What's more, part of that Prep4away 350-601 dumps now are free: <https://drive.google.com/open?id=1DaFKIShjz54g5InG1kuGuvIGktLqd6d>

The objective of the Prep4away is to give you quick access to Implementing Cisco Data Center Core Technologies (350-601 DCCOR) (350-601) actual questions. Offering Implementing Cisco Data Center Core Technologies (350-601 DCCOR) (350-601) updated dumps is the only factor behind the dominance of Prep4away in the market. Our customers will see our Implementing Cisco Data Center Core Technologies (350-601 DCCOR) (350-601) questions in the final certification test. We have a devoted team who puts in a lot of effort to keep the 350-601 dumps updated. Prep4away informs you that the Implementing Cisco Data Center Core Technologies (350-601 DCCOR) (350-601) questions regularly change the content of the real exam.

We can make sure that if you purchase our 350-601 exam questions, you will have the right to enjoy our perfect after sale service and the high quality products. So do not hesitate and buy our 350-601 study guide, we believe you will find surprise from our exam products. And not only you can enjoy the service before you pay for our 350-601 learning guide, you can also have the right to have free updates for one year after your purchase.

350-601 Exam Questions Conveys All Important Information of 350-601 Exam

Our company is considerably cautious in the selection of talent and always hires employees with store of specialized knowledge and skills on our 350-601 exam questions. All the members of our experts and working staff maintain a high sense of responsibility, which is why there are so many people choose our 350-601 Exam Materials and to be our long-term partner. Believe in our 350-601 study guide, and you will have a brighter future!

Cisco Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Sample Questions (Q47-Q52):

NEW QUESTION # 47

An engineer configures multiple blade servers for OS installation. The requirements are to use the internal HDDs inside the Cisco UCS blade server and for the OS to remain operational even if one of the HDDs is removed for maintenance. Each blade has two internal HDDs. Which two actions must be taken to meet these requirements? (Choose two.)

- A. Set Enforce vNIC/vHBA/iSCSI Name to disabled.
- **B. Set the First Boot Order to be Local LUN.**
- C. Set Boot Policy Mode to UEFI.
- D. Set the Protect Configuration to enabled.
- **E. Set the Local Disk Policy Mode to RAID 1.**

Answer: B,E

Explanation:

RAID 1 ensures data redundancy between the two internal HDDs. If one HDD is removed, the OS continues running on the remaining disk.

Local LUN must be the first boot option to ensure the blade boots from the internal HDDs where the OS is installed.

Enforce vNIC/vHBA/iSCSI Name is related to network/storage interface naming, not disk redundancy. Boot Policy Mode UEFI is about the boot firmware interface; not essential for redundancy. Protect Configuration safeguards service profile configuration, but not relevant to OS survival on disk failure.

NEW QUESTION # 48

The Cisco Nexus 5600 Series Switch experiences occasional packet drops on interface ethernet 1/16. An engineer wants to implement a SPAN session to investigate the issue further. The network analyzer to which the packets must be directed is located on interface 1/3. The analyzer is limited on disk space available for traffic capture, so the Nexus switch should send only the relevant data. Which two command sets configure the SPAN session that meets these requirements? (Choose two.)

- ☐ interface ethernet 1/3
switchport monitor
- ☐ monitor session 2
destination interface ethernet 1/3
span interface ethernet 1/16
- ☐ interface ethernet 1/3
switchport span
- ☐ span session 2
type SPAN-on-DROP
destination interface ethernet 1/3
source interface ethernet 1/16
- ☐ monitor session 2 type SPAN-on-DROP
destination interface ethernet 1/3
source interface ethernet 1/16

- **A. Option A**
- B. Option B
- C. Option C
- D. Option D
- **E. Option E**

Answer: A,E

Explanation:

Explanation

<https://www.cisco.com/c/en/us/products/collateral/switches/nexus-5000-series-switches/white-paper-c11-733022> The information to be sent is regarding dropped packets only.

This configuration creates a SPAN session with type SPAN-on-DROP. In the following example, the source interface, where congestion may be present, is port e3/1. The destination port is e3/2, which must be in switchport monitor mode.

```
switch(config)# monitor session <session_number> type SPAN-on-DROP
switch(config-SPAN-on-DROP)# source interface e3/1
switch(config-SPAN-on-DROP)# destination interface e3/2
```

NEW QUESTION # 49

Refer to the exhibit.

Two data center fabrics use VPC data center interconnect. The system MAC value on SW1 is 00:23:04:ee:be:20. Which value must be set to configure the system MAC address?

- A. 00:23:04:ee:be:14 on SW2
- B. 00:23:04:ee:be:20 on SW3
- C. 00:23:04:ee:be:14 on SW3
- D. 46:43:32:e5:92:80 on SW2

Answer: B

NEW QUESTION # 50

An engineer is implementing OTV on a transport that supports multicast. The solution needs to meet the following requirements:

- * Establish adjacency to the remote peer by using multicast.
- * Enable OTV advertisements for VLAN 100 to the other site.

Which two commands should be configured to meet these requirements? (Choose two.)

- A. otv site-vlan 100
- B. otv use-adjacency-server 172.27.255.94
- C. otv extend-vlan 100
- D. otv control-group 232.1.1.1
- E. otv data-group 232.2.2.0/28

Answer: C,D

Explanation:

NEW QUESTION # 51

Refer to the exhibit. VLAN 10 is experiencing delays and packet drops when the traffic is forwarded through the switch. The destination flow analyzer accepts traffic captures of not more than 30 seconds. Which configuration implements the traffic capture that meets the requirements?

- switch(config)# flow timeout 30000
switch(config)# interface ethernet 1/1
switch(config-if)# switchport
switch(config-if)# switchport access vlan 10
switch(config-if)# ip flow monitor L2_monitor output
- switch(config)# flow timeout 30
switch(config)# interface ethernet 1/1
switch(config-if)# switchport
switch(config-if)# switchport access vlan 10
switch(config-if)# mac packet-classify
switch(config-if)# layer2-switched flow monitor L2_monitor input
- switch(config)# interface ethernet 1/1
switch(config-if)# flow timeout 30
switch(config-if)# switchport access vlan 10
switch(config-if)# mac packet-classify
switch(config-if)# ip flow monitor L2_monitor input
- switch(config)# interface ethernet 1/1
switch(config)# flow timeout 30000
switch(config-if)# switchport
switch(config-if)# layer2-switched flow monitor L2_monitor output
switch(config-if)# switchport access vlan 10

- A. Option C
- **B. Option B**
- C. Option A
- D. Option D

Answer: B
