- A. directly from the router in AS 64502
- B. R1 only
- C. both R2 and R1
- D. R2 only

**Answer: D**

Explanation:

R2 can not forward IBGP learned routes to another IBGP neighbor correct R3 will learn about Route X from R2 only. R1 is in a separate AS and Route X is advertised to R2 through eBGP. R2 will then advertise the route to R3 using iBGP. R3 cannot learn routes directly from another AS without having a direct eBGP session with that AS.
