QUESTION: 5

"Counterfeit computer hardware increases the risk and likelihood of a successful cyber-attack". Is this statement False?

Option A :

Yes, because not all counterfeit products such as hardware are accessible to hackers to implant malware upfront so the likelihood of a cyber-attack is the same as buying genuine

Option B :

No, because it is the sole responsibility of the Procurement department to ensure that hardware being bought is not counterfeit which eliminates any possibility of cyber-attacks

Option C :

No, because the quality of the counterfeit product may not be high and fake hardware could include malware which increases the likelihood of a successful cyber-attack

Option D :

Yes, because counterfeit products are generally still of a high quality and can have cyber-security measures and systems installed to reduce the risk of any future cyber-attacks

Correct Answer: C

CIPS Commercial Data Management Sample Questions (Q34-Q39):

NEW QUESTION # 34

Which of the following measures prevents access to a system?

- A. Firewalls and authentication
- B. Authentication and antivirus
- C. Firewalls and encryption
- D. Antivirus and encryption

Answer: A

Explanation:

Firewalls and authentication prevent unauthorized access to a system. Antivirus and encryption focus on preventing data corruption rather than access control. (P.184)

NEW QUESTION # 35

At Local Council B, data is monitored extremely closely due to its sensitive nature. A method has been put in place that provides evidence that a user has carried out an action on the IT system.

For example, if an employee changes the end date of a contract with a supplier, this change is time-stamped with their name against the modification. This provides Local Council B with visibility over its data and users' actions.

What is the name given to this type of control?

- A. Integrity
- B. Non-repudiation
- C. Authentication
- D. Confidentiality

Answer: B

Explanation:

Non-repudiation ensures that actions taken on a system are traceable and cannot be denied. It provides an audit trail that records who made changes, when, and what was modified, preventing fraud or unauthorized data alterations.
