Latest 1z0-076 Test Format, 1z0-076 Certification Practice

What's more, part of that SurePassExams 1z0-076 dumps now are free: https://drive.google.com/open?id=1b3mqfcgzZrByUIxQC8Tt6Mn4VfYyKNJs

Once you have decided to purchase our 1z0-076 study materials, you can add it to your cart. Then just click to buy and pay for the certain money. When the interface displays that you have successfully paid for our 1z0-076 study materials, our specific online sales workers will soon deal with your orders. You will receive the 1z0-076 study materials no later than ten minutes. You need to ensure that you have written down the correct email address. Please check it carefully. If you need the invoice, please contact our online workers. They will send you an electronic invoice, which is convenient. You can download the electronic invoice of the 1z0-076 Study Materials and reserve it.

Oracle 1z0-076 Exam Syllabus Topics:

Topic	Details
Topic 1	• Enhanced Client Connectivity in a Data Guard Environment: This topic focuses on enhancing client connectivity in a Data Guard setup and implementing failover procedures for seamless client redirection. It also covers application continuity to ensure uninterrupted operations during role transitions.
Topic 2	• Using Oracle Active Data Guard: Supported Workloads in Read-Only Standby Databases: Here, the usage of physical standby databases for real-time queries is discussed.

Topic 3	• Backup and Recovery Considerations in an Oracle Data Guard Configuration: In this topic, Backup and recovery procedures in a Data Guard configuration are discussed, including RMAN backups, offloading to physical standby, and network-based recovery.
Topic 4	• Managing Oracle Net Services in a Data Guard Environment: The section focuses on Oracle Net Services and its role in Data Guard networking setup.
Topic 5	• Creating a Data Guard Broker Configuration: This section delves into the practical aspects of creating and managing a Data Guard broker configuration, including command-line and Enterprise Manager approaches.
Topic 6	• Oracle Data Guard Basics: This topic covers the essential architecture and concepts of Oracle Data Guard. It includes sub-topics such as the physical and logical standby database comparison, benefits of Data Guard, and its integration with multi-tenant databases.
Topic 7	• Monitoring a Data Guard Broker Configuration: The topic covers the use of Enterprise Manager and DGMGRL to monitor Data Guard configurations and explains the various data protection modes available.
Topic 8	• Oracle Data Guard Broker Basics: An overview of the Data Guard broker, its architecture, components, benefits, and configurations, is provided here. It serves as an introduction to the tool used for managing Data Guard configurations.

1z0-076 Certification Practice & 1z0-076 Training Material

Oracle Database 19c: Data Guard Administration exam is one of the top-rated Oracle 1z0-076 Exams. This Oracle Database 19c: Data Guard Administration exam offers an industrial-recognized way to validate a candidate's skills and knowledge. Everyone can participate in Oracle Database 19c: Data Guard Administration exam requirements after completing the Oracle Database 19c: Data Guard Administration exam. With the Oracle Database 19c: Data Guard Administration exam you can learn in-demand skills and upgrade your knowledge. You can enhance your salary package and you can get a promotion in your company instantly.

Oracle Database 19c: Data Guard Administration Sample Questions (Q39-Q44):

NEW QUESTION # 39
Which TWO statements are true about Far Sync instances?

- A. They work in Maximum Protection mode.
- B. They work in Maximum Performance mode.
- C. They work in Maximum Availability mode.
- D. They do not work with Snapshot Standby databases.
- E. They do not work with Logical Standby databases.

Answer: B,E

NEW QUESTION # 40
Your Data Guard environment consists of these components and settings:
1. A primary database
2. Two remote physical standby databases
3. The redo transport mode is set to sync
4. Real-time query is enabled for both standby databases
5. The DB_BLOCK_CHECKING parameter is set to TRUE on both standby databases You notice an increase in redo apply lag time on both standby databases.
Which two would you recommend to reduce the redo apply lag on the standby databases?

- A. Increase the number of standby redo log files on the standby databases.
- B. Lower DB_BLOCK_CHECKING to MEDIUM or low on the standby databases.
- C. Increase the size of the buffer cache on the physical standby database instances.
- D. Decrease the redo log file size on the primary database.
- E. Increase the size of standby redo log files on the standby databases.

Answer: B,E

Explanation:
To reduce the redo apply lag on standby databases, one could increase the size of the standby redo log files.
Larger redo log files can accommodate more redo data, which may reduce the frequency of log switches and allow for more continuous application of redo data. Additionally, lowering the DB_BLOCK_CHECKING parameter to MEDIUM or LOW on the standby databases can help improve redo apply performance. High block checking can impose additional CPU overhead during the application of redo data, potentially increasing apply lag times. By reducing the level of block checking, you can lessen this overhead and help reduce the apply lag .

NEW QUESTION # 41
Which TWO are benefits of using Transaction Guard in a Data Guard environment?

- A. It provides application continuity by replaying transactions interrupted by a failover or a switchover
- B. It protects against user errors being replicated to standby databases.
- C. It protects against logical corruptions being replicated to standby databases.
- D. It provides application continuity by rolling back uncommitted transactions interrupted by a failover or switchover.
- E. It protects against recoverable errors during a planned or an unplanned outage of a primary database.

Answer: D,E

Explanation:
Transaction Guard provides benefits in terms of transaction consistency and recovery in a Data Guard environment:
* It provides application continuity by rolling back uncommitted transactions interrupted by a failover or switchover (B): Transaction Guard ensures that any uncommitted transactions at the time of an outage are rolled back consistently, thus preserving the integrity of the application's data and state.
* It protects against recoverable errors during a planned or an unplanned outage of a primary database (D): Transaction Guard offers protection against errors that can occur during outages, allowing applications to resume operations more quickly and reliably after recovery.References:

NEW QUESTION # 42
You are using Data Guard in conjunction with Global Database Services.
You have a Data Guard Broker configuration called Sales and a GDS pool called Prod.
Which three are true concerning the management of the broker configuration when using GDS?

- A. Performing a role change with DGMGRL automatically notifies GDS which in turn activates the appropriate services.
- B. Adding a database to the Sales configuration with DGMGRL requires that the Sales configuration be disabled first. It must then be enabled after the new database is added to the configuration.
- C. DGMGRL may be used to add the Sales configuration to the Prod pool in gds.
- D. Adding a database to the Sales configuration with DGMGRL automatically adds the database to the Prod Pool.
- E. DGMGRL may be used to add a single database to the Sales configuration even if Sales is a member of the Prod pool.

Answer: A,C,E

Explanation:
In the context of Oracle Data Guard and Global Database Services (GDS):
DGMGRL may be used to add the Sales configuration to the Prod pool in gds (A): Data Guard Broker's command-line interface DGMGRL can be utilized to manage configurations with GDS, allowing the addition of Data Guard Broker configurations to GDS pools.
Performing a role change with DGMGRL automatically notifies GDS which in turn activates the appropriate services (B): When a role change is executed using DGMGRL, GDS is automatically notified, and it then activates the services that are appropriate for the

new database roles.

DGMGRL may be used to add a single database to the Sales configuration even if Sales is a member of the Prod pool (C): DGMGRL provides the capability to manage individual databases within a broker configuration, including adding databases to a configuration that is already part of a GDS pool.

NEW QUESTION # 43

You are licensed to use Oracle Active Data Guard.

Which TWO statements are true after enabling block change tracking on a physical standby database?

- A. It allows fast incremental backups to be taken on the primary database.
- B. It starts the CTWR process on the primary database instance.
- C. It starts the CTWR process on the physical standby database instance.
- D. It allows fast incremental backups to be offloaded to the physical standby database.
- E. It starts the RVWR process on the physical standby database instance.
- F. It allows fast incremental backups to be offloaded to a snapshot standby database, when the physical standby database is converted.

Answer: D,E

Explanation:

Block change tracking is a feature that enhances the efficiency of incremental backups by recording changed blocks in a tracking file. When used with Oracle Active Data Guard:

* It starts the RVWR process on the physical standby database instance (A): When block change tracking is enabled on a physical standby database, the Recovery Writer (RVWR) process is initiated.

This process is responsible for recording the changes to blocks in the block change tracking file, which is then used to optimize incremental backups.

* It allows fast incremental backups to be offloaded to the physical standby database (E): With block change tracking enabled on the physical standby database, fast incremental backups can be offloaded from the primary database. This reduces the workload on the primary database and utilizes the standby database for backup operations, improving overall system performance and efficiency.References:

NEW QUESTION # 44

......

As old saying goes, god will help those who help themselves. So you must keep inspiring yourself no matter what happens. At present, our 1z0-076 exam materials are able to motivate you a lot. Our products will help you overcome your laziness. And you will become what you want to be with the help of our 1z0-076 learning questions. You can realize and reach your dream. Also, you will have a pleasant learning of our 1z0-076 study quiz.
