NEW QUESTION # 44

Which two statements are correct about switch adoption?(Choose two.)

- A. Switch adoption uses SSH over TCP port 443.
- B. Switch adoption requires Mist AP.
- C. Brownfield switch adoption requires manual adoption and is used for switches that do not have a claim or activation code.
- D. Greenfield switch adoption requires cloud-enabled switches with a claim or activation code.

Answer: C,D

Explanation:

In Juniper Mist, Greenfield adoption applies to new, cloud-ready switches (such as EX4100, EX4400, and QFX series) using a claim or activation code to securely connect to the Mist cloud.

Brownfield adoption, however, supports switches already deployed or not factory-fresh. These are manually onboarded by configuring outbound management connectivity and adopting them through the Mist portal.

This distinction enables both new and legacy EX/QFX environments to be cloud-managed under Wired Assurance.
