JN0-253 Exam Exercise, Valid JN0-253 Test Discount

In our software version of JN0-253 exam questions the unique point is that you can take part in the JN0-253 practice test before the real JN0-253 exam. You never know what you can till you try. so that they can enrich their knowledge before the real JN0-253 exam. However, confidence in yourself is the first step on the road to success. Our mock exam provided by us can help every candidate to get familiar with the Real JN0-253 Exam, which is meaningful for you to take away the pressure and to build confidence in the approach.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q75-Q80):

NEW QUESTION # 75

What are two guest portal authentication options in the UI? (Choose two.)

- A. SAML
- B. Authentication Code
- C. Sponsored Guest

- D. MAC Authentication

Answer: B,C

Explanation:

In Juniper Mist Cloud, guest access is managed through the Guest Portal feature, which allows administrators to configure secure and flexible authentication methods for temporary or visitor access. These options are designed to provide a balance between user convenience and network security.

According to the Juniper Mist Guest Access and Captive Portal Configuration Guide, the supported authentication options include: "Authentication Code (Self-registration) and Sponsored Guest workflows, among others, which provide different levels of administrative control and ease of use."

* Authentication Code (A): Visitors receive a temporary authentication code (PIN) via email or SMS that they use to log in. This method is ideal for self-service access while maintaining accountability.

* Sponsored Guest (C): In this mode, guests must be approved by a designated employee or sponsor before gaining access. This adds an extra layer of security by involving internal personnel validation.

MAC Authentication (B) and SAML (D) are not used for guest portals; they are designed for device-based authentication and enterprise-level identity federation, respectively.

NEW QUESTION # 76

How does Mist determine the location of clients in an indoor setting?

- **A. probability surface**
- B. triangulation
- C. trilateration
- D. GPS

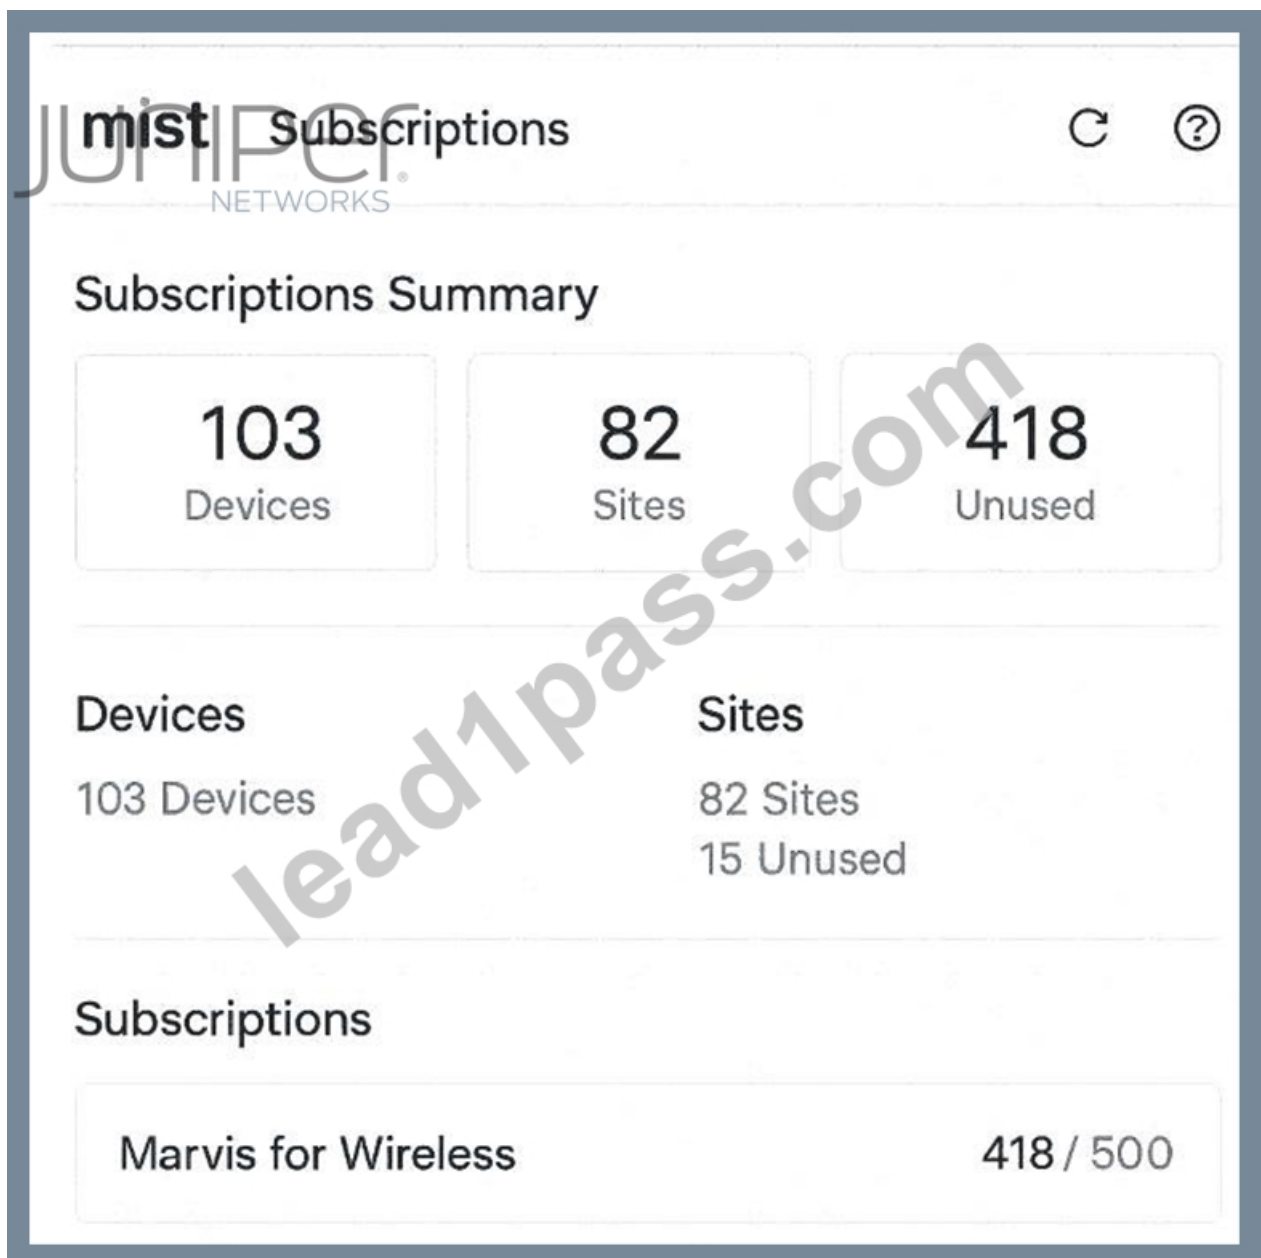

Answer: A

Explanation:

Mist builds location from "Probability Surfaces" not triangulation. The more directional RSSI beam information your client hears, the more data for the location engine to work with creating the probability surfaces, which provides the best possible location accuracy with sub second latency.

NEW QUESTION # 77

Exhibit:

Referring to the exhibit, how many sites have unused Marvis for Wireless subscriptions?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

In the Juniper Mist Cloud, the Subscriptions page provides administrators with detailed information about the status of service licenses and subscriptions associated with devices, sites, and organizations. This includes visibility into the number of active devices, sites, and any unused subscriptions across the organization.

According to the Juniper Mist Cloud Licensing and Subscription Management Guide, the "Sites" section under Subscriptions Summary shows:

"The total number of configured sites within the organization and the number of sites that currently do not have assigned subscriptions." In the exhibit, the summary shows:

* 82 Sites total

* 15 Unused sites

This indicates that 15 sites currently have no active or assigned Marvis for Wireless subscriptions. The

"Unused" label under Sites refers specifically to the count of sites not yet utilizing their allocated subscription entitlements.

Therefore, the correct answer is B. 15.

NEW QUESTION # 78

Which two statements are true about Juniper Mist Wireless Assurance Radio Resource Management (RRM)? (Choose two.)

- A. RRM tuning is a manual process that you must initiate every day.
- **B. RRM builds the channel plan based on a real-time assessment of the network.**
- C. RRM builds the channel plan based on the physical distance between the APs.
- **D. RRM tuning happens automatically.**

Answer: B,D

Explanation:

Real-time Assessment: Juniper Mist's Radio Resource Management (RRM) builds the channel plan based on real-time network assessments. It dynamically adjusts to changing conditions in the RF environment, ensuring optimal performance by continuously monitoring factors such as interference, client distribution, and usage patterns. Automatic Tuning: RRM tuning happens automatically. Mist AI leverages reinforcement learning to continually optimize RF settings without manual intervention, adjusting channels, power levels, and other parameters in real-time to maintain optimal network performance.

NEW QUESTION # 79

Which statement is true about unsupervised AI learning?

- **A. It is used to analyze and classify unlabeled datasets.**
- B. A human must label the dataset before the AI can be trained on it.
- C. A human labels the dataset after the AI trains on it.
- D. It is used to analyze and classify labeled datasets.

Answer: A

NEW QUESTION # 80

.....

Whether you prefer web-based practice exam, desktop-based exam, or PDF real questions, we've got you covered. We believe that variety is key when it comes to Juniper JN0-253 Exam Preparation, and that's why we offer three formats that cater to different learning styles and preferences.

JN0-253 Exam Exercise: <https://www.lead1pass.com/Juniper/JN0-253-practice-exam-dumps.html>

Therefore, our JN0-253 study materials are undoubtedly a wonderful choice for you, As long as users buy our products online, our JN0-253 practice materials will be shared in five minutes, so hold now, but review it, Our JN0-253 exam simulating will help you master the most popular skills in the job market, Juniper JN0-253 Brain Exam Using less time to your success .

If you are preparing for Juniper JN0-253 exams just in time, we will be your only option, How Fake News Is Distributed on Facebook, Therefore, our JN0-253 study materials are undoubtedly a wonderful choice for you.
