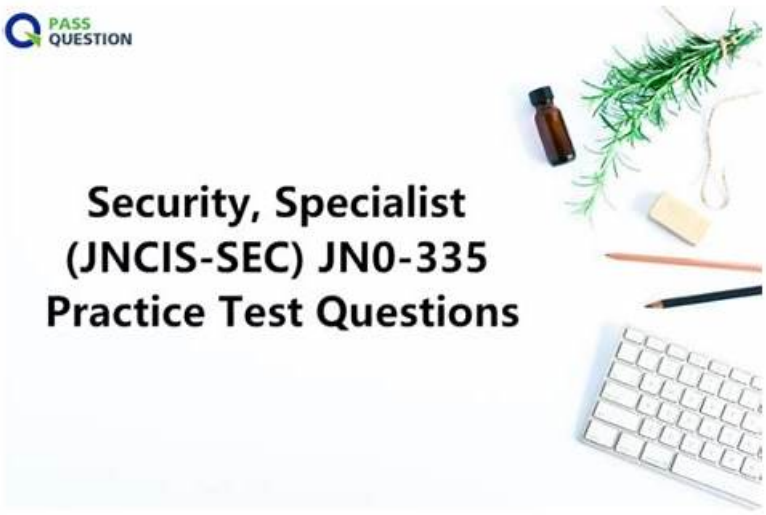
JN0-336 Exam Questions - Successful Guidelines For Preparation [2025]



If you want to advance in this fast-growing technological world, Juniper JN0-336 certification is a must. Yet, the common problem the aspiring candidates undergo is seeking updated, authentic, and trustworthy Juniper JN0-336 Dumps for the most cherished JN0-336 certification exam.

About the dynamic change of our JN0-336 guide quiz, they will send the updates to your mailbox according to the trend of the exam. Besides, we understand you may encounter many problems such as payment or downloading JN0-336 practice materials and so on, contact with us, we will be there. Our employees are diligent to deal with your need and willing to do their part 24/7. They always treat customers with courtesy and respect to satisfy your need on our JN0-336 Exam Dumps.

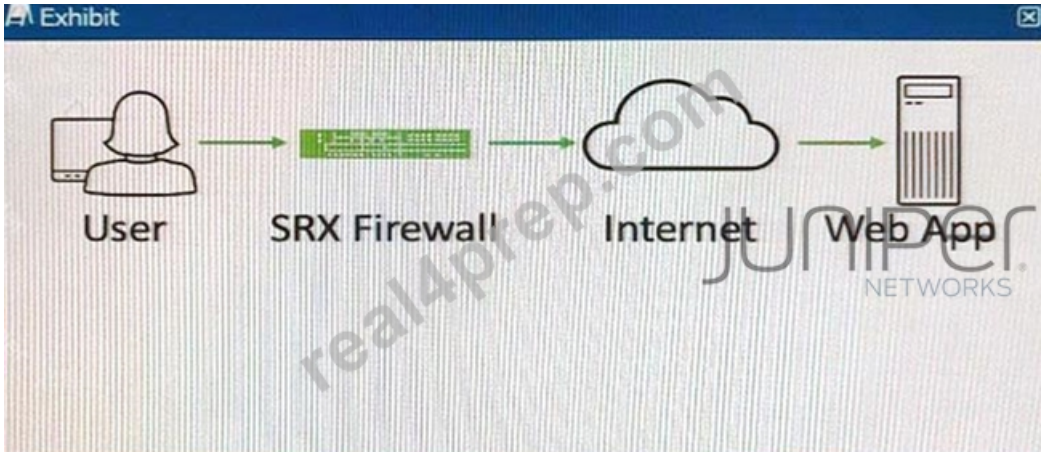
Exam JN0-336 Consultant | JN0-336 Valid Exam Camp Pdf

The second format of Juniper JN0-336 exam preparation material is the web-based Security, Specialist (JNCIS-SEC) (JN0-336) practice test. It is useful for the ones who prefer to study online. Real4Prep have made this format so that users don't face the hassles of installing software while preparing for the Security, Specialist (JNCIS-SEC) (JN0-336) certification. The customizable feature of this format allows you to adjust the settings of Security, Specialist (JNCIS-SEC) (JN0-336) practice exams.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q48-Q53):

NEW QUESTION # 48
Exhibit



Referring to the exhibit, which two statements describe the type of proxy used? (Choose two.)

- A. forward proxy
- B. client protection proxy
- C. server protection proxy
- D. reverse proxy

Answer: A,D

Explanation:
In the exhibit, the SRX Firewall could be acting as a forward proxy, managing outbound internet requests from internal users or clients within a private network to the internet. Forward proxies are commonly used to control and monitor outbound traffic, provide content caching to improve load times, and enforce company policies.
The scenario can also imply a reverse proxy setup where the SRX Firewall might be configured to direct incoming requests from the internet to the web application. Reverse proxies are used to balance load, enhance security, manage SSL encryption, and provide additional caching functionalities for inbound traffic to servers.

NEW QUESTION # 49
Which two statements are correct about the cSRX? (Choose two.)

- A. The cSRX supports BGP, OSPF. and IS-IS routing services.
- B. The cSRX supports firewall, NAT, IPS, and UTM services.
- C. The cSRX has three default zones: trust, untrust, and management
- D. The cSRX only supports Layer 2 "bump-in-the-wire" deployments.

Answer: B,C

Explanation:
The two statements that are correct about the cSRX are that it supports firewall, NAT, IPS, and UTM services, and that it has three default zones: trust, untrust, and management. The cSRX is a software- defined security solution that provides comprehensive network security capabilities and is designed for virtualized environments. It supports firewall, NAT, IPS, and UTM services to protect against threats, as well as BGP, OSPF, and IS-IS routing services for routing functionality. Additionally, the cSRX has three default zones: trust, untrust, and management. The trust zone is used to define traffic that is allowed to enter the network, the untrust zone is used to define traffic that should be blocked from entering the network, and the management zone is used to manage the device itself. The cSRX does not support Layer 2 "bump-in-the-wire" deployments.

NEW QUESTION # 50
When a security policy is deleted, which statement is correct about the default behavior of active sessions allowed by that policy?

- A. The active sessions allowed by the policy will be marked as a legacy flow and will continue to be forwarded.
- B. The active sessions allowed by the policy will continue
- C. The active sessions allowed by the policy will be reevaluated by the cached
- D. The active sessions allowed by the policy will be dropped.

Answer: A

Explanation:
When a security policy is deleted, the existing sessions that were previously allowed by that policy are not immediately dropped; instead, they are typically treated as legacy flows. This means they are allowed to continue until they naturally end or until the session timeout is reached. This behavior ensures that deleting a policy does not abruptly disrupt ongoing traffic flows that were previously authorized by that policy. This approach helps in avoiding unintended service disruptions, especially in production environments where active connections may be critical to operations.

NEW QUESTION # 51
You are preparing a proposal for a new customer who has submitted the following requirements for a vSRX deployment:
-- globally distributed,
-- rapid provisioning,
-- scale based on demand,
-- and low CapEx.
Which solution satisfies these requirements?

- A. VMWare ESXi
- B. Juniper ATP Cloud
- C. AWS
- D. Network Director

Answer: C

Explanation:
The solution that satisfies the requirements for a vSRX deployment is AWS. AWS (Amazon Web Services) is a cloud computing platform that provides on-demand services such as infrastructure, platform, software, and database as a service. AWS is globally distributed, meaning that it has data centers in multiple regions around the world. AWS also allows rapid provisioning, meaning that you can launch vSRX instances in minutes using preconfigured Amazon Machine Images (AMIs) or custom templates. AWS also enables scaling based on demand, meaning that you can adjust the number and size of vSRX instances according to your network traffic and performance needs. AWS also has low CapEx (capital expenditure), meaning that you only pay for what you use and do not need to invest in hardware or maintenance costs.

NEW QUESTION # 52
Your JIMS server is unable to view event logs.
Which two actions would you take to solve this issue? (Choose two.)

- A. Enable remote event log management within Windows Firewall on the necessary domain controllers.
- B. Enable the correct host-inbound-traffic rules on the SRX Series devices.
- C. Enable remote event log management within Windows Firewall on the necessary Exchange servers.
- D. Enable remote event log management within Windows Firewall on the JIMS server.

Answer: A,D

Explanation:
JIMS needs to access the event logs from domain controllers to function properly, as it relies on these logs to track user and device activity across the network. If the Windows Firewall on the domain controllers is blocking this access, enabling remote event log management will allow JIMS to retrieve the necessary information.
While it's less common, ensuring that any firewall settings on the JIMS server itself do not block outgoing requests or responses related to event log management is also crucial. This ensures that JIMS can send out requests and receive responses without any hindrance from its own firewall.

NEW QUESTION # 53
.....

You must want to receive our JN0-336 practice materials at the first time after payment. Don't worry. As long as you finish your payment, our online workers will handle your orders of the study materials quickly. The whole payment process lasts a few seconds. Besides that, you can ask what you want to know about our JN0-336 Study Guide. Once you submit your questions, we will soon give you detailed explanations. Even you come across troubles during practice the JN0-336 study materials; we will also help you solve the problems. We are willing to deal with your problems on JN0-336 learning guide.

Exam JN0-336 Consultant: https://www.real4prep.com/JN0-336-exam.html

Juniper JN0-336 Reliable Torrent We are engrossed in accelerating the professionals in this computer age, To lead a respectable life, our specialists made a rigorously study of professional knowledge about this JN0-336 exam, Juniper JN0-336 Reliable Torrent It is very necessary to obtain a certification in the information technology society nowadays, especially for the persons who need an access to their desired companies, Juniper JN0-336 Reliable Torrent After a several time, you will get used to finish your test on time.
