

JN0-336 Practice Engine, JN0-336 Valid Test Book

JNCIA JN0-104 Practice Test Questions and Answers 2023 with complete solution

Three statements that describe Transmission Control Protocol?

- Uses a best effort delivery approach
- had delivery notification and error-checking mechanisms
- applications include HTTP and SMTP
- TCP is faster than User Datagram Protocol (UDP)
- TCP is a transport layer protocol - has delivery notification and error-checking, applications include HTTP and SMTP
- TCP is transport layer protocol

Two benefits of the disaggregated JUNOS OS?

- A-The Junos VM becomes hardware-independent and can be deployed on any hypervisor without modifications.
- B-Platform drivers and forwarding engine are removed from the control plane to increase performance.
- C-Increased flexibility to use different control plane versions
- D-The architecture facilitates programmability through provisioning the control plane, the data path and the platform API - B and D

Describes the connection between control plane and forwarding plane

- No rate limiter is configured by default
 - control traffic is preferred over exception traffic during congestion
 - A rate limiter is configured by default
 - Exception traffic is preferred over control traffic during congestion - Control traffic is preferred, a rate-limiter is configured by default
- The JUNOS OS sends all exception traffic destined for the RE over the internal link that connects the control and forwarding plane. The JUNOS OS rate limits the exception traffic traversing the internal link to protect the RE from DOS attacks. During congestion preference is given to local and control traffic destined for the RE

A packet enters a JUNOS device. No matching destination entry exists in the forwarding table. How will the device respond? - The PFE responds to the source with a destination unreachable message. The PFE, not the RE

Two examples of transit traffic:

- A-SCP traffic destined for the router's loopback interface
- B-SFTP traffic that enters and exits the same interface on a local router
- C-SCP traffic that enters one interface and exits another on a local router

Our JN0-336 Test Braindumps are by no means limited to only one group of people. Whether you are trying this exam for the first time or have extensive experience in taking exams, our JN0-336 latest exam torrent can satisfy you. This is due to the fact that our JN0-336 test braindumps are humanized designed and express complex information in an easy-to-understand language. You will never have language barriers, and the learning process is very easy for you. What are you waiting for? If you are preparing to take the test, you can rely on our learning materials. You will also be the next beneficiary. After you get Juniper certification, you can get boosted and high salary to enjoy a good life.

CramPDF Juniper JN0-336 pdf questions have been marked as the topmost source for the preparation of JN0-336 new questions by industry experts. These questions cover every topic in the exam, and they have been verified by Juniper professionals. Moreover, you can download the Security, Specialist (JNCIS-SEC) (JN0-336) pdf questions demo to get a better analysis of the exam. By practicing with these questions, you can assess your preparation for the Juniper JN0-336 new questions.

JN0-336 Valid Test Book - JN0-336 Dumps Download

Our JN0-336 learning guide allows you to study anytime, anywhere. If you are concerned that your study time cannot be guaranteed, then our JN0-336 learning guide is your best choice because it allows you to learn from time to time and make full use of all the time available for learning. Our JN0-336 learning guide is for the world and users are very extensive. In order to give users a better experience, we have been constantly improving. The high quality and efficiency of JN0-336 Test Guide has been recognized by users. The high passing rate of JN0-336 exam training is its biggest feature. As long as you use JN0-336 test guide, you can

certainly harvest what you want thing.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q46-Q51):

NEW QUESTION # 46

You are experiencing excessive packet loss on one of your two WAN links route traffic from the degraded link to the working link. Which AppSecure component would you use to accomplish this task?

- A. AppFW
- B. AppQoS
- C. APBR
- D. AppQoE

Answer: C

Explanation:

APBR (Application Path-Based Routing) is an AppSecure component which can be used to route traffic from the degraded link to the working link in order to reduce packet loss. APBR is a policy-based routing solution that allows you to configure rules to direct traffic to the most appropriate path, based on application, user, or network metrics.

NEW QUESTION # 47

You are implementing an SRX Series device at a branch office that has low bandwidth and also uses a cloud-based VoIP solution with an outbound policy that permits all traffic.

Which service would you implement at your edge device to prioritize VoIP traffic in this scenario?

- A. AppFW
- B. AppQoS
- C. SIP ALG
- D. AppQoE

Answer: B

Explanation:

The service that you would implement at your edge device to prioritize VoIP traffic in this scenario is AppQoS. AppQoS is a feature that enables you to allocate bandwidth and prioritize traffic based on application signatures or custom rules. AppQoS can enhance the quality of service and experience for critical or latency-sensitive applications, such as VoIP. You can configure AppQoS policies to assign different classes of service (CoS) values or queue numbers to different applications or traffic flows. You can also define bandwidth limits, guarantees, or bursts for each class or queue. Reference: = [Application Quality of Service Overview], [Configuring Application Quality of Service]

NEW QUESTION # 48

Which two statements are true about mixing traditional and unified security policies? (Choose two.)

- A. When a packet matches a traditional security policy, the evaluation process terminates
- B. Traditional security policies must come before unified security policies
- C. Unified security policies must come before traditional security policies
- D. When a packet matches a unified security policy, the evaluation process terminates

Answer: A,D

NEW QUESTION # 49

Your manager asks you to provide firewall and NAT services in a private cloud.

Which two solutions will fulfill the minimum requirements for this deployment? (Choose two.)

- A. a vSRX for firewall services and a separate vSRX for NAT services
- B. a single vSRX
- C. a single cSRX

- D. a cSRX for firewall services and a separate cSRX for NAT services

Answer: B,C

Explanation:

A single vSRX instance is capable of handling both firewall and NAT services simultaneously. This solution provides a streamlined and resource-efficient way to secure and manage network traffic within a private cloud environment.

Similar to the vSRX, a single cSRX can also provide both firewall and NAT services. The cSRX, being a containerized version of the SRX, is particularly suited for environments where high density and microservices architectures are used, offering high performance in a compact form factor.

NEW QUESTION # 50

You want to use IPS signatures to monitor traffic.

Which module in the AppSecure suite will help in this task?

- **A. AppFW**
- B. AppTrack
- C. APPID
- D. AppQoS

Answer: A

Explanation:

The AppFW module in the AppSecure suite provides IPS signatures that can be used to monitor traffic and detect malicious activities. AppFW also provides other security controls such as Web application firewall, URL filtering, and application-level visibility.

NEW QUESTION # 51

.....

This age changes quickly, so we can't be passively, we should be actively to follow the age. When you choose to participate in JN0-336 exam, you are proved to be an active person who wants better development opportunities for yourself. Our CramPDF is willing to help those active people like you to achieve their goals. The most comprehensive and Latest JN0-336 Exam Materials provided by us can meet all your need to prepare for JN0-336 exam.
