0 is used for IPv4 routes, and inet6.1 or inet.1 (assuming inet.1 is a typo for inet.1) are not standard Junos routing tables for displaying IPv6 routes in the default routing instance.

#### NEW QUESTION # 80

.....

Our JN0-105 learning materials not only provide you with information, but also for you to develop the most suitable for your learning schedule, this is tailor-made for you, according to the timetable to study and review. I believe you can improve efficiency. Our JN0-105 exam prep will give you a complete after-sales experience. You can consult online no matter what problems you encounter. You can get help anywhere, anytime in our JN0-105 test material. JN0-105 test questions have very high quality services in addition to their high quality and efficiency.
