

JN0-336 Test Discount Voucher, JN0-336 Valid Dumps

Do you want to try our free demo of the JN0-336 study questions? Your answer must be yes. So just open our websites in your computer. You will have easy access to all kinds of free trials of the JN0-336 practice materials. You can apply for many types of JN0-336 Exam simulation at the same time. Once our system receives your application, it will soon send you what you need. Please ensure you have submitted the right email address. And you will have the demos to check them out.

Are you still worried about not able to pass JN0-336 exam certification? Then you can ask TestKingIT for help. It can bring you the master of the sophisticated techniques of IT industry and help you pass JN0-336 certification exam easily. With TestKingIT's efforts for years, the passing rate of JN0-336 Certification Exam has reached as high as 100%. Choosing TestKingIT is to choose the way to go to a beautiful future.

Free PDF 2025 Juniper Trustable JN0-336: Security, Specialist (JNCIS-SEC) Test Discount Voucher

What is the measure of competence? Of course, most companies will judge your level according to the number of qualifications you have obtained. It may not be comprehensive, but passing the qualifying exam is a pretty straightforward way to hire an employer. Our JN0-336 exam practice questions on the market this recruitment phenomenon, tailored for the user the fast pass the JN0-336 examination method of study. The quality of our JN0-336 learning guide is absolutely superior, which can be reflected from the annual high pass rate of our JN0-336 exam questions.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q65-Q70):

NEW QUESTION # 65

You are troubleshooting unexpected issues on your JIMS server due to out of order event log timestamps. Which action should you take to solve this issue?

- A. Enable time synchronization on the client devices.
- B. Enable time synchronization on the JIMS server.
- C. Enable time synchronization on the SRX Series devices.
- **D. Enable time synchronization on the domain controllers.**

Answer: D

Explanation:

To solve the issue of out of order event log timestamps on your JIMS server, you should enable time synchronization on the domain controllers. JIMS (Juniper Identity Management Service) is a Windows service that collects user, device, and group information from Active Directory domains or syslog sources and provides it to SRX Series devices and CSO for identity-based security policies. JIMS relies on the timestamps of the event logs generated by the domain controllers to track user logins, logouts, and IP address changes. If the domain controllers have different or inaccurate clocks, the event logs may have out of order or incorrect timestamps, which can cause JIMS to miss or misinterpret some events and affect its accuracy and performance. Therefore, you should ensure that all the domain controllers in your network are synchronized with a reliable time source, such as an NTP server or a Windows Time service. Reference: = Juniper Identity Management Service User Guide, Juniper Identity Management Service Feature Guide, Configure JIMS Collector to Get Microsoft Event Logs, Considerations for timestamps in centralized logging platforms

NEW QUESTION # 66

What information does encrypted traffic insights (ETI) use to notify SRX Series devices about known malware sites?

- A. dynamic address groups
- B. MAC addresses
- **C. domain names**
- D. certificates

Answer: C

Explanation:

Encrypted traffic insights (ETI) uses domain names to notify SRX Series devices about known malware sites. ETI is a feature of the SRX Series firewall that can detect and block malware that is hidden in encrypted traffic. It works by analyzing the domain names of the websites that the encrypted traffic is attempting to access. If the domain name matches a known malware site, ETI will send an alert to the SRX Series device, which can then take appropriate action to block the traffic. ETI is a useful tool for protecting against threats that attempt to evade detection by hiding in encrypted traffic.

NEW QUESTION # 67

Which sequence does an SRX Series device use when implementing stateful session security policies using Layer 3 routes?

- A. An SRX Series device conducts an ALG security check on the longest-match route before performing a security policy search.
- **B. An SRX Series device will conduct a longest-match Layer 3 route table lookup before performing a security policy search.**
- C. An SRX Series device will perform a security policy search before conducting a longest-match Layer 3 route table lookup.
- D. An SRX Series device performs a security policy search before implementing an ALG security check on the longest-match Layer 3 route.

Answer: B

Explanation:

The sequence that an SRX Series device uses when implementing stateful session security policies using Layer 3 routes is: An SRX Series device will conduct a longest-match Layer 3 route table lookup before performing a security policy search: When an SRX Series device receives a packet, it first looks up the destination IP address in the routing table and finds the longest matching route to forward the packet. Then, it performs a security policy search based on the source zone, destination zone, source address,

destination address, protocol, and application of the packet. If there is a matching policy that allows the packet, it creates or updates a session entry for the packet and applies any security services configured in the policy.

NEW QUESTION # 68

Which solution enables you to create security policies that include user and group information?

- A. Network Director
- B. ATP Appliance
- C. JIMS
- D. NETCONF

Answer: C

Explanation:

The solution that enables you to create security policies that include user and group information is JIMS (Juniper Identity Management Service). JIMS collects and maintains a large database of user, device, and group information from Active Directory domains or syslog sources, and enables SRX Series devices to rapidly identify thousands of users in a large, distributed enterprise. With JIMS, you can create security policies that include user and group information, and enforce user-based access control policies to protect network resources.

NEW QUESTION # 69

Which two statements are correct about the fab interface in a chassis cluster? (Choose two.)

- A. In an active/active configuration, inter-chassis transit traffic is sent over the fab interface.
- B. Heartbeat signals sent on the fab interface monitor the health of the control plane link.
- C. The fab interface enables configuration synchronization.
- D. Real-time objects (RTOs) are exchanged on the fab interface to maintain session synchronization.

Answer: A,D

Explanation:

The fab interface is a fabric link that connects the two nodes in a chassis cluster. A chassis cluster is a high-availability feature that groups two identical SRX Series devices into a cluster that acts as a single device.

The fab interface has two functions:

Real-time objects (RTOs) are exchanged on the fab interface to maintain session synchronization: RTOs are data structures that store information about active sessions, such as source and destination IP addresses, ports, protocols, and security policies. RTOs are exchanged between the nodes on the fab interface to ensure that both nodes have the same session information and can take over the traffic in case of a failover.

In an active/active configuration, inter-chassis transit traffic is sent over the fab interface: In an active/active configuration, both nodes in a cluster can process traffic for different redundancy groups (RGs). RGs are collections of interfaces or services that fail over together from one node to another. If traffic needs to transit from one RG to another RG that is active on a different node, it is sent over the fab interface.

NEW QUESTION # 70

.....

Nowadays the test JN0-336 certificate is more and more important because if you pass JN0-336 exam you will improve your abilities and your stocks of knowledge in some certain area and find a good job with high pay. If you buy our JN0-336 exam materials you can pass the JN0-336 Exam easily and successfully. We have data proved that our JN0-336 exam material has the high pass rate of 99% to 100%, if you study with our JN0-336 training questions, you will pass the JN0-336 exam for sure.
