Latest 1z0-1057-24 Exam Registration & 1z0-1057-24 Valid Exam Voucher

Will you feel that the product you have brought is not suitable for you? One trait of our 1z0-1057-24 exam prepare is that you can freely download a demo to have a try. Because there are excellent free trial services provided by our 1z0-1057-24 exam guides, our products will provide three demos that specially designed to help you pick the one you are satisfied. On the one hand, by the free trial services you can get close contact with our products, learn about the detailed information of our 1z0-1057-24 Study Materials, and know how to choose the right version of our 1z0-1057-24 exam questions.

Oracle Project Management Cloud 2024 Implementation Professional Sample Questions (Q124-Q129):

NEW QUESTION # 124

Your administrator creates maintenance conditions on the Maintain Project Enterprise Labor Resources page.

An HCM person is included in a condition with a process order value of 1 and, additionally, there are three other conditions, all with a process order value of 10. Identify two correct statements about the Maintain Project Enterprise Labor Resources process as it relates to process order values. (Choose two.)

- A. The process creates a resource by using the condition with a process order value of 1 but does not create more than one resource for the same person even if subsequent conditions apply to the person.
- B. For the three conditions that have the same process order value of 10, the records are processed in ascending numeric order based on the condition name.
- C. For the three conditions that have the same process order value of 10, the records are processed in ascending alphabetic order based on the condition name.
- D. The process creates a resource by using the conditions with a process order value of 10 but does not create more than one resource for the same person even if subsequent conditions apply to the person.

Answer: A,C

NEW QUESTION # 125

You are managing a project based on a Waterfall model. You define a project and a project plan in Oracle Project Management with tasks and subtasks applicable to each of the phases of the project: Initiation, Discovery, Design, Build, Test, and Deploy. As a project manager, you want to define deliverables for your project requirements that are elucidated during the Discovery phase of your project. You now want to understand how the inheritance between requirements, tasks, and deliverables works. Which two are correct statements in this scenario? (Choose two.)

- A. The association of a deliverable with a task is dependent on associating a requirement with a task.
- B. A deliverable associated with a requirement is not automatically associated with the tasks created for that requirement.
- C. A deliverable associated with a requirement is automatically associated with the tasks created for that requirement.
- D. You associate a deliverable with a task independent of associating a requirement with a task.

Answer: B,D

Explanation:

According to Oracle sources¹, the inheritance between requirements, tasks, and deliverables works as follows:

* You can associate a deliverable with a task independent of associating a requirement with a task. You can also associate a deliverable with a requirement independent of associating a task with a requirement

1.

* A deliverable associated with a requirement is not automatically associated with the tasks created for that requirement. You must manually associate the deliverable with the tasks that produce it¹.

Therefore, the correct answer is B and D.

1: Can deliverables for projects and tasks be inherited from associated requirements? - docs.oracle.com (index 1)

In Oracle Project Management, you can define requirements, tasks, and deliverables for your project based on your project methodology and lifecycle. Requirements are statements of needs or expectations that must be met by the project outcome. Tasks are units of work that must be performed to complete the project.

Deliverables are products or services that are produced or provided as part of a task or requirement. Two correct statements about how the inheritance between requirements, tasks, and deliverables works are:

* You associate a deliverable with a task independent of associating a requirement with a task. This means that you can create a deliverable for a task regardless of whether the task is linked to a requirement or not.

* A deliverable associated with a requirement is not automatically associated with the tasks created for that requirement. This means that you have to manually associate a deliverable with a task even if both the deliverable and the task are linked to the same requirement.

NEW QUESTION # 126

Your company uses an accounting calendar with periods that are identical to calendar months. A contract resource has been identified to work for six months on an accounting close cycle project. The resource is planned to start with 10 days left in the first period and to end 20 days into the last period. For the remaining periods, the resource must be loaded on all working days of the month. You are required to distribute the budget, forecast, and planning amounts across periods based on the task duration. Which predefined spread curve must be used to meet this requirement? (Choose the best answer.)

- A. Bell Curve

- B. Even
- **C. Daily Spread Basis**
- D. Back Loaded
- E. S-Curve

Answer: C

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapfm/project-control-configuration-manage-spread-curves.html#OAPFM79760> Predefined Spread Curves Name Description Dist. Factors Even Linear distribution of financial or project plan values across periods.

10-10-10-10-10-10-10-10-10

Prorated Even

Linear distribution of financial or project plan values across periods, with an exception of the first period and last period in the financial plan. Financial or project plan values for the first period and last period are prorated based on the number of days in the period.

10-10-10-10-10-10-10-10-10

Back Loaded

Back-loaded distribution of financial or project plan values across periods. Assigned amounts increase over succeeding periods.

0-5-10-15-20-25-30-35-40-45

Front Loaded

Front-loaded distribution of financial or project plan values across periods. Assigned amounts decrease over succeeding periods.

45-40-35-30-25-20-15-10-5-0

S Curve

S-shaped distribution of financial or project plan values across periods.

18-10-8-10-15-17-18-17-15-8

Bell Curve

Bell-shaped distribution of financial or project plan values across periods. Assignment of plan values is highest in the middle periods.

0-4-10-12-14-12-10-4-0-0

Daily Spread Analysis

Spread is based upon the number of days in each financial period throughout the duration of the task assignment. Amounts are proportionally distributed throughout all periods for the duration of the task assignment None

NEW QUESTION # 127

Using Oracle Time and Labor, your client wants to put in a validation process that allows only a certain number of maximum hours an employee can charge in a day, and a minimum of hours he or she can report in a week.

What feature would you use to meet this requirement? (Choose the best answer.)

- A. time audit rules
- **B. time entry rules**
- C. time calculation rules
- D. project time validation rules

Answer: B

Explanation:

To put in a validation process that allows only a certain number of maximum hours an employee can charge in a day, and a minimum of hours he or she can report in a week, you need to use time entry rules. Time entry rules allow you to define the conditions and actions for validating time entries based on various attributes such as hours, dates, projects, tasks, etc. You can also specify the error messages and severity levels for the time entry rules. NEW QUESTION # 128

Which three are project gate statuses? (Choose three.)

- **A. Open**
- B. Approve
- C. Draft

- D. In Review
- E. Closed

Answer: A,D,E

Explanation:

Project gate statuses are values that indicate the progress or completion of a project gate. A project gate is a checkpoint that marks the end of a phase or stage in a project lifecycle. Three of the project gate statuses are:

- * Open: This status indicates that the project gate is not yet ready for review or approval.
- * In Review: This status indicates that the project gate is under review or approval by the gate reviewers or approvers.
- * Closed: This status indicates that the project gate has been reviewed or approved and the project can move to the next phase or stage. Approve and Draft are not project gate statuses, but actions that can be performed on a project gate. Approve is an action that allows a gate approver to approve a project gate and change its status to Closed. Draft is an action that allows a gate owner to create or edit a project gate and change its status to Open.
