

Kostenlose Certified CMMC Professional (CCP) Exam vce dumps & neueste CMMC-CCP examcollection Dumps

P.S. Kostenlose 2025 Cyber AB CMMC-CCP Prüfungsfragen sind auf Google Drive freigegeben von Zertpruefung verfügbar:
https://drive.google.com/open?id=1Bj_FYIOaSUaejACxDMSZ4uYimndDqK_J

Wenn Sie sich noch anstrengend bemühen, die Cyber AB CMMC-CCP Prüfung zu bestehen, kann Zertpruefung Ihren Traum verwirklichen. Die Schulungsunterlagen zur Cyber AB CMMC-CCP Zertifizierung von Zertpruefung sind die besten und bieten Ihnen auch eine gute Plattform zum Lernen. Die Frage lautet, wie Sie sich auf die Prüfung vorbereiten sollen, um die CMMC-CCP Prüfung 100% zu bestehen. Die Antwort ist ganz einfach. Sie sollen die Fragenkataloge zur Cyber AB CMMC-CCP Zertifizierung von Zertpruefung wählen. Mit ihr können Sie sich ganz entspannt auf die CMMC-CCP Prüfung vorbereiten.

Cyber AB CMMC-CCP Prüfungsplan:

Thema	Einzelheiten
Thema 1	Scoping: This section of the exam measures the analytical skills of cybersecurity practitioners, highlighting their ability to properly define assessment scope. Candidates must demonstrate knowledge of identifying and classifying Controlled Unclassified Information (CUI) assets, recognizing the difference between in-scope, out-of-scope, and specialized assets, and applying logical and physical separation techniques to determine accurate scoping for assessments

Thema 2	• CMMC Ecosystem: This section of the exam measures the skills of consultants and compliance professionals and focuses on the different roles and responsibilities across the CMMC ecosystem. Candidates must understand the functions of entities such as the Department of Defense, CMMC-AB, Organizations Seeking Certification, Registered Practitioners, and Certified CMMC Professionals, as well as how the ecosystem supports cybersecurity standards and certification.
Thema 3	• CMMC Governance and Source Documents: This section of the exam measures the capabilities of legal or compliance advisors, covering key regulatory frameworks that govern cybersecurity compliance. Topics include Federal Contract Information, Controlled Unclassified Information, the role of NIST SP 800-171, DFARS, FAR, and the structure and requirements of CMMC v2.0, including self-assessments and certification levels.

CMMC-CCP Simulationsfragen & CMMC-CCP Zertifizierungsprüfung

Die Cyber AB CMMC-CCP Dumps von Zertprüfung haben die sagenhafte Hit-Rate. Diese Dumps beinhalten alle mögliche Fragen in den aktuellen Prüfungen. Deshalb können Sie Cyber AB CMMC-CCP Prüfungen sehr leicht bestehen, wenn Sie diese Dumps ernst lernen. Als eine sehr wichtige Cyber AB CMMC-CCP Prüfung Zertifizierung spielt heute eine übergreifende Rolle. Deswegen können Sie die Chance nicht verlieren, die Prüfung zu bestehen. Zertprüfung verspricht Ihnen volle Rückerstattung wenn durchgefallen. Informieren Sie bitte mehr an Zertprüfung, wenn Sie die CMMC-CCP Zertifizierungsprüfung bestehen wollen.

Cyber AB Certified CMMC Professional (CCP) Exam CMMC-CCP Prüfungsfragen mit Lösungen (Q172-Q177):

172. Frage

Which domains are a part of a Level 1 Self-Assessment?

- **A. Access Control (AC), Physical Protection (PE), and Identification and Authentication (IA)**
- B. Risk Management (RM), Media Protection (MP), and Identification and Authentication (IA)
- C. Risk Management (RM), Access Control (AC), and Physical Protection (PE)
- D. Access Control (AC), Risk Management (RM), and Media Protection (MP)

Antwort: A

Begründung:

CMMC Level 1 focuses on basic cyber hygiene and includes 17 practices derived from NIST SP 800-171 Rev.

2 but only covers the protection of Federal Contract Information (FCI)-not Controlled Unclassified Information (CUI).

Unlike Level 2, which aligns fully with NIST SP 800-171, Level 1 does not require third-party certification and can be self-assessed by the organization.

Domains Covered in a Level 1 Self-Assessment CMMC Level 1 practices fall under three specific domains:

* Access Control (AC)- Ensures that only authorized individuals can access FCI.

* Physical Protection (PE)- Protects physical access to systems and facilities storing FCI.

* Identification and Authentication (IA)- Verifies the identity of users accessing systems containing FCI.

These domains focus on foundational security controls necessary to protect FCI from unauthorized access.

* CMMC Model v2.0 states that Level 1 includes only 17 practices mapped to NIST SP 800-

171 requirements specific to Access Control (AC), Physical Protection (PE), and Identification and Authentication (IA).

* CMMC Assessment Guide, Level 1 confirms that Risk Management (RM) and Media Protection (MP) are not included in Level 1, as they pertain to more advanced security measures needed for handling CUI (Level 2).

* A. Access Control (AC), Risk Management (RM), and Media Protection (MP) # Incorrect. Risk Management (RM) and Media Protection (MP) are Level 2 domains.

* B. Risk Management (RM), Access Control (AC), and Physical Protection (PE) # Incorrect. Risk Management (RM) is not part of Level 1.

* C. Access Control (AC), Physical Protection (PE), and Identification and Authentication (IA) # Correct.

These are the three domains covered in CMMC Level 1 self-assessments.

* D. Risk Management (RM), Media Protection (MP), and Identification and Authentication (IA) # Incorrect. Risk Management (RM) and Media Protection (MP) are Level 2 domains.

Official CMMC 2.0 Documentation References Breakdown of Answer Choices Conclusion The correct answer is C. Access Control (AC), Physical Protection (PE), and Identification and Authentication (IA), as these are the only three domains included in a CMMC Level 1 Self-Assessment according to CMMC 2.0 documentation and NIST SP 800-171 mapping.

* CMMC 2.0 Model Overview - DoD Official Documentation

* CMMC Assessment Guide, Level 1

* NIST SP 800-171 Rev. 2 (Basic Security Requirements for FCI)

173. Frage

When are data and documents with legacy markings from or for the DoD required to be re-marked or redacted?

- A. When a document is being shared outside of the organization
- B. When the document is considered secret
- C. When a derivative document's original information is not CUI
- D. When under the control of the DoD

Antwort: A

Begründung:

Background on Legacy Markings and CUI

Legacy markings refer to classification labels used before the implementation of the Controlled Unclassified Information (CUI) Program under DoD Instruction 5200.48.

Documents with legacy markings (such as "For Official Use Only" (FOUO) or "Sensitive But Unclassified" (SBU)) must be reviewed for re-marking or redaction to align with CUI requirements.

When Must Legacy Markings Be Updated?

If the document is retained internally (Answer A - Incorrect): Documents under DoD control do not require immediate re-marking unless they are being shared externally.

If the document is classified as Secret (Answer B - Incorrect): This question is about CUI, not classified information. Secret-level documents follow different marking rules under DoD Manual 5200.01.

If a document is being shared externally (Answer C - Correct):

According to DoD Instruction 5200.48, Section 3.6(a), organizations must review legacy markings before sharing documents outside the organization.

The document must be re-marked in compliance with the CUI Program before dissemination.

If the original document does not contain CUI (Answer D - Incorrect): The original source document's status does not affect the requirement to re-mark a derivative document if it contains CUI.

Conclusion

The correct answer is C: Documents with legacy markings must be re-marked or redacted when being shared outside the organization to comply with DoD CUI guidelines.

174. Frage

A test or demonstration is being performed for the Assessment Team during an assessment. Which environment MUST the OSC perform this test or demonstration?

- A. Production
- B. Development
- C. Client
- D. Demonstration

Antwort: A

Begründung:

* During a CMMC Level 2 assessment, assessors require objective evidence that security controls are implemented in the actual operating environment where Controlled Unclassified Information (CUI) is handled.

* This means that tests or demonstrations must be conducted in the production environment, where the organization's real systems and security controls are in use.

* Assessment teams need to validate security controls in the actual environment where they are applied, ensuring that security

measures are in effect in the real-world operating conditions.

* Option A (Client) is incorrect because "Client" is not a defined assessment environment.

* Option C (Development) is incorrect because testing in a development environment does not accurately represent the production security posture.

* Option D (Demonstration) is incorrect because demonstrations in a separate test environment do not provide valid evidence for CMMC assessments—actual security implementations must be verified in production.

* CMMC Assessment Process (CAP) Guide - Section 3.5 (Assessment Methods)

* NIST SP 800-171 Assessment Procedures (Verification must occur in the actual system where CUI resides.) Understanding the Assessment Environment Requirement Why Option B (Production) is Correct Official CMMC Documentation References Final Verification Since CMMC assessments require security controls to be validated in the actual production environment, the correct answer is Option B: Production.

175. Frage

A Lead Assessor is presenting an assessment kickoff and opening briefing. What topic MUST be included?

- A. Gathering evidence
- B. Review of the OSC's SSP
- **C. Overview of the assessment process**
- D. Examination of the artifacts for sufficiency

Antwort: C

Begründung:

What is Required in the CMMC Assessment Kickoff and Opening Briefing? Before starting a CMMC assessment, the Lead Assessor must present an opening briefing to ensure that the Organization Seeking Certification (OSC) understands the assessment process.

Step-by-Step Breakdown: #1. Overview of the Assessment Process

* The Lead Assessor must explain the CMMC assessment methodology, including:

* The assessment objectives and scope

* How the assessment team will review security controls

* What to expect during interviews, testing, and document review

* This ensures transparency and alignment between the assessors and the OSC.

#2. Why the Other Answer Choices Are Incorrect:

* (A) Gathering Evidence#

* Evidence collection is part of the assessment but not the primary topic of the opening briefing.

* (B) Review of the OSC's SSP#

* While the SSP is a key document, reviewing it is part of the assessment, not the kickoff briefing.

* (D) Examination of the artifacts for sufficiency#

* Artifact review happens later in the assessment process, not during the kickoff.

* The CMMC Assessment Process Guide states that the opening briefing must include an overview of the assessment process, ensuring the OSC understands the expectations and methodology.

Final Validation from CMMC Documentation: Thus, the correct answer is:

#C. Overview of the assessment process.

176. Frage

Which example represents a Specialized Asset?

- A. Consultants who provide cybersecurity services
- B. Hosted VPN services
- **C. All property owned or leased by the government**
- D. SOCs

Antwort: C

Begründung:

Understanding Specialized Assets in CMMC A Specialized Asset is defined as a system, device, or infrastructure component that is not a traditional IT system but still plays a role in cybersecurity or business operations.

Types of Specialized Assets (as per CMMC guidance) #Operational Technology (OT)- Industrial control systems, SCADA systems.

#Security Operations Centers (SOCs)- Dedicated cybersecurity monitoring and response centers.

#IoT Devices- Smart sensors, embedded systems.

#Restricted IT Systems- Systems with highly controlled access.

A). SOCs # Correct

Security Operations Centers (SOCs) are specialized cybersecurity environments used for threat monitoring, detection, and response. They often operate outside standard IT infrastructure and are classified as specialized assets under CMMC.

B). Hosted VPN services # Incorrect

VPN services are standard IT infrastructure and do not qualify as specialized assets.

C). Consultants who provide cybersecurity services # Incorrect

Consultants are personnel, not specialized assets. Specialized assets refer to systems, devices, or infrastructure.

D). All property owned or leased by the government # Incorrect

Government property is not automatically considered a specialized asset under CMMC. Specialized assets refer to specific IT or cybersecurity-related infrastructure.

Why is the Correct Answer "SOCs" (A)?

CMMC 2.0 Assessment Process (CAP) Document

Defines Specialized Assets and includes SOCs in its examples.

CMMC-AB Guidelines

Lists security infrastructure like SOCs as Specialized Assets due to their unique cybersecurity function.

NIST SP 800-171 & CMMC 2.0 Security Domains

Recognizes dedicated security monitoring environments as part of an organization's cybersecurity posture.

CMMC 2.0 References Supporting This Answer

Final Answer #A. SOCs (Security Operations Centers)

177. Frage

.....

Wollen Sie Ihre IT-Fähigkeiten in kürzester Zeit erhöhen, aber zugleich sorgen Sie noch darum, dass Ihnen geeignete Lernmaterialien fehlen? Machen Sie jetzt keine Sorgen, denn solange Sie über die Fragenkataloge zur Cyber AB CMMC-CCP Zertifizierungsprüfung von Zertpruefung verfügen, können Sie mit jeder IT-Prüfung leicht fertig werden. Unsere Fragenkataloge zur Cyber AB CMMC-CCP Zertifizierungsprüfung sind von den erfahrenen IT-Experten durch langjährige ständige Untersuchung und Erforschung bearbeitet. Zertpruefung wird Ihre beste Wahl sein.
