Our website offer considerate 24/7 services with non-stopping care for you after purchasing our FlashArray-Implementation-Specialist learning materials. Although we cannot contact with each other face to face, but there are no disparate treatments and we treat every customer with consideration like we are around you at every stage during your review process on our FlashArray-Implementation-Specialist Exam Questions. We will offer help insofar as I can. While our FlashArray-Implementation-Specialist training guide is beneficiary even you lose your chance of winning this time.

Pure Storage FlashArray-Implementation-Specialist Exam Syllabus Topics:

Topic	Details
Topic 1	• Post-Installation • Upgrade: This section of the exam measures the skills of FlashArray Implementation Specialists and evaluates how professionals confirm system functionality after installation or an upgrade. It involves validating connectivity, running health checks, confirming configurations, and ensuring that the deployment meets operational expectations.
Topic 2	• Pre-Installation • Upgrade: This section of the exam measures the skills of Enterprise Infrastructure Technicians and covers all preparation activities before deploying or upgrading a Pure Storage FlashArray. It includes understanding environmental requirements, verifying prerequisites, checking compatibility, and validating system readiness through appropriate tools and documentation.
Topic 3	• Installation: This section of the exam measures the skills of Enterprise Infrastructure Technicians and focuses on executing a successful installation of FlashArray systems. It tests the ability to perform physical setup, cabling, configuration of network settings, and the application of initial system configurations necessary for full deployment.

Topic 4	• Upgrades: This section of the exam measures the skills of FlashArray Implementation Specialists and focuses on tasks involved in managing firmware and software upgrades. Candidates must demonstrate knowledge of upgrade planning, verification steps, and rollback procedures, ensuring that systems are updated with minimal disruption to service.

100% Pass Quiz Pure Storage FlashArray-Implementation-Specialist - High Hit-Rate Knowledge Pure Storage Certified FlashArray Implementation Specialist Points

Do you want to pass your exam by using the latest time? If you do, you can choose the FlashArray-Implementation-Specialist study guide of us. We can help you pass the exam just one time. With experienced experts to compile and verify the FlashArray-Implementation-Specialist exam dumps, the quality and accuracy can be guaranteed. Therefore, you just need to spend 48 to 72 hours on training, you can pass the exam. In addition, we offer you free demo to have a try before buying FlashArray-Implementation-Specialist Study Guide, so that you can know what the complete version is like. Our online and offline chat service stuff will give you reply of all your confusions about the FlashArray-Implementation-Specialist exam dumps.

Pure Storage Certified FlashArray Implementation Specialist Sample Questions (Q19-Q24):

NEW QUESTION # 19

A client needs to upgrade Purity on their FlashArray, but is unable to wait for an available upgrade date from support. What action should the customer take?

- A. Open a ticket with support, download the latest Purity version, copy to a USB flash drive, and run the pureinstall command on each controller.
- B. Log into the Purity CLI, download the latest Purity version, and run the pureinstall command on each controller.
- C. Go through the Self-Service upgrade portal on Pure1 Manage and upgrade to the latest Purity version.

Answer: C

Explanation:

Customers can independently upgrade Purity using the Self-Service upgrade portal on Pure1 Manage, enabling them to proceed without waiting for support scheduling.

NEW QUESTION # 20

A data pack has been installed and the puredrive list command shows the drives in "unadmitted" status. Which command should be used to complete the admission?

- A. puredrive add
- B. purearray drive admit
- C. puredrive admit

Answer: C

Explanation:

The puredrive admit command is used to complete the admission process for drives showing as "unadmitted," integrating them fully into the FlashArray.

NEW QUESTION # 21

An Implementation Engineer is assigned to install a 4X Module 9.1 TB Conversation Kit in a Flash Array Chassis. Why are there only four Direct Flash Modules?

- A. To replace a missing shipment
- B. To fill out enclosure bays.
- C. To widen an existing write group.

Answer: C

Explanation:

Installing four DirectFlash Modules in a 9.1 TB Conversion Kit is intended to widen an existing write group, improving performance and capacity distribution within the FlashArray.

NEW QUESTION # 22

When performing an install on a FlashArray, what step should be taken first?

- A. Code upgrade
- B. CT1 configuration
- C. CT0 configuration

Answer: C

Explanation:

The installation process begins with configuring controller 0 (CT0) first, as it is the primary controller responsible for initial system setup.

NEW QUESTION # 23

A customer has ordered several FlashArrays and wants to have ActiveCluster configured. What is the maximum quantity of arrays supported with ActiveCluster?

- A. 0
- B. 1
- C. 2

Answer: C

Explanation:

FlashArray ActiveCluster is designed for synchronous replication between two FlashArray systems, enabling active-active configurations across two sites. This setup allows both arrays to serve I/O simultaneously, providing high availability and zero RPO (Recovery Point Objective). Each array in the ActiveCluster configuration maintains identical volume identities, ensuring seamless access for hosts regardless of the array they connect to. The configuration supports metro-area clustering, with a maximum round-trip latency of 11 milliseconds between arrays. Additionally, the Pure1 Cloud Mediator or an on-premises mediator is utilized to manage failover and prevent split-brain scenarios, eliminating the need for a third site or external gateway.

While ActiveCluster supports a two-site configuration, it does not support additional arrays within the same synchronous setup. For scenarios requiring protection across more than two sites, asynchronous replication solutions like ActiveDR™ can be employed.

ActiveDR allows for asynchronous replication to a third site, providing broader disaster recovery capabilities.

Therefore, the maximum number of arrays supported in a single ActiveCluster configuration is two.

NEW QUESTION # 24
