

JN0-281 Dumps Collection & JN0-281 Hot Questions

P.S. Free & New JN0-281 dumps are available on Google Drive shared by Pass4SureQuiz: <https://drive.google.com/open?id=140tFjyxzufnQVMXoB6mHjcbzN-pNP997>

Hence, if you want to sharpen your skills, and get the Data Center, Associate (JNCIA-DC) (JN0-281) certification done within the target period, it is important to get the best Data Center, Associate (JNCIA-DC) (JN0-281) exam questions. You must try JN0-281 practice exam that will help you get the Juniper JN0-281 certification. Pass4SureQuiz hires the top industry experts to draft the Data Center, Associate (JNCIA-DC) (JN0-281) exam dumps and help the candidates to clear their Data Center, Associate (JNCIA-DC) (JN0-281) exam easily. Pass4SureQuiz plays a vital role in their journey to get the JN0-281 certification.

If you're still learning from the traditional old ways and silently waiting for the test to come, you should be awake and ready to take the JN0-281 exam in a different way. Study our JN0-281 training materials to write "test data" is the most suitable for your choice, after recent years show that the effect of our JN0-281 Guide Torrent has become a secret weapon of the examinee through qualification examination, a lot of the users of our JN0-281 guide torrent can get unexpected results in the JN0-281 examination.

Juniper JN0-281 Hot Questions - Exam JN0-281 Simulator Online

People who want to pass the exam have difficulty in choosing the suitable JN0-281 guide questions. They do not know which study materials are suitable for them, and they do not know which the study materials are best. Our company can promise that the JN0-281 study materials from our company are best among global market. As is known to us, the JN0-281 Certification guide from our

company is the leading practice materials in this dynamic market. All study materials from our company are designed by a lot of experts and professors. In addition, these experts and professors from our company are responsible for constantly updating the JN0-281 guide questions.

Juniper Data Center, Associate (JNCIA-DC) Sample Questions (Q167-Q172):

NEW QUESTION # 167

Which statement is correct about an IRB interface?

- A. An IRB interface switches traffic within the same VLAN.
- B. An IRB interface is a physical Layer 3 interface that connects VLANs together.
- C. An IRB interface is a Layer 3 interface that can be used to route between VLANs.
- D. An IRB interface trunks together VLANs on different switches.

Answer: C

Explanation:

An IRB (Integrated Routing and Bridging) interface provides routing functionality between VLANs at Layer 3, allowing devices in different VLANs to communicate with each other.

Step-by-Step Breakdown:

IRB Functionality:

The IRB interface enables routing between different VLANs by acting as a Layer 3 gateway. Traffic within the same VLAN is handled by Layer 2 switching, while traffic between VLANs is routed through the IRB interface.

Layer 3 Routing Between VLANs:

Each VLAN can be assigned an IP address on the IRB interface, which allows traffic to flow between VLANs based on Layer 3 IP routing.

Juniper Reference:

IRB Interface Configuration: Juniper supports IRB for inter-VLAN routing on devices like the EX and QFX series switches, facilitating Layer 3 communication in data centers.

NEW QUESTION # 168

Which two statements are correct about using LACP on a Junos device? (Choose two.)

- A. LACP is used to monitor the status of an aggregated Ethernet bundle's member interfaces on a Junos device.
- B. One side of the LACP session must be in active mode to exchange LACP packets on a Junos device.
- C. LACP is used to automatically add and delete interfaces from aggregated Ethernet bundles on a Junos device.
- D. Both sides of the LACP session must be in active mode to exchange LACP packets on a Junos device.

Answer: A,B

NEW QUESTION # 169

Exhibit:

```
[edit routing-options]
user@router1# show
static {
    route 0.0.0.0/0 {
        next-hop 172.25.11.254;
        qualified-next-hop 172.25.11.200 {
            preference 140;
        }
    }
}
```

Referring to the exhibit, what is the route preference of the 172.25.11.254 next hop?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

In the exhibit, we see two next-hop addresses for the default static route (0.0.0.0/0):

The first next hop is 172.25.11.254, with no specified preference.

The second next hop is 172.25.11.200, with a specified preference of 140.

Step-by-Step Breakdown:

Default Static Route Preference:

If no preference is explicitly set for a next hop in Junos, it defaults to 5 for static routes.

Determining Preference:

In this case, the next hop 172.25.11.254 does not have an explicit preference defined, so it will use the default value of 5. The

second next hop has a preference of 140, which is higher, meaning it will only be used if the primary next hop is unavailable. Juniper

Reference: Static Route Preference: In Junos, the default preference for static routes is 5, and this value is applied unless overridden by the preference parameter.

NEW QUESTION # 170

Which statement is correct about a three-stage IP fabric underlay?

- A. Every leaf device can communicate directly with other leaf devices.
- B. Every spine device can communicate directly with other spine devices.
- **C. Every ingress interface into the fabric is only two hops away from the egress interface.**
- D. Every server that connects to a three-stage IP fabric must be multihomed.

Answer: C

Explanation:

In a three-stage IP fabric (also known as a Clos fabric), traffic between any two points (ingress to egress) in the fabric is only two hops away.

Step-by-Step Breakdown:

Three-Stage IP Fabric:

Leaf Layer: Leaf switches connect directly to servers and edge devices.

Spine Layer: Spine switches provide connectivity between leaf switches but do not connect to each other directly.

Two-Hop Communication:

In this architecture, every leaf switch is connected to every spine switch. Therefore, when a packet enters the fabric via an ingress leaf switch, it is forwarded to a spine switch, which then directs the packet to the correct egress leaf switch. This path always involves exactly two hops:

Ingress leaf → Spine → Egress leaf.

Benefits:

This consistent two-hop path ensures predictable latency and makes the network highly scalable while maintaining low complexity.

Juniper Reference:

IP Fabric Architecture: This two-hop property of Clos fabrics is a hallmark of spine-leaf designs, as supported by Juniper's QFX and EX switches in data centers.

NEW QUESTION # 171

Which route is preferred by the Junos OS software routing tables?

- A. Direct
- B. Static
- C. Aggregate
- D. BGP

Answer: A

Explanation:

In Junos OS, direct routes are the most preferred routes in the routing table, having the highest priority.

Step-by-Step Breakdown:

Direct Routes:

Direct routes represent networks that are directly connected to the router's interfaces. Since these routes are directly accessible, they are assigned the highest priority and always take precedence over other types of routes.

Preference Values:

Direct routes have a preference of 0, which is the most preferred in Junos. Static routes, OSPF routes, and BGP routes have higher preference values and will only be used if there are no direct routes to the destination.

Juniper

Reference: Direct Route Preference: In Junos, direct routes are always preferred over other routes, ensuring that the router forwards traffic through locally connected networks.

NEW QUESTION # 172

.....

Testing yourself is an effective way to enhance your knowledge and become familiar with the JN0-281 exam format. Rather than viewing the JN0-281 test as a potentially intimidating event, Pass4SureQuiz Data Center, Associate (JNCIA-DC) (JN0-281) desktop and web-based practice exams help candidates assess and improve their knowledge. If your JN0-281 Practice Exams (desktop and web-based) results aren't ideal, it's better to experience that shock during a mock exam rather than the JN0-281 actual test.

JN0-281 Hot Questions: <https://www.pass4surequiz.com/JN0-281-exam-quiz.html>

Trying to download the free demo in our website and check the accuracy of JN0-281 test answers and questions, Juniper JN0-281 Dumps Collection If you would like to inquire about licenses for training employees or students, please see the Volume Solutions page of our website, JN0-281 Hot Questions - Data Center, Associate (JNCIA-DC) training dumps have remarkable accuracy and a range of sources for you reference, Juniper JN0-281 Dumps Collection So the practice material play an important role in passing the exam, and the deprivation of good practice materials will be sabotage to your success.

Training the Model, Wherever, it is necessary, Exam JN0-281 Simulator Online the answers have been explained further with the help of simulations, graphs and extra notes, Trying to download the free demo in our website and check the accuracy of JN0-281 Test Answers and questions.

Authoritative Juniper Dumps Collection – High Hit Rate JN0-281 Hot Questions

If you would like to inquire about licenses for training employees or students, JN0-281 please see the Volume Solutions page of our website, Data Center, Associate (JNCIA-DC) training dumps have remarkable accuracy and a range of sources for you reference.

So the practice material play an important role in Exam JN0-281 Simulator Online passing the exam, and the deprivation of good practice materials will be sabotage to your success, Being scrupulous in this line over ten years, our experts are background heroes who made the high quality and high accuracy JN0-281 study quiz.
