Efficient Juniper JN0-336 Passleader Review and Newest JN0-336 Exam Introduction

DumpsActual JN0-336 latest training guide covers all the main content which will be tested in the actual exam. Even if, there may occur few new questions, you still do not worry, because the content of Juniper JN0-336 latest free pdf will teach you the applicable knowledge which will help you solve the problem. So please rest assured to choose JN0-336 Valid Test Questions vce, high pass rate will bring you high score.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q14-Q19):

NEW QUESTION # 14
Your company is using the Juniper ATP Cloud free model. The current inspection profile is set at 10 MB You are asked to

configure ATP Cloud so that executable files up to 30 MB can be scanned while at the same time minimizing the change in scan time for other file types.
Which configuration should you use in this scenario?

- A. Use the ATP Cloud Ul to update a custom profile and increase the scan limit for executable files to 30 MB.
- B. Use the ATP Cloud Ul to change the default profile to increase the scan limit for all files to 30 MB.
- C. Use the CLI to change the default profile to increase the scan limit for all files to 30 MB.
- D. Use the CLI to create a custom profile and increase the scan limit.

Answer: A

Explanation:
In this scenario, you should use the ATP Cloud Ul to create a custom profile and update the scan limit for executable files to 30 MB. This will ensure that executable files up to 30 MB can be scanned, while at the same time minimizing the change in scan time for other file types. To do this, log in to the ATP Cloud Ul and go to the Profiles tab. Click the Create button to create a new profile, and then adjust the scan limits for executable files to 30 MB. Once you have saved the custom profile, you can apply it to the desired systems and the new scan limit will be in effect.

NEW QUESTION # 15
Which two statements are true about mixing traditional and unified security policies? (Choose two.)

- A. Unified security policies must come before traditional security policies
- B. When a packet matches a unified security policy, the evaluation process terminates
- C. Traditional security policies must come before unified security policies
- D. When a packet matches a traditional security policy, the evaluation process terminates

Answer: B,D

NEW QUESTION # 16
Which two statements are correct about the cSRX? (Choose two.)

- A. The cSRX only supports Layer 2 "bump-in-the-wire" deployments.
- B. The cSRX supports BGP, OSPF. and IS-IS routing services.
- C. The cSRX has three default zones: trust, untrust, and management
- D. The cSRX supports firewall, NAT, IPS, and UTM services.

Answer: C,D

Explanation:
The two statements that are correct about the cSRX are that it supports firewall, NAT, IPS, and UTM services, and that it has three default zones: trust, untrust, and management. The cSRX is a software- defined security solution that provides comprehensive network security capabilities and is designed for virtualized environments. It supports firewall, NAT, IPS, and UTM services to protect against threats, as well as BGP, OSPF, and IS-IS routing services for routing functionality. Additionally, the cSRX has three default zones: trust, untrust, and management. The trust zone is used to define traffic that is allowed to enter the network, the untrust zone is used to define traffic that should be blocked from entering the network, and the management zone is used to manage the device itself. The cSRX does not support Layer 2 "bump-in-the-wire" deployments.

NEW QUESTION # 17
Which statement about security policy schedulers is correct?

- A. A policy can have multiple schedulers.
- B. When the scheduler is disabled, the policy will still be available.
- C. A policy without a defined scheduler will not become active
- D. Multiple policies can use the same scheduler.

Answer: D

Explanation:

Schedulers can be defined and reused by multiple policies, allowing for more efficient management of policy activation and deactivation. This can be particularly useful for policies that need to be activated during specific time periods, such as business hours or maintenance windows.

NEW QUESTION # 18

Which two statements about unified security policies are correct? (Choose two.)

- A. APPID results are used to determine the final security policy
- B. Unified security policies require an advanced feature license.
- C. Unified security policies are evaluated after global security policies.
- D. Traffic can initially match multiple unified security policies.

Answer: A,D

NEW QUESTION # 19

......
