L4M1 Valid Exam Braindumps, Real L4M1 Dumps Free

Life is beset with all different obstacles that are not easily overcome. For instance, L4M1 exams may be insurmountable barriers for the majority of population. However, with the help of our L4M1 exam questions, exams are no longer problems for you. The reason why our L4M1 Training Materials outweigh other L4M1 study prep can be attributed to three aspects, namely free renewal in one year, immediate download after payment and simulation for the software version.

CIPS Scope and Influence of Procurement and Supply Sample Questions (Q26-Q31):

NEW QUESTION # 26

Bob is a procurement manager at ABC Ltd. He has been asked to ensure all future purchases achieve 'value for money' for the organisation. What is meant by 'value for money'? (5 points). Describe 4 techniques that Bob could use to achieve this (20 points)

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

1) A definition of Value for Money: ensuring a purchase is cost effective. This may be that the purchase achieves the 5 Rights of Procurement or that the purchase achieves the 4Es: Economy, Efficiency, Effectiveness and Equity. - this is only worth 5 points, so don't spend too long on this

2) 4 techniques Bob can use to achieve VFM: this is the bulk of your essay. Each of the 4 will be worth 5 points, so remember to give a thorough Explanation: and example. Pick 4 from the list below: complete a value analysis to eliminate non-essential features, minimise variety/ consolidate demand, avoid over specification, pro-active sourcing, whole life costing methodologies, eliminate / reduce inventory, use electronic systems, international sourcing, sustainability / environmental policies, currency/ exchange rate considerations, negotiating good payment terms, packaging, warranties.

Example Essay:

"Value for money" (VFM) is a concept that refers to obtaining the best possible return on investment or benefits relative to the cost incurred. It involves assessing whether the goods, services, or activities provided offer an optimal balance between their cost and the quality, benefits, or outcomes they deliver.

Value for money is not solely about choosing the cheapest option; instead, it considers the overall efficiency, effectiveness, and long-term value derived from an expenditure. For Bob, the Procurement Manager at ABC Ltd there are four key ways that he can achieve this for all future purchases.

Value Engineering

This is looking at the components of a product and evaluating the value of each component individually. You can then eliminate any components that do not add value to the end product. To do this Bob would choose a product to review and determine whether any parts of this can be omitted (thus saving the company money) or could be replaced by components that are of a higher quality at the same price (thus providing added value to the customer). For example, Bob could complete a Value Engineering exercise on the new mobile phone prototype ABC plan to release next year. His findings may discover a way to provide a higher quality camera at no additional cost or that some components don't add value and can be eliminated.

Consolidate demand

Bob can achieve value for money by consolidating demand at ABC Ltd. This would mean rather than each individual person/ department ordering what they want when they need it, Bob creates a centralised process for ordering items in bulk for the departments to share. For example, if each department requires stationary to be ordered, Bob can consolidate this demand and create one big order each quarter. This will likely result in cost savings for ABC as suppliers often offer discounts for large orders. Moreover, consolidating demand will allow for saving in time (one person does the task once, rather than lots of people doing the same task and duplicating work).

International sourcing

Bob may find there is value for money in changing suppliers and looking at international sourcing.

Often other countries outside of the UK can offer the same products at a lower cost. An example of this is manufactured goods from China. By looking at international supply chains, Bob may be able to make cost-savings for ABC. He should be sure that when using this technique there is no compromise on quality.

Whole Life Costing methodology

This is a technique Bob can use for procuring capital expenditure items for ABC. This involves looking at the costs of the item throughout its lifecycle and not just the initial purchase price. For example, if Bob needs to buy a new delivery truck he should consider not only the price of the truck, but also the costs of insurance for the truck, how expensive it is to buy replacement parts such as tyres and the cost of disposing of the truck once it reaches the end of its life. By considering these factors Bob will ensure that he buys the truck that represents the best value for money long term.

In conclusion Bob should ensure he uses these four techniques for all items he and his team procures in the future. This will ensure ABC Ltd are always achieving value for money, and thus remain competitive in the marketplace.

Tutor Notes

- This case study is really short, and the ones you'll receive in the exam are often longer and give you more guidance on what they're expecting you to write. With case study questions, you have to make your entire answer about Bob. So don't bring in examples from your own experience, rather, focus on giving examples for Bob.

- A good rule of thumb for case study questions is make sure you reference the case study once per paragraph.

- Value for Money is a really broad topic and you can pretty much argue anything that procurement does is helping to achieve value for money. There's a large table of stuff that's considered VFM on p.38 but that table isn't exhaustive. So feel free to come up with your own ideas for this type of essay.

Some additional tidbits of information on VFM:

- The 'academic' definition of Value for Money is 'the optimum combination of whole life cost and the quality necessary to meet the customer's requirement'

- Value for Money is an important strategic objective for most organisations but particularly in the public sector. This is because the public sector is financed by public money (taxes), so they must demonstrate that the organisation is using this money wisely. This might be an interesting fact to put into an essay on VFM.

- Value can often be hard to quantify, particularly in the service industry. E.g. in customer service it can be difficult to quantify the value of having knowledgeable and polite employees delivering the service.

NEW QUESTION # 27

Explain what is meant by Corporate Governance and why having Corporate Governance structures is important. Discuss 2 obstacles which may impede an organisation achieving high levels of Corporate Governance. (25 points)

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

- Firstly start with a definition of Corporate Governance - this means the rules, policies, processes and organisational structures that ensure an organisation adheres to accepted ethical standards, good practices, the law and regulations. It's the systems put in place which directs and controls organisations to do 'the right thing'.

- Then move on to discuss why having this is important - I'd maybe think of 3-4 examples here such as:

protects the interest of shareholders, reduces risk, moral obligations, legal obligations

- The last part of your essay should talk about the 2 obstacles - describe two from the following list: lack of executive support, poor stakeholder co-operation, lack of clarity and / or resources, having poor IT systems, lack of co-ordination of procurement responsibilities. Because you're only talking about 2 here, you'll need to go into detail about them. So pick 2 you know well. Don't be tempted to talk about more than 2. You won't get extra marks.

Example Essay:

Corporate governance refers to the system of rules, practices, processes, and structures by which a company is directed and controlled. It encompasses the relationships among a company's management, its board of directors, shareholders, and other stakeholders. The primary objective of corporate governance is to ensure that the company operates in an ethical, transparent, and accountable manner, safeguarding the interests of shareholders and promoting long-term value creation. Corporate governance can be defined internally (by shareholders/ managers) or externally (by governments and international standard-setting bodies such as ISO) and is important for all organisations. Corporate governance is needed because you can't assume everyone will act ethically- rules and procedures need to be written down and the organisation needs to have recourse for dealing with behaviour that falls outside of what is accepted. Procurement's role in Corporate Governance includes control over finance and expenditure, ensuring the supply chain is 'clean' (i.e. not involved in unethical business practices such as child labour) and risk management.

Why having a corporate governance structure is important:

- 1) The procurement department has a 'stewardship' role - it controls large sums of organisation's funds.

There are many opportunities to commit fraud, make unethical or biased decisions so it's important that there are corporate governance structures in place to prevent this. It protects the organisation from individuals with bad intent, scandal, and legal

repercussions.

2) Strong Corporate Governance is required to successfully manage a supply chain. It's important to ensure good relationships- suppliers need to see you as a 'good customer'. If your organisation is seen to be unethical or underhand, suppliers may not want to work with you.

3) Financial impact - where corporate governance isn't implemented, there may be financial costs for the organisation. For example, in the Public Sector if a supplier successfully challenges a tender award, the buyer may have to award the value of the tender - so there's financial impact on a company if corporate governance isn't followed.

Obstacle 1 - lack of senior management support

Unless there is buy-in from the senior leadership team it will not be possible for departments such as Procurement to implement sound Corporate Governance procedures. Corporate Governance needs to be directed from the top of an organisation to ensure all departments and staff give importance to this. If Senior Leadership are seen not to care about implementing or following Corporate Governance, other staff won't care either. They need to lead by example to ensure the whole organisation 'buys into' the processes.

Obstacle 2 - Poor IT infrastructure.

For Corporate Governance to be effective, an effective IT system must be implemented. For example, to avoid fraud it's not just necessary to have a written anti-fraud policy, there must be ways of checking that fraud isn't being committed. The way to do this is to have an effective IT system which can flag anomaly payments and procurement activities outside of what is considered 'normal'. Therefore, having a poor IT infrastructure is a barrier to effective Corporate Governance.

In conclusion, corporate governance is essential for building trust among stakeholders and contributing to the overall success and sustainability of a company. Effective governance structures and practices instil confidence in investors, enhance the company's reputation, and foster a culture of responsibility and accountability throughout the organization. Good corporate governance is a cornerstone of sound business management and contributes to the long-term prosperity of the company.

Tutor Notes

- Corporate Governance became a big thing in the 70s and 80s following high profile scandals and the collapse of several companies. Investors were concerned about what companies were doing which led to increased control on the powers of directors and greater transparency of corporate actions.

- Examples of Corporate Governance. Enron is a good real life example you could use: Impact of Bad Corporate Governance - Corporate Fraud and Corruption: A Holistic Approach to Preventing Financial Crises (ebruary.net)

- This is a really good real-life example of Public Sector procurement gone wrong: Flawed nuclear tender sees £100m payout to firms - BBC News

- Adding in some real life examples will take your essay from a Merit result (50-70%) to a Distinction (70%+)

- Another way this topic can come up as a question is describing the elements of corporate governance, or asking what a procurement manager should do when corporate governance is broken/ not followed.

- LO 3.1 p.117

NEW QUESTION # 28

Describe the main differences between the three economic sectors: public, private and third. Your answer may make reference to the following: funding, ownership, shares, objectives and administration (25 marks)

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

How to approach this question

- Sometimes CIPS give you a steer on how to answer the question. My advice is to follow it. The question says you MAY make reference to the following, but I'd use those hints as a guide for content- a paragraph on each and you're done!

- When you've got a 'may make reference to' hint - this means you can completely ignore it and do your own thing and bring in your own ideas. May means it's optional, so you wouldn't be penalised for this. However, you have to consider the examiner's mark scheme- it will detail options of stuff you can write for funding, ownership etc. Then there will be a line at the bottom saying something like 'accept other options such as x and y'. This leaves it up to the examiner to decide whether what you've said is relevant. I'd personally not leave it up to chance you get a lenient examiner. If you write what's definitely going to be on their mark scheme, you're more likely to get more points.

Example Essay

The modern economy is a complex tapestry of various sectors, each with its own distinct characteristics and functions. The three prominent sectors are the public sector, the private sector, and the third sector. These sectors differ significantly in terms of their funding mechanisms, ownership structures, objectives, the concept of shares, and their administration.

Firstly, the public sector is predominantly funded by the government through taxation, grants, and other forms of public revenue. Its very existence hinges on the provision of essential services and the fulfilment of societal needs. These organizations are owned by the government, be it at the federal, state, or local level. Unlike the private sector, the concept of shares doesn't apply in the public

sector. Instead, the government allocates budgets to various departments and agencies for public services and projects. The primary objectives of the public sector revolve around the welfare of the citizens, including the provision of education, healthcare, defence, and infrastructure. It is characterized by bureaucratic administration, with decision-making processes subject to governmental regulations and oversight. A prime example is public schools and healthcare systems, which are funded and operated by the government with the primary objective of ensuring universal access to education and healthcare services.

In contrast, the private sector operates on a starkly different paradigm. It is primarily funded by private capital, investment, and profit-seeking activities. Private individuals and corporations own these entities, with ownership shares often represented by stocks. Shareholders invest capital in exchange for ownership stakes and the potential for dividends. The central objective in the private sector is profit maximization, driven by competition in the market. Companies in the private sector are administered by management teams and boards of directors, with decisions guided by market forces. Apple and ExxonMobil are examples of private sector entities, privately owned and publicly traded, with profit motives at their core. Shareholders invest in these companies with the expectation of financial returns.

Lastly, the third sector, often referred to as the nonprofit or voluntary sector, represents a unique economic sphere. It relies on a combination of funding sources, including donations, grants, and earned income, but not taxation. Third sector organizations are not owned by individuals or shareholders; instead, they are governed by boards of directors or trustees. Unlike the private sectors, shares are not applicable in the third sector.

These organizations do not seek to distribute profits to owners. The primary objective of the third sector is to serve a social or community purpose, such as addressing societal issues, promoting social change, and providing services that benefit the public. Administration in this sector is overseen by non-profit boards, and it heavily relies on volunteers, philanthropy, and community engagement. For example, the Red Cross operates with the objective of providing humanitarian aid and disaster relief, relying on donations and volunteers to fulfil its mission. Any profits that are made are reinvested into the organisation to further its mission. In conclusion, the public, private, and third sectors represent diverse economic domains, each with its own funding mechanisms, ownership structures, objectives, and administrative models. These sectors play essential and complementary roles in society, contributing to economic development, public welfare, and social progress. Together, they form the foundation of a balanced and dynamic economic landscape.

Tutor Notes

- I've structured this essay with a paragraph on each sector, but you could have done a paragraph on each theme, thus having 5 paragraphs instead of 3. Either approach works.

- You've got 5 things and 3 sectors, that equals 15 marks. If you give an example of each and a strong intro and conclusion, that's full marks.

- See LO 4.1 p. 203 - there's a cute table with this information on.

NEW QUESTION # 29

Sarah is thinking of setting up a charity in the UK which will look after animals that have been abandoned.

What regulations and governing bodies should Sarah be aware of when setting up her charity? (25 Points)

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

How to approach this question

- Your essay should mention at least one regulation and one governing body particular to the charity section and I would recommend these be the Charities Act 2011 and the Charities Commission.

- If you don't know a lot about the sector you can bring up more generalised regulations and governing bodies, such as financial conduct and the Equalities Act, but make sure it's relevant to Sarah. Her charity is a small, local one, so things like Modern Slavery Act will not be appropriate to talk about.

Example Essay

When setting up a charity in the UK, particularly one focused on animal welfare, there are several regulations and governing bodies that Sarah should be aware of. These ensure that the charity operates legally, ethically, and effectively.

A charity's purpose involves raising awareness and helping someone or something, in Sarah's case this will be local animals and potentially their owners. A charity has to satisfy two aspects: The benefit aspect and The public aspect. In the UK, both aspects are regulated by the Charities Act 2011.

To satisfy a benefit aspect, a charity must have a purpose that must be beneficial to the community it works in - this must be in a way that is identifiable and capable of being proved by evidence. For Sarah this would be showing that her charity helps animals, potentially by taking them in off the street or removing them from dangerous homes and caring for them.

To satisfy a public aspect, a charity must benefit the public in general, or a sufficient section of the public. In Sarah's case the public benefit may be in removing stray dogs and cats from the streets where they can transport diseases and potentially attack people.

Most charities strive to satisfy both aspects but in some cases this is not possible.

All charities are regulated. Because charities are funded by donations from the public, businesses and sometimes from government,

their conduct is regulated closely. Key regulatory bodies that Sarah will have to engage with include:

1. Charity Commission for England and Wales:

As the primary regulator for charities in England and Wales, the Charity Commission oversees the registration and regulation of charities. Sarah's organization must meet the legal definition of a charity and apply for registration if its income is over £5,000 per year.

The Commission ensures compliance with the Charities Act, offering guidance on charity governance, financial management, and reporting.

2. HM Revenue and Customs (HMRC):

Charities can apply to HMRC for recognition as a charity for tax purposes. This status allows for tax reliefs and exemptions, including Gift Aid on donations.

HMRC ensures compliance with tax obligations and scrutinizes the use of charity funds.

3. Data Protection:

Under the General Data Protection Regulation (GDPR) and the Data Protection Act 2018, any charity handling personal data must ensure its protection and comply with data privacy laws.

4. Health and Safety Executive (HSE):

The HSE provides guidelines for workplace safety, which are important if the charity has employees or volunteers.

In conclusion there are many regulations and bodies that Sarah should be aware of when setting up her charity. Sarah should consider seeking legal advice or consulting with charity advisory services to ensure full compliance with all relevant laws and regulations. Additionally, staying informed about changes in charity law and animal welfare legislation would be beneficial to the smooth operation of her charity.

Tutor Notes

- With case study questions you're not expected to know anything about the specific topic, in this case Animal Charities. If it happens to be something you know about, you can bring in some of your own knowledge, but this isn't a requirement to get a good score. You're not expected to know, for example about the Animal Welfare Act 2006, but if you happen to do so, it could be a nice little thing to add in. Just don't focus your essay on it. However you can make some sensible guesses on what Sarah will be doing, for example I talked about removing stray animals from the street.

- Charities comes up in LO 4.4 p.232

NEW QUESTION # 30

Discuss the importance and role of an organisation's branding in procurement and supply operations (25 marks)

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

How to approach the question

- This is a very open question so your essay could discuss

o the functions of a brand; e.g. advertising, marketing, creating trust, identity o What is effective branding? Strong image, convincing people to purchase, shared values with customers, offering a solution to a problem

o The impact for procurement and supply chain isn't explained in the study guide so tailor this however you like. The best thing to do would be to think about some companies where branding is important, such as luxury goods, cars, or the brand is synonymous with a particular aspect such as Apple being associated with innovative technology. From there you could argue the importance of selecting the right suppliers to work with in order to keep up the brand image. Another example could be an ethical company needing to ensure their supply chain is 'clean', so as not to damage their branding. Possibilities are endless with this one.

Example Essay

In the contemporary business landscape, the significance of branding extends far beyond marketing and consumer perception. In procurement and supply operations, an organization's brand plays a pivotal role in shaping relationships with suppliers, determining the quality of goods and services that are procured, and influencing overall supply chain efficiency. This essay delves into the importance of branding in procurement and supply, exploring how a strong brand image can drive competitive advantage, foster trust and collaboration, and impact an organization's bottom line.

Building Competitive Advantage Through Brand Reputation:

The reputation of an organization's brand is a key determinant in attracting and retaining high-quality suppliers. A strong brand often correlates with financial stability, market presence, and business ethics, making such organizations more appealing to work with. This advantage is critical in procurement as it can lead to preferential treatment, such as priority access to scarce resources, better payment terms, and opportunities to collaborate on innovative products. For example, a well-regarded technology company might receive early access to cutting-edge components from suppliers eager to be associated with a market leader.

Enhancing Supplier Relationships and Negotiations:

Branding extends into the realms of trust and reliability, essential components in building long-term relationships with suppliers. A

well-respected brand often implies a history of fair dealings, prompt payments, and mutual respect, which can make suppliers more willing to negotiate favourable terms. This trust can be particularly vital in times of supply chain disruptions or market volatility. Suppliers are more likely to extend credit or expedite orders for trusted partners, which can be invaluable for maintaining uninterrupted operations.

Influencing Quality and Sustainability Standards:

An organization's brand also communicates its commitment to quality and sustainability, which are increasingly crucial in procurement decisions. Suppliers aligning with brands that emphasize high-quality standards are often more diligent in maintaining these standards in their products and services. Additionally, a strong brand committed to sustainability can drive supply chain practices that align with environmental and social governance (ESG) principles. This commitment can lead to long-term cost savings, risk mitigation, and enhanced brand loyalty among environmentally conscious consumers.

Brand Image and Consumer Perception:

The procurement function directly impacts the final product quality, which in turn affects consumer perception of the brand. An organization's ability to procure high-quality, ethically sourced materials can significantly enhance its brand image and appeal to a broader customer base. For instance, a fashion brand's commitment to ethical sourcing and procurement of sustainable materials can bolster its image as an environmentally responsible brand, appealing to a growing demographic of eco-conscious consumers. The reverse is also true, brands associated with child or forced labour where this is found to be in their supply chains can suffer from loss of customers, revenue and reputation as well as potentially even legal consequences.

Internal Branding and Employee Engagement in Procurement:

Internal branding, the way an organization's values and culture are perceived by its employees, plays a crucial role in procurement. Employees who are proud of their organization's brand are more likely to engage deeply with their work, leading to better performance in procurement roles. This engagement can result in more innovative procurement strategies, improved vendor management, and a greater focus on aligning procurement practices with the organization's overall strategic goals.

Conclusion:

The role of an organization's branding in procurement and supply operations is deeply impactful. A strong brand can create competitive advantages, foster better supplier relationships, influence quality and sustainability standards, enhance consumer perception, and drive employee engagement. In the modern business world, where supply chains are complex and consumer expectations are high, branding is not just a marketing tool but a strategic asset in procurement and supply operations. Organizations that recognize and leverage the power of their brand within these operations are poised to achieve greater efficiency, sustainability, and overall success.

Tutor Notes

- This is a really random section of the study guide and doesn't really relate to the rest of the content.

Branding comes up on p.226 - 228. It therefore can come up as a question, but because it's such a small part of the syllabus, don't focus too much effort on this subject.

- If you remember one line from this topic it's this: "branding is not just a marketing tool but a strategic asset in procurement and supply operations"

- This type of question could come up as a scenario / case study. E.g. How does the branding of X Company impact upon their supply chain.

NEW QUESTION # 31
