

JN0-336 Test Engine Version & New JN0-336 Test Vce

After the client pay successfully they could receive the mails about JN0-336 guide questions our system sends by which you can download our test bank and use our JN0-336 study materials in 5-10 minutes. The mail provides the links and after the client click on them the client can log in and gain the JN0-336 Study Materials to learn. The procedures are simple and save clients' time. For the client the time is limited and very important and our JN0-336 learning guide satisfies the client's needs to download and use our JN0-336 practice engine immediately.

We assure that you can not only purchase high-quality JN0-336 prep guide but also gain great courage & trust from us. A lot of online education platform resources need to be provided by the user registration to use after purchase, but it is simple on our website. We provide free demo of JN0-336 Guide Torrent, you can download any time without registering. Fast delivery—after payment you can receive our JN0-336 exam torrent no more than 10 minutes, so that you can learn fast and efficiently. What are you waiting for? Just come and buy our JN0-336 exam questions!

Pass Guaranteed Quiz Juniper - JN0-336 - Useful Security, Specialist (JNCIS-SEC) Test Engine Version

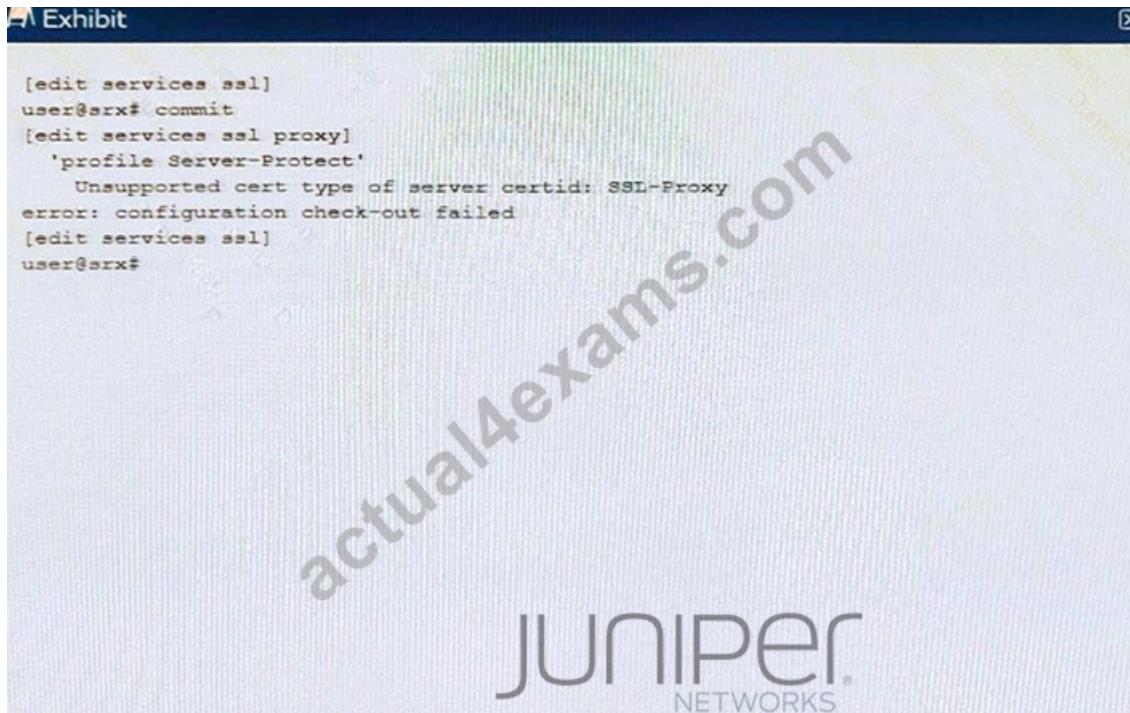

If you think you can face unique challenges in your career, you should pass the Juniper JN0-336 exam. Actual4Exams is a site that comprehensively understand the Juniper JN0-336 exam. Using our exclusive online Juniper JN0-336 exam questions and answers, will become very easy to pass the exam. Actual4Exams guarantee 100% success. Actual4Exams is recognized as the leader of a professional certification exam, it provides the most comprehensive certification standard industry training methods. You will find that Actual4Exams Juniper JN0-336 Exam Questions And Answers are most thorough and the most accurate questions on the market

and up-to-date practice test. When you have Actual4Exams Juniper JN0-336 questions and answers, it will allow you to have confidence in passing the exam the first time.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q68-Q73):

NEW QUESTION # 68

Exhibit

When trying to set up a server protection SSL proxy, you receive the error shown. What are two reasons for this error? (Choose two.)

- A. The SSL proxy certificate ID is part of a blacklist.
- B. The SSL proxy certificate ID does not exist.
- C. The SSL proxy certificate ID does not have the correct renegotiation option set.
- D. The SSL proxy certificate ID is for a forwarding proxy.

Answer: B,C

Explanation:

The error message shown in the exhibit regarding the SSL proxy setup indicates an issue with the type of server certificate being used. The error explicitly states, "Unsupported cert type of server certid." Here are two plausible reasons for this error based on the options provided:

Option B. The SSL proxy certificate ID does not have the correct renegotiation option set.

This option points to a configuration issue related to the properties or capabilities of the certificate, such as renegotiation, which if not set correctly according to the expected requirements of the SSL proxy, might lead to the certificate being unsupported. Renegotiation settings are critical in ensuring secure connections, and mismatches in configuration can result in errors.

Option D. The SSL proxy certificate ID does not exist.

If the certificate ID being referred to in the SSL proxy profile does not exist in the device's certificate store or is incorrectly referenced, the system will be unable to apply the configuration, leading to an error during the commit operation. This situation would typically result in an error indicating that the system can't find or recognize the specified certificate ID.

NEW QUESTION # 69

Which two sources are used by Juniper Identity Management Service (JIMS) for collecting username and device IP addresses? (Choose two.)

- A. Microsoft Exchange Server event logs
- B. DNS
- C. Active Directory domain controller event logs

- D. OpenLDAP service ports

Answer: B,C

Explanation:

Juniper Identity Management Service (JIMS) collects username and device IP addresses from both DNS and Active Directory domain controller event logs. DNS is used to resolve hostnames to IP addresses, while Active Directory domain controller event logs are used to get information about user accounts, such as when they last logged in.

NEW QUESTION # 70

Which statement regarding Juniper Identity Management Service (JIMS) domain PC probes is true?

- A. JIMS domain PC probes are triggered if no username to IP address mapping is found in the domain security event log.
- B. JIMS domain PC probes analyze domain controller security event logs at 60-minute intervals by default.
- C. JIMS domain PC probes are triggered to map usernames to group membership information.
- D. JIMS domain PC probes are initiated by an SRX Series device to verify authentication table information.

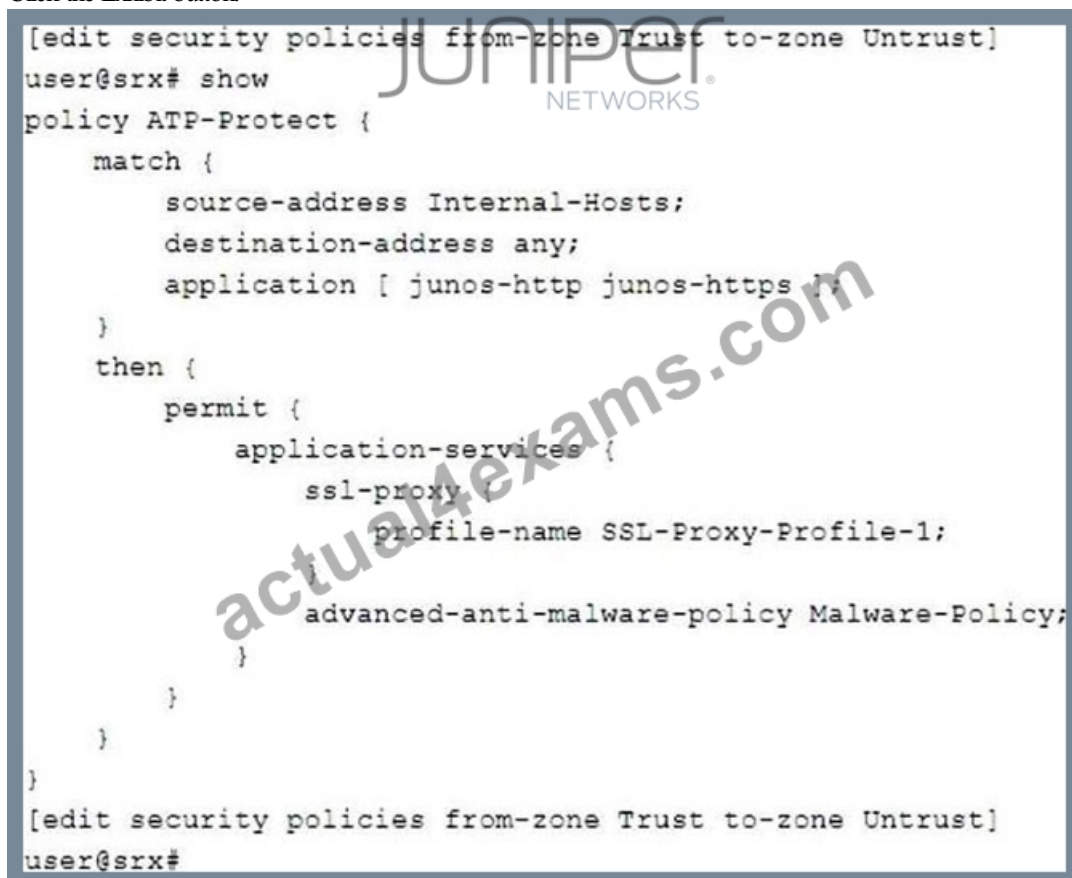

Answer: A

Explanation:

Juniper Identity Management Service (JIMS) domain PC probes are used to map usernames to IP addresses in the domain security event log. This allows for the SRX Series device to verify authentication table information, such as group membership. The probes are triggered whenever a username to IP address mapping is not found in the domain security event log. By default, the probes are executed at 60-minute intervals.

NEW QUESTION # 71

```
[edit security policies from-zone Trust to-zone Untrust]
user@srx# show
policy ATP-Protect {
    match {
        source-address Internal-Hosts;
        destination-address any;
        application [ junos-http junos-https ];
    }
    then {
        permit {
            application-services {
                ssl-proxy {
                    profile-name SSL-Proxy-Profile-1;
                }
                advanced-anti-malware-policy Malware-Policy;
            }
        }
    }
}
[edit security policies from-zone Trust to-zone Untrust]
user@srx#
```

You are asked to create a security policy that will automatically add infected hosts to the infected hosts feed and block further communication through the SRX Series device.

What needs to be added to this configuration to complete this task?

- A. Add a security intelligence policy to the permit portion of the security policy.
- B. Add a match rule to the security policy with an appropriate threat level.
- C. Add logging to the permit portion of the security policy.
- D. Add an action to the permit portion of the security policy.

Answer: A

Explanation:

To create a security policy that will automatically add infected hosts to the infected hosts feed and block further communication through the SRX Series device, you need to add a security intelligence policy to the permit portion of the security policy. A security intelligence policy is a policy that allows you to block or monitor traffic from malicious sources based on threat intelligence feeds from Juniper ATP Cloud or other providers. One of the feeds that you can use is the Infected-Hosts feed, which contains IP addresses of hosts that are infected with malware and communicate with command-and-control servers.

You can create a profile and a rule for the Infected-Hosts feed and specify the threat level and the action to take for the infected hosts. Then, you can link the security intelligence policy with the firewall policy and apply it to the traffic that you want to protect.

```

You just finished setting up your command-and-control (C&C) category with Juniper ATP Cloud. You notice that all of the feeds

have zero objects in them.

Which statement is correct in this scenario?

- A. Use the commit full command to start the download.
- **B. No action is required, the feeds take a few minutes to download.**
- C. The security intelligence policy must be configured; on a unified security policy
- D. Set the maximum C&C entries within the Juniper ATP Cloud GUI.

Answer: B

Explanation:

According to the Juniper Networks JNCIS-SEC Study Guide, when you set up your command-and- control (C&C) category with Juniper ATP Cloud, all of the feeds will initially have zero objects in them.

This is normal, as it can take a few minutes for the feeds to download. No action is required in this scenario and you will notice the feeds start to populate with objects once the download is complete.

NEW QUESTION # 73

.....

The candidates can benefit themselves by using our JN0-336 test engine and get a lot of test questions like exercises and answers. Our JN0-336 exam questions will help them modify the entire syllabus in a short time. And the Software version of our JN0-336 Study Materials have the advantage of simulating the real exam, so that the candidates have more experience of the practicing the real exam questions.
