

Juniper JN0-336 Valid Mock Exam & JN0-336 Authorized Test Dumps

Our specialists check whether the contents of JN0-336 real exam are updated every day. If there are newer versions, they will be sent to users in time to ensure that users can enjoy the latest resources in the first time. In such a way, our JN0-336 Guide materials can have such a fast update rate that is taking into account the needs of users. And we will always send our customers with the latest and accurate JN0-336 exam questions.

Our windows software of the JN0-336 study materials are designed to simulate the real test environment. If you want to experience the real test environment, you must install our JN0-336 preparation questions on windows software. Also, it only support running on Java environment. If you do not install the system, the system of our JN0-336 Exam Braindumps will automatically download to ensure the normal operation.

JN0-336 Authorized Test Dumps | Online JN0-336 Version

Our JN0-336 exam torrents enjoy both price and brand advantage at the same time. We understand you not only consider the quality of our Security, Specialist (JNCIS-SEC) prepare torrents, but price and after-sales services and support, and other factors as well. So our Security, Specialist (JNCIS-SEC) prepare torrents contain not only the high quality and high accuracy JN0-336 Test Braindumps but comprehensive services as well. With the assistance of our JN0-336 exam torrents, you will be more distinctive than your fellow workers, because you will learn to make full use of your fragmental time to achieve your goals.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q78-Q83):

NEW QUESTION # 78

Exhibit

Exhibit

```
[edit security policies from-zone Trust to-zone Untrust]
user@srx# show
policy FindThreat {
    match {
        source-address any;
        destination-address any;
        application junos-defaults;
        dynamic-application { junos:BITTORRENT junos:BITTORRENT-BUNDLE
junos:BITTORRENT-WEB-CLIENT };
    }
    then {
        permit;
    }
}
[edit security policies from-zone Trust to-zone Untrust]
user@srx#
```

You are asked to track BitTorrent traffic on your network. You need to automatically add the workstations to the High_Risk_Workstations feed and the servers to the BitTorrent_Servers feed automatically to help mitigate future threats. Which two commands would add this functionality to the FindThreat policy? (Choose two.)

- A.

```
[edit security policies from-zone Trust to-zone Untrust policy FindThreat then permit application-services security-intelligence]
user@srx# set add-source-identity-to-feed High_Risk_Workstations
```

- B.

```
[edit security policies from-zone Trust to-zone Untrust policy FindThreat then permit application-services security-intelligence]
user@srx# set add-destination-identity-to-feed BitTorrent_Servers
```

- C.

```
[edit security policies from-zone Trust to-zone Untrust policy FindThreat then permit application-services security-intelligence]
user@srx# set add-source-ip-to-feed High_Risk_Workstations
```

- D.

```
[edit security policies from-zone Trust to-zone Untrust policy FindThreat then permit application-services security-intelligence]
user@srx# set add-destination-ip-to-feed BitTorrent_Servers
```

Answer: C,D

NEW QUESTION # 79

Which sequence does an SRX Series device use when implementing stateful session security policies using Layer 3 routes?

- A. An SRX Series device will conduct a longest-match Layer 3 route table lookup before performing a security policy search.
- B. An SRX Series device conducts an ALG security check on the longest-match route before performing a security policy search.
- C. An SRX Series device will perform a security policy search before conducting a longest-match Layer 3 route table lookup.
- D. An SRX Series device performs a security policy search before implementing an ALG security check on the longest-match Layer 3 route.

Answer: A

Explanation:

The sequence that an SRX Series device uses when implementing stateful session security policies using Layer 3 routes is:

An SRX Series device will conduct a longest-match Layer 3 route table lookup before performing a security policy search: When an

SRX Series device receives a packet, it first looks up the destination IP address in the routing table and finds the longest matching route to forward the packet. Then, it performs a security policy search based on the source zone, destination zone, source address, destination address, protocol, and application of the packet. If there is a matching policy that allows the packet, it creates or updates a session entry for the packet and applies any security services configured in the policy.

NEW QUESTION # 80

You want to be alerted if the wrong password is used more than three times on a single device within five minutes.
Which Juniper Networks solution will accomplish this task?

- A. Adaptive Threat Profiling
- B. Juniper Identity Management Service
- C. Intrusion Prevention System
- D. Juniper Secure Analytics

Answer: D

Explanation:

The Juniper Networks solution that will accomplish the task of alerting if the wrong password is used more than three times on a single device within five minutes is Juniper Secure Analytics (JSA). JSA is a security intelligence platform that collects, analyzes, and correlates network data from various sources, such as firewalls, routers, switches, servers, and applications. JSA can detect and respond to threats, anomalies, and vulnerabilities in real time using rules, offenses, reports, and dashboards. JSA can also integrate with JIMS (Juniper Identity Management Service) to obtain user identity information from Active Directory domains or syslog sources. JSA can use this information to create custom rules that trigger offenses or alerts based on user behavior or activity, such as failed login attempts or password changes.

NEW QUESTION # 81

On an SRX5800, which port is used for chassis cluster out-of-band management?

- A. Txp0
- B. ge-0/0/0
- C. fxp1
- D. user-defined

Answer: D

NEW QUESTION # 82

Which two statements are correct about the fab interface in a chassis cluster? (Choose two.)

- A. In an active/active configuration, inter-chassis transit traffic is sent over the fab interface.
- B. Real-time objects (RTOs) are exchanged on the fab interface to maintain session synchronization.
- C. The fab interface enables configuration synchronization.
- D. Heartbeat signals sent on the fab interface monitor the health of the control plane link.

Answer: A,B

Explanation:

The fab interface is a fabric link that connects the two nodes in a chassis cluster. A chassis cluster is a high-availability feature that groups two identical SRX Series devices into a cluster that acts as a single device.

The fab interface has two functions:

Real-time objects (RTOs) are exchanged on the fab interface to maintain session synchronization: RTOs are data structures that store information about active sessions, such as source and destination IP addresses, ports, protocols, and security policies. RTOs are exchanged between the nodes on the fab interface to ensure that both nodes have the same session information and can take over the traffic in case of a failover.

In an active/active configuration, inter-chassis transit traffic is sent over the fab interface: In an active/active configuration, both nodes in a cluster can process traffic for different redundancy groups (RGs). RGs are collections of interfaces or services that fail over together from one node to another. If traffic needs to transit from one RG to another RG that is active on a different node, it is sent

over the fab interface.

NEW QUESTION # 83

.....

The ExamPrepAway Security, Specialist (JNCIS-SEC) (JN0-336) exam dumps are ready for quick download. Just choose the right JN0-336 exam questions format and download it after paying an affordable Security, Specialist (JNCIS-SEC) in JN0-336 Practice Questions charge and start this journey. Best of luck in the Juniper JN0-336 exam and career!!!

JN0-336 Authorized Test Dumps: <https://www.examprepaway.com/Juniper/braindumps.JN0-336.etc.file.html>

ExamPrepAway recognizes the acute stress the aspirants undergo to get trust worthy and authentic Security, Specialist (JNCIS-SEC) (JN0-336) exam study material, Our JN0-336 study braindumps are so popular in the market and among the candidates that is because that not only our JN0-336 learning guide has high quality, but also our JN0-336 practice quiz is priced reasonably, so we do not overcharge you at all, Additional things to know about the services offered by ExamPrepAway: The company provides 100% guarantee to the users for passing their JN0-336 exam in one try.

At the prompt, type `print Single quotes protect double quotes" in output.` and press Enter, Our JN0-336 quiz torrent was designed by a lot of experts and professors in different area in the rapid development world.

Pass Guaranteed Juniper - JN0-336 - Security, Specialist (JNCIS-SEC) – Reliable Valid Mock Exam

ExamPrepAway recognizes the acute stress the aspirants undergo to get trust worthy and authentic Security, Specialist (JNCIS-SEC) (JN0-336) exam study material, Our JN0-336 study braindumps are so popular in the market and among the candidates that is because that not only our JN0-336 learning guide has high quality, but also our JN0-336 practice quiz is priced reasonably, so we do not overcharge you at all.

Additional things to know about the services offered by ExamPrepAway: The company provides 100% guarantee to the users for passing their JN0-336 exam in one try.

In modern society, this industry is developing increasingly, Every customer who has used our JN0-336 study materials consider this to be a material that changes their JN0-336 life a lot, so they recommend it as the easiest way to pass the certification test.
