You will love our JN0-460 exam prep for sure.

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q55-Q60):

NEW QUESTION # 55

Route distinguishers and route targets in EVPN are used for:

- A. Identifying Ethernet segments only
- B. Simplifying network configurations
- C. Differentiating between routes in overlapping IP spaces and defining VPN membership
- D. Decreasing network performance

Answer: C

NEW QUESTION # 56

Which campus fabric architecture supports Layer 3 gateways at the distribution layer?

- A. campus fabric IP Clos
- B. EVPN multihoming
- C. campus fabric core/distribution - centrally-routed bridging (CRB)
- D. campus fabric core/distribution - edge-routed bridging (ERB)

Answer: D

Explanation:

In Juniper's campus fabric architectures, the location of the Layer 3 gateway (IRB) differentiates between CRB and ERB models:

Centrally-Routed Bridging (CRB): L3 gateways are placed at the core layer.

Edge-Routed Bridging (ERB): L3 gateways are placed at the distribution layer, closer to the edge.

"In the ERB model, Layer 2 gateways are deployed at the access layer, and Layer 3 gateways are deployed at the distribution layer."

Option A (CRB): Incorrect - L3 is at the core, not distribution.

Option B (IP Clos): Incorrect - in 3-stage Clos, L3 is pushed to the access layer.

Option D (EVPN multihoming): Incorrect - this is about redundancy, not gateway placement.

Option C (ERB): Correct - L3 gateways sit at the distribution layer in the ERB architecture.

NEW QUESTION # 57

To ensure high availability in Campus Fabric Architectures, EVPN multihoming utilizes _____ to avoid single points of failure.

- A. Fixed routing protocols
- B. Single connections
- C. Manual interventions
- D. Multiple redundant paths

Answer: D

NEW QUESTION # 58

Referring to the exhibit, which statement is correct about the Post-Install user's role?

- A. It is used for help-desk monitoring and workflow for all sites.
- B. It has read-only access to all sites.
- C. It has access limited to installing APs and switches at all sites.

- D. It has full access to all sites.

Answer: C

Explanation:

The Post-Install (Installer) role has minimal access—sufficient only to claim APs or switches, assign or unassign them, and place them on maps.

It cannot unclaim or remove devices and typically expires after installation.

NEW QUESTION # 59

Which two fields are required when creating a new site? (Choose two.)

- A. site name
- B. time zone
- C. location
- D. RF template

Answer: A,B

Explanation:

Creating a new site requires a site name and time zone.

Other parameters (like templates or location data) are optional but recommended for proper reporting.
