Latest Juniper JN0-253 Mock Test & Latest JN0-253 Examprep

Through years of efforts and constant improvement, our JN0-253 exam materials stand out from numerous study materials and become the top brand in the domestic and international market. Our company controls all the links of JN0-253 training materials which include the research, innovation, survey, production, sales and after-sale service strictly and strives to make every link reach the acme of perfection. Our company pays close attentions to the latest tendency among the industry and the clients' feedback about our JN0-253 Certification guide.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q57-Q62):

NEW QUESTION # 57

Which two features does a Marvis VNA subscription add to the support ticket creation experience? (Choose two.)

- A. configuration assistance
- **B. in-context AI-assisted troubleshooting**
- C. escalation
- **D. AI-generated response**

Answer: B,D

Explanation:

With a Marvis VNA subscription, support ticket creation in Juniper Mist is enhanced by in-context AI- assisted troubleshooting and AI-generated responses. According to official Mist documentation, "Marvis subscribers will see AI-generated responses that summarize information from Juniper Mist documentation as they start entering their support query-often surfacing relevant answers right within the support workflow.

For many issues, AI-assisted troubleshooting buttons appear on the support form itself, launching guided, context-aware diagnostic flows with Marvis to resolve problems before a ticket is formally created." These features use natural language processing and contextual data to provide intuitive, AI-driven self-help and troubleshooting, improving the support workflow and often eliminating the need to escalate to human agents or require configuration assistance. Escalation is handled by support, not Marvis VNA; and configuration assistance is a general feature, not specifically added by the Marvis VNA subscription.

NEW QUESTION # 58

Exhibit:

Referring to the exhibit, which sub-classifier contributed the most to capacity issues?

- A. Excessive Client Load
- B. WiFi Interference
- C. Network Issues
- D. Capacity

Answer: A

Explanation:

In the Juniper Mist Wireless Assurance dashboard, each Service Level Expectation (SLE) is broken down into sub-classifiers to identify the specific causes of degraded user experience. For the Capacity SLE, Mist AI analyzes performance indicators related to access point utilization, airtime availability, client density, and radio congestion.

According to the Juniper Mist Wireless Assurance Analytics Guide, sub-classifiers within the Capacity SLE may include:

- * WiFi Interference- measures co-channel and adjacent-channel interference.
- * Capacity- monitors total bandwidth and airtime utilization.
- * Network Issues- highlights backend transport or switching congestion.
- * Excessive Client Load- indicates when too many clients are associated with a single access point or radio, leading to reduced throughput and contention.

In the exhibit, the Excessive Client Load bar clearly shows the highest contribution to the Capacity SLE degradation. This means that the majority of capacity issues were caused by an overloaded access point or radio channel handling more clients than optimal. Therefore, the correct answer is D. Excessive Client Load.

NEW QUESTION # 59

Which statement is correct about Wi-Fi location-based services (LBS)?

- A. Wi-Fi LBS does not require a subscription.
- **B. Wi-Fi LBS needs the User Engagement subscription.**
- C. Wi-Fi LBS requires a Wired Assurance subscription.
- D. Wi-Fi LBS requires the Wireless Assurance subscription.

Answer: B

Explanation:

Wi-Fi Location-Based Services (LBS) provided by Mist require the User Engagement subscription. This subscription includes features that enhance user interactions and engagement, such as location services, which are critical for delivering personalized and location-aware experiences. By leveraging Wi-Fi LBS with the User Engagement subscription, organizations can offer advanced services like wayfinding, asset tracking, and location analytics.

NEW QUESTION # 60

Under which category would you identify bad cables using Marvis Actions?

- A. Clients
- B. security
- **C. Layer 1**
- D. Connectivity

Answer: C

Explanation:

Bad cables are identified under the Layer 1 category within Marvis Actions. Juniper Mist's documentation states: "Use the Actions dashboard to resolve Layer 1 issues. When you click the Layer 1 button on the Action dashboard, all available Layer 1 actions appear. This category currently contains only one action: bad cable." Marvis can detect and alert for bad cables based on frame errors, link statistics, and AP/Switch behavior, all under the Layer 1 category. Connectivity, security, and client issues are handled under their respective action categories, but bad cabling is specifically monitored and detected as a physical (Layer 1) fault.

NEW QUESTION # 61

At which two configuration levels are WLAN objects created? (Choose two.)

- **A. site level**
- **B. org level**
- C. device level
- D. user level

Answer: A,B

Explanation:

Site Level: WLAN objects can be created at the site level, allowing specific configurations for different locations within an organization. This helps in customizing WLAN settings based on the unique requirements of each site.

Org Level: WLAN objects can also be created at the organization level, which provides a standardized configuration that can be applied across multiple sites. This ensures consistency in WLAN settings throughout the entire organization.

NEW QUESTION # 62

.....

Young people are facing greater employment pressure. It is imperative to increase your competitiveness. Selecting JN0-253 learning

quiz, you can get more practical skills. First, you will increase your productivity so that you can accomplish more tasks. Second, users who use JN0-253 Training Materials can pass exams more easily. An international JN0-253 certificate means that you can get more job opportunities. Seize the opportunity to fully display your strength. Will the future you want be far behind?
