The best strategy to enhance your knowledge and become accustomed to the C_S4EWM_2023 Exam Questions format is to test yourself. ExamDiscuss SAP C_S4EWM_2023 practice tests (desktop and web-based) assist you in evaluating and enhancing your knowledge, helping you avoid viewing the SAP test as a potentially daunting experience. If the reports of your SAP practice exams (desktop and online) aren't perfect, it's preferable to practice more. C_S4EWM_2023 self-assessment tests from ExamDiscuss works as a wake-up call, helping you to strengthen your C_S4EWM_2023 preparation ahead of the SAP actual exam.

SAP C_S4EWM_2023 Exam Syllabus Topics:

Topic	Details
Topic 1	Cross Topics (Labor Management, Exception Handling, Batches, Serial Numbers): This topic includes setting up labor management and exception handling, and working with additional product information.
Topic 2	System Integration, Master Data and Delivery Document Customizing: This focuses on setting up system integration, distributing master data, and customizing delivery documents.
Topic 3	Managing Clean Core: It covers evaluating and applying clean core principles to ERP to maximize business process agility, reduce adaptation efforts, and accelerate innovation.
Topic 4	Outbound Processes (Wave Management, Cross-docking, Production Integration): This topic covers combining outbound deliveries using wave management, packing and kitting in outbound processes, and staging products for production.
Topic 5	Process and Layout Oriented Storage Control: It covers creating customizing settings and using Process and Layout-Oriented Storage Control.

Valid C_S4EWM_2023 Test Cost, C_S4EWM_2023 Actual Test Pdf

All consumers who are interested in C_S4EWM_2023 guide materials can download our free trial database at any time by visiting our platform. During the trial process, you can learn about the three modes of C_S4EWM_2023 study quiz and whether the presentation and explanation of the topic in C_S4EWM_2023 Preparation questions is consistent with what you want. If you are interested in our products, I believe that after your trial, you will certainly not hesitate to buy it.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q12-Q17):

NEW QUESTION # 12

What are characteristics of the early capacity check? Note: There are 2 correct answers to this question.

- A. It happens during the warehouse task creation
- B. It is done during the actual putaway process
- C. It is based on capacities of bin types
- D. It is only available when working with mobile devices

Answer: A,C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The early capacity check in SAP EWM ensures bins can accommodate stock before task execution. Option C ("It happens during the warehouse task creation") is correct as it occurs when tasks are generated, and option D ("It is based on capacities of bin types") is correct because it uses bin type capacity data, both configured in SPRO: SCM Extended Warehouse Management > Goods Receipt Process > Capacity Check. Option A (mobile devices) is incorrect as it's not device-specific, and option B (during putaway) is too late for an "early" check.

NEW QUESTION # 13

To which of the following objects can you assign external process steps? Note: There are 2 correct answers to this question.

- A. Delivery item type
- B. Packaging specification
- C. Work center
- D. Handling unit type

Answer: C,D

Explanation:

External process steps in SAP EWM define specific tasks executed outside the warehouse system. These can be assigned to the following objects:

* Work Center (C):

* External process steps can be directly linked to a work center to manage operations such as packing, kitting, or labeling.

* This assignment is made in the process-oriented storage control configuration.

* Handling Unit Type (D):

* Specific handling unit types can be configured to include external process steps.

* This ensures that certain types of handling units (e.g., pallets or boxes) are processed through external services like inspection or labeling.

Incorrect Options:

* A: Delivery item types are not directly associated with external process steps.

* B: Packaging specifications are used for packing processes but do not link to external process steps.

References:

* SAP EWM Documentation: Process-Oriented Storage Control

* SAP Help Portal: External Process Steps Configuration

NEW QUESTION # 14

Which process steps can be used in an outbound process? Note: There are 2 correct answers to this question.

- A. Deconsolidation
- B. Pack
- C. Value-added services
- D. Quality inspection

Answer: B,C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Outbound processes in SAP EWM involve steps from picking to shipping. Option B ("Pack") is correct as it's a standard step for preparing goods, configured in SPRO: SCM Extended Warehouse Management > Goods Issue Process > Packing. Option C ("Value-added services") is correct because VAS (e.g., labeling) can be part of outbound processing, set up in SPRO: SCM Extended Warehouse Management > Value-Added Services. Option A (Deconsolidation) is inbound-specific, and option D (Quality inspection) is typically inbound or internal.

NEW QUESTION # 15

For a picking task, the system must determine the storage types from which to remove the stock. How does the system find the storage type search sequence?

- A. The system attempts to read the combination of warehouse number and stock removal indicator, then it uses the combination of warehouse number and warehouse process type.
- B. The system attempts to use the defined access strategy, then it uses the combination of warehouse number, stock removal indicator, and warehouse process type.
- C. The system attempts to read a completely qualified entry, with all parameters and indicators, then it uses the defined access strategy.
- **D. The system attempts to read the combination of warehouse number, stock removal indicator, stock type, and warehouse process type, then it only uses the warehouse number.**

Answer: D

Explanation:

Storage Type Search Sequence for Picking Tasks

* The system evaluates parameters in a hierarchical order:

* Combination of warehouse number, stock removal indicator, stock type, and warehouse process type.

* If no matching entry is found, the system defaults to using only the warehouse number.

Excluded Options

* A & C: These lack the complete set of parameters required for a fully qualified search.

* B: Does not consider stock type in the determination process.

SAP S/4HANA Cloud Private Edition Reference

* Check Storage Type Search Sequence for Stock Removal in SAP EWM documentation.

NEW QUESTION # 16

Which option do you have in the assignment of storage bin to an activity area?

- A. An activity area must be created automatically for a storage type
- B. Storage bins must be manually assigned to an activity area
- **C. Storage bins from different storage types can be assigned to the same activity area**
- D. A storage bin can be assigned to only one activity area

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Activity areas in SAP EWM group bins for specific activities (e.g., picking). Option B ("Storage bins from different storage types can be assigned to the same activity area") is correct because bins from multiple storage types (e.g., high rack, bulk) can share an activity area, configured in SPRO: SCM Extended Warehouse Management > Master Data > Activity Areas > Assign Storage Bins. Option C is incorrect as bins can belong to multiple activity areas for different activities. Options A and D are not mandatory requirements.

NEW QUESTION # 17

.....

Are you ready to gain all these C_S4EWM_2023 certification benefits? Looking for a simple, smart, and quick way to pass the challenging C_S4EWM_2023 exam? If your answer is yes then you need to enroll in the C_S4EWM_2023 exam and prepare well

to crack this C_S4EWM_2023 exam with good scores. In this career advancement journey, you can get help from ExamDiscuss. The ExamDiscuss will provide you with real, updated, and error-free SAP C_S4EWM_2023 Exam Dumps that will enable you to pass the final C_S4EWM_2023 exam easily.
