

# Juniper JN0-105 Questions To Gain Brilliant Result [2026]

DOWNLOAD the newest ITExamReview JN0-105 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1-24efgyc6\\_7xiuSt-2R3X5FxJBQZAJrk](https://drive.google.com/open?id=1-24efgyc6_7xiuSt-2R3X5FxJBQZAJrk)

To examine the content quality and format, free JN0-105 brain dumps demo are available on our website to be downloaded. You can compare these top JN0-105 dumps with any of the accessible source with you. To stamp reliability, perfection and the ultimate benefit of our content, we offer you a 100% money back guarantee. Take back your money, if you fail the exam despite using JN0-105 Practice Test.

## Juniper JN0-105 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Routing Fundamentals: This topic discusses pointing out basic routing concepts or functionality for Junos devices. Moreover, the topic also describes configuring or monitoring basic routing elements for a Junos device.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Operational Monitoring and Maintenance: Different methods of monitoring or maintaining Junos devices are identified in this topic. Lastly, it discusses monitoring or maintenance procedures for a Junos device.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Networking Fundamentals: The topic networking fundamentals covers identifying the concepts and functionality of different fundamental elements of networking.</li></ul>

## Free PDF Marvelous Juniper JN0-105 Accurate Prep Material

Obtaining an IT certification shows you are an ambitious individual who is always looking to improve your skill set. Most companies think highly of this character. Our JN0-105 exam original questions will help you clear exam certainly in a short time. You don't need to worry about how difficulty the exams are. ITExamReview release the best high-quality JN0-105 Exam original questions to help you most candidates pass exams and achieve their goal surely.

## Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q86-Q91):

### NEW QUESTION # 86

Which two statements are true about the Junos OS? (Choose two.)

- A. Routing tables are stored in the forwarding plane.
- B. Routing tables are stored in the control plane.

- C. Exception traffic is never sent to the control plane.
- D. Exception traffic is sent to the control plane.

**Answer: B,D**

Explanation:

In Junos OS, as with many network operating systems, the control plane is responsible for processes that determine how to route traffic. This includes maintaining routing tables, which store information about network paths and protocols. Therefore, routing tables are indeed stored in the control plane.

Exception traffic refers to packets that cannot be processed by the normal fast-path processing of the Packet Forwarding Engine (PFE) in the forwarding plane, and thus are sent to the control plane for further processing.

This might include packets destined for the router itself, packets that need to be fragmented, or packets that match certain firewall filter criteria, among other reasons.

Routing tables are not stored in the forwarding plane. However, the forwarding plane contains the forwarding table (sometimes referred to as the forwarding informationbase or FIB), which is a distilled version of the routing table optimized for fast packet forwarding. The forwarding plane uses this information to perform the actual transfer of packets across the network device interfaces.

### NEW QUESTION # 87

Which two common routing policy actions affect the flow of policy evaluation? (Choose two.)

- A. next hop
- B. community
- C. next policy
- D. next term

**Answer: C,D**

Explanation:

In Junos OS routing policy evaluation, "next policy" (A) and "next term" (C) are common actions that affect the flow of policy evaluation. "Next policy" directs the evaluation to the next policy in the sequence, whereas

"next term" moves the evaluation to the next term within the current policy, allowing for granular control over routing decisions.

### NEW QUESTION # 88

Exhibit

```
{hold:node0} [edit]
root# set system root-authentication ?
Possible completions:
+ apply-groups Groups from which to inherit configuration data
+ apply-groups-except Don't inherit configuration data from these groups
encrypted-password Encrypted password string
load-key-file File (URL) containing one or more ssh keys
plain-text-password Prompt for plain text password (autoencrypted)
> ssh-dsa Secure shell (ssh) DSA public key string
> ssh-rsa Secure shell (ssh) RSA public key string
{hold:node0} [edit]
root# set system root-authentication plain-text-password
```

New password:

```
Retype new password:
{hold:node0} [edit]
root# commit and-quit
[edit interfaces]
'ge-0/0/0'
HA management port cannot be configured
error: configuration check-out failed
{hold:node0} [edit]
root#
```

You are unable to remotely access your Juniper device using the CLI.

Referring to the exhibit, which command would you add to the existing configuration to enable remote CLI access?

- A. set system root-authentication plain-text-password
- B. load factory-default
- C. set system login idle-timeout 20
- D. **set system services ssh**

**Answer: D**

Explanation:

In Junos OS, remote access to the device's CLI is commonly facilitated through Secure Shell (SSH), a protocol providing secure command-line access over an insecure network. The given exhibit indicates an attempt to set a root authentication password but does not show configuration for enabling remote access services. To enable SSH, which is not shown in the configuration snippet, you need to configure the device to accept SSH connections. This is done by enabling the SSH service within the system services hierarchy of the configuration. The correct command to add to the existing configuration for enabling remote CLI access via SSH is `set system services ssh`. This command activates the SSH service, allowing secure remote logins to the device.

#### NEW QUESTION # 89

Which three benefits occur when operating an interior gateway protocol (IGP) in an autonomous system (AS)? (Choose three.)

- A. IGPs react very fast to network change.
- B. IGPs learn everything about the subnets and best paths within your network.
- C. IGPs learn prefixes in the global Internet's routing table.
- D. IGPs automatically distribute static routing information.
- E. **IGPs determine the optimal paths for data transmission.**

**Answer: A,B,E**

Explanation:

Operating an Interior Gateway Protocol (IGP) within an Autonomous System (AS) provides several benefits, including determining the optimal paths for data transmission (B), reacting quickly to network changes (D), and learning all about the subnets and best paths within the network (E). IGPs are designed to manage routing within a single AS efficiently, adapting to changes and ensuring data is routed through the best available paths.

#### NEW QUESTION # 90

Which statement is correct about the candidate configuration in the Junos OS?

- A. It is created when you execute a `commit` from the CLI
- B. **It contains changes that have not been committed**
- C. It contains the most recent rescue configuration
- D. It is only used to restore the configuration to factory default settings

**Answer: B**

Explanation:

In Junos OS, there are two main configuration databases:

\* Candidate configuration: a working copy of the configuration that holds any uncommitted changes.

All configuration edits are made here.

\* Active configuration: the running configuration that the system currently uses.

When you issue a `commit` command, the candidate configuration is promoted to active, replacing the previous configuration. Until that happens, all changes remain in the candidate configuration and do not affect device operation.

From Junos Fundamentals Guide:

"The candidate configuration is a separate copy of the configuration database. All changes are made to the candidate configuration and do not take effect until they are committed." References:

Juniper TechLibrary - Junos Configuration Fundamentals

JNCIA-Junos Exam Objective: Configuration Basics

#### NEW QUESTION # 91

.....

Even if you have received a lot of services, you will still be surprised by the service of our JN0-105 simulating exam. Our company takes great care in every aspect from the selection of staff, training, and system setup. No matter what problems of the JN0-105 Practice Questions you encounter, our staff can solve them for you right away and give you the most professional guide. And our service can help you 24/7 on the the JN0-105 exam materials.
