CIPS L6M7 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Understand data integrity and its impact on procurement and supply: Targeting IT Security Officers, this section focuses on ensuring that all collected information remains accurate (data integrity) while maintaining confidentiality through legal frameworks like GDPR. It assesses strategies for managing disruptions, such as system redundancy.
Topic 2	<ul style="list-style-type: none">Understand the concept of big data in the global supply chain: This section of the exam measures the skills of Supply Chain Managers and covers understanding big data's role in enhancing supply chain operations. It evaluates how big data transforms procurement and supply functions by leveraging large volumes of diverse data, focusing on skills like "Data Trend Analysis."

Topic 3	<ul style="list-style-type: none"> • Understand the impact of cyber security on procurement and supply: This part targets Cybersecurity Experts, exploring how cyber threats affect supply chains by compromising sensitive information through vulnerabilities in software or networks. It involves evaluating technologies to secure systems effectively, emphasizing "Secure Data Transmission."

What we say is true, apart from the examination environment, also includes L6M7 Exam Questions which will come up exactly in the real exam. And our L6M7 study materials always contain the latest exam Q&A.

CIPS Commercial Data Management Sample Questions (Q12-Q17):

NEW QUESTION # 12

Which of the following is a type of firewall?

- A. Script
- B. Bot
- C. Software
- D. Proxy

Answer: D

Explanation:

A proxy is a type of firewall. It works at the IT application level rather than on a whole network. A firewall is a security measure that prevents unauthorized access to a system. P.184 Domain: 3.2

NEW QUESTION # 13

Bob is the CEO of Big Leaf Company and has a lot of sensitive data on his phone. The IT department has advised Bob he should increase his security measures to protect unwanted people accessing his phone, which he often leaves on his desk when he goes to Board Meetings. Which of the following would be most useful to Bob?

- A. CCTV in his office
- B. Multi-factor authentication
- C. Firewall
- D. Biometrics

Answer: B

Explanation:

Multi-factor authentication would be the most useful to protect a mobile phone. Multi-factor authentication uses three things: something you know (password), something you have (a secret code or token), and something you are (biometric scan). This is more secure than biometrics alone. CCTV does not prevent someone from accessing Bob's phone. A firewall is better suited for an IT system or intranet. P.187 Domain: 3.2

NEW QUESTION # 14

BuyBoy.com is an online retailer that uses predictive analytics and a recommender system to suggest items for users to purchase. Which types of data would the system use to produce recommendations?

- A. Historical and predictive
- B. Characteristics and credit ratings
- C. Historical and health

- **D. Characteristics and user interactions**

Answer: D

Explanation:

Recommender systems use customer characteristics (e.g., age, gender, preferences) and user interactions (e.g., previous searches, purchases, and browsing history) to suggest products. Credit ratings and health data are not typically used for product recommendations in e-commerce.

NEW QUESTION # 15

What is the role of a Data Controller in an organisation?

- **A. To determine what happens to the data**
- B. To protect the data from anyone who may wish to steal it
- C. To control or restrict access to the data
- D. To ensure the organisation is compliant with the law

Answer: A

Explanation:

A Data Controller is responsible for making decisions regarding data management, including where it is stored and how long it is retained. This role is legally recognized. (P.122)

NEW QUESTION # 16

Joe is a Supply Chain Manager at Crunchy Lettuce Incorporated and is responsible for multiple sets of data on aspects of the business, including suppliers, customers, and manufacturing processes. Joe is aware that the integrity of his data is extremely important as, without accurate data, he is unable to plan effectively for future orders and deliveries.

Which of the following are ways in which data integrity can be affected? Select THREE.

- **A. Omission**
- B. Corrosion
- **C. Manipulation**
- D. Corruption
- **E. Commission**

Answer: A,C,E

Explanation:

Commission: Data is mistakenly created, such as duplicate records.

Omission: Data is accidentally deleted or not recorded.

Manipulation: Data is changed incorrectly, such as an extra zero added to a value.

Corruption is not included because it refers to data being unreadable or damaged rather than integrity being affected by an internal process. Corrosion refers to metal deterioration and is unrelated to data.

NEW QUESTION # 17

.....

Many people want to be the competent people which can excel in the job in some area and be skillful in applying the knowledge to the practical working in some industry. But the thing is not so easy for them they need many efforts to achieve their goals. Passing the L6M7 test certification can make them become that kind of people and if you are one of them buying our L6M7 study materials will help you pass the L6M7 test smoothly with few efforts needed.
