

JN0-1103 Actual Test - JN0-1103 Test Questions & JN0-1103 Exam Torrent

BONUS!!! Download part of ActualTestsQuiz JN0-1103 dumps for free: https://drive.google.com/open?id=1MAeV2aRBMgcBAhn_oUCarHz5sl5ZXbxD

Our company employs the first-rate expert team which is superior to others both at home and abroad. Our experts team includes the experts who develop and research the JN0-1103 study materials for many years and enjoy the great fame among the industry, the senior lecturers who boost plenty of experiences in the information about the exam and published authors who have done a deep research of the JN0-1103 Study Materials and whose articles are highly authorized. They provide strong backing to the compiling of the JN0-1103 study materials and reliable exam materials resources. They compile each answer and question carefully.

Juniper JN0-1103 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Campus and Branch LAN Design: This section of the exam measures skills of LAN Infrastructure Specialists and covers considerations for designing wired campus or branch LANs. It addresses best practices in campus LAN design, modular design approaches, subnet and VLAN planning, and access control mechanisms. The section also introduces Ethernet VPN-Virtual Extensible LAN (EVPN-VXLAN) architectures and discusses campus oversubscription ratios and design architectures.
Topic 2	<ul style="list-style-type: none">• Securing the Network: This section of the exam measures the skills of Security Architects and covers essential security design principles. It encompasses general security considerations, strategies for securing data centers and campus WANs, and the implementation of zero-trust security models. Additionally, it delves into Secure Access Service Edge (SASE) frameworks to enhance network security posture.
Topic 3	<ul style="list-style-type: none">• Data Center Network Design: This section of the exam measures skills of Data Center Network Engineers and covers considerations for general data center network design. Topics include data center design best practices, understanding traffic patterns, virtual chassis implementation, and environmental considerations. The section also delves into data center fabric architectures, benefits of IP fabric over traditional architectures, spine-and-leaf device placement, underlay and overlay design, routing protocol selection, and best practices for IP fabric scaling.
Topic 4	<ul style="list-style-type: none">• Campus and Branch WAN Design: This section of the exam measures skills of WAN Solutions Architects and covers considerations for designing campus or branch WANs. It includes understanding WAN connectivity functions, best practices for WAN design, performance optimization, VPN design, and implementing high availability through active<ul style="list-style-type: none">• active and active• passive configurations. The section also explores Software-Defined WAN (SD-WAN) design considerations, devices, assurance models, and intersite connectivity.

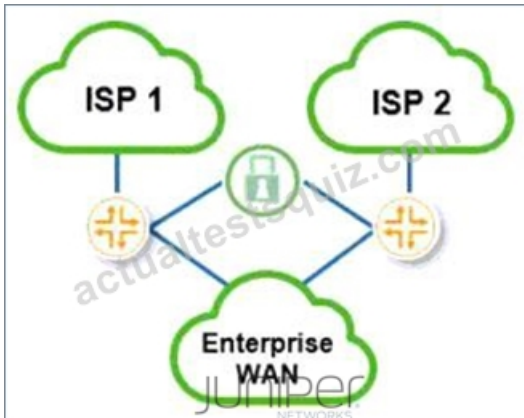

New Juniper JN0-1103 Dumps Ppt - New JN0-1103 Test Bootcamp

If you possess a certificate, it can help you enter a better company and improve your salary. JN0-1103 exam braindumps of us will help you obtain your certificate successfully. We are a professional certificate exam materials provider, and we have rich experiences in offering high-quality exam materials. In addition, we have a professional team to collect and research the latest information for JN0-1103 Exam Dumps. We offer you free update for 365 days, so that you can obtain the latest information for the exam. And the latest version for JN0-1103 exam braindumps will be sent to your email automatically.

Juniper Design - Associate (JNCIA-Design) Sample Questions (Q148-Q153):

NEW QUESTION # 148

Click the Exhibit button.

Which WAN function is shown in the exhibit?

- A. private WAN
- B. Data Center Interconnect
- C. Internet edge
- D. WAN aggregation

Answer: C

Explanation:

The diagram shows an enterprise WAN connected to two different ISPs through edge routers, with security elements in place. This configuration is characteristic of an Internet edge design, where the enterprise network interfaces with external service providers, providing redundancy and secure access to the internet.

NEW QUESTION # 149

Why would you recommend Junos Space Security Director in a network design?

- A. It provides the power to quickly design, provision, and deliver MPLS and other Ethernet services.
- B. It simplifies Ethernet switch deployments and provides rapid operation of campus and data center networks.
- C. It provides detection, isolation, and resolution of network faults and incidents.
- D. It helps administrators to more quickly and intuitively manage all phases of a security policy life cycle

Answer: D

NEW QUESTION # 150

Which two pieces of information should be included in an RFP response? (Choose two.)

- A. design details including information about the devices, protocols, and technologies included in the proposed design
- B. a list of contributing material including technical publications, training guides, and courseware used to build the proposed design

- C. a network topology including a high-level logical design as well as low-level physical design of the proposed network
- D. configuration details including proposed devices, protocols, and technologies included in the proposed design

Answer: A,C

NEW QUESTION # 151

In which two instances should you use Postman as part of network automation? (Choose two.)

- A. to receive real-time updates from a device without polling
- B. to perform prototyping of API requests
- C. to write custom scripts in the Python programming language
- D. to connect network infrastructure with cloud applications

Answer: B,D

Explanation:

Postman is commonly used to prototype API requests, making it ideal for testing and verifying network APIs before automation scripts are developed. It also helps in connecting network infrastructure to cloud applications by crafting and sending REST API calls to interact with cloud-based services and platforms.

NEW QUESTION # 152

Which three categories should the collected data be sorted into during the data analysis phase? (Choose three.)

- A. customer data
- B. personal data
- C. project boundaries
- D. Industry standards
- E. customer requirements

Answer: C,D,E

Explanation:

Modularity in network design allows for easier scalability, troubleshooting, and future upgrades by segmenting the network into functional blocks. This approach simplifies management and enhances the network's ability to adapt to changing requirements.

NEW QUESTION # 153

.....

We stick to the principle "Credit management first and first class service". While purchasing our JN0-1103 exam questions, not only you have no need to worry about the quality of our JN0-1103 exam materials quality but also our service is satisfying on the JN0-1103 study guide. We promise buyers "Pass Guaranteed" and we only offer the latest JN0-1103 Training Materials. If you would like to choose safely high passing rate of JN0-1103 exam torrent materials, our JN0-1103 learning guide will be the first choice for you.
