Oracle CX Sales 2024 Implementation Professional Sample Questions (Q317-Q322):

NEW QUESTION # 317

What is the primary purpose of the Overview and Architecture section in the Oracle Profitability and Cost Management Cloud

Service 2023 Implementation Professional exam?

- A. To provide an overview of the features and capabilities of the Oracle Profitability and Cost Management Cloud Service
- B. To explain the technical architecture and infrastructure requirements of the Oracle Profitability and Cost Management Cloud Service
- C. To outline the implementation process and best practices for deploying the Oracle Profitability and Cost Management Cloud Service
- D. To assess the candidate's understanding of the key concepts and terminology used in the Oracle Profitability and Cost Management Cloud Service

Answer: A

Explanation:

Option 1: Correct. The primary purpose of the Overview and Architecture section is to explain the technical architecture and infrastructure requirements of the Oracle Profitability and Cost Management Cloud Service. Option 2: Incorrect. While providing an overview of the features and capabilities is important, it is not the primary purpose of this section. Option 3: Incorrect. While outlining the implementation process and best practices is important, it is not the primary purpose of this section. Option 4: Incorrect. While assessing the candidate's understanding of key concepts and terminology is important, it is not the primary purpose of this section.

NEW QUESTION # 318

Which feature of Oracle Profitability and Cost Management Cloud Service allows users to perform ad-hoc analysis and create a detailed breakdown of profitability?

- A. Cost Volume Profit (CVP) Analysis
- B. Financial Consolidation and Close
- C. Profitability Reporting and Analytics
- D. Profitability and Costing

Answer: D

Explanation:

Option 1: Incorrect. Cost Volume Profit (CVP) Analysis is not the feature that allows users to perform ad-hoc analysis and create a detailed breakdown of profitability. Option 2: Incorrect. Financial Consolidation and Close is not the feature that allows users to perform ad-hoc analysis and create a detailed breakdown of profitability. Option 3: Correct. Profitability and Costing is the feature that allows users to perform ad-hoc analysis and create a detailed breakdown of profitability. It provides the functionality to model and analyze profitability at different levels of detail. Option 4: Incorrect. Profitability Reporting and Analytics is not the feature that allows users to perform ad-hoc analysis and create a detailed breakdown of profitability.

NEW QUESTION # 319

When configuring security settings in Oracle Profitability and Cost Management Cloud Service 2023, which of the following options is the most secure and recommended approach?

- A. Granting all users the Administrator role for full access to all features and functions.
- B. Sharing the same username and password across all user accounts for simplicity.
- C. Disabling SSL encryption to improve performance and reduce overhead.
- D. Creating custom roles with granular privileges based on user responsibilities.

Answer: D

Explanation:

Option 1: Incorrect. Granting all users the Administrator role would give them unrestricted access to all features and functions, which can lead to potential security risks and unauthorized actions. Option 2: Correct. Creating custom roles with granular privileges based on user responsibilities is the most secure and recommended approach. It allows for fine-grained control over what each user can access and modify. Option 3: Incorrect. Sharing the same username and password across all user accounts is a poor security practice. If one account is compromised, all the accounts would be at risk. Option 4: Incorrect. Disabling SSL encryption would make data transmission insecure, exposing sensitive information to potential attackers.

NEW QUESTION # 320

What is the primary function of the Data Management API in Oracle Profitability and Cost Management (PCM) Cloud Service?

- A. To perform calculations and allocations on data within PCM
- B. To import metadata and dimension mappings into PCM
- C. To extract data from PCM for analysis and reporting in external systems
- **D. To create and manage data loads from source systems into PCM**

Answer: D

Explanation:

Option 1: Incorrect. The data management API is primarily used for data loading and management, not extraction for analysis and reporting in external systems. Option 2: Correct. The Data Management API is used to create and manage data loads from source systems into Oracle PCM. Option 3: Incorrect. Calculations and allocations are not the primary function of the Data Management API. The API is primarily used for data loading and management. Option 4: Incorrect. The Data Management API is not used to import metadata and dimension mappings into PCM. It is primarily used for data loading and management.

NEW QUESTION # 321

What is the recommended method for loading data into Oracle Profitability and Cost Management Cloud Service?

- A. Using the Data Management Data Load utility
- **B. Using the Cloud Data Management (CDM) interface**
- C. Using the Data Integration Cloud Service (DICS)
- D. Using the Data Integration Platform Cloud (DIPC)

Answer: B

Explanation:

Option 1: Correct. Oracle recommends using the Cloud Data Management (CDM) interface to load data into Profitability and Cost Management Cloud Service. CDM provides a user-friendly interface that allows you to map and load data from various source systems. Option 2: Incorrect. Data Integration Cloud Service (DICS) can be used for data integration and transformation, but it is not the recommended method for loading data into Profitability and Cost Management Cloud Service. DICS is better suited for integrating data across different applications and platforms. Option 3: Incorrect. The Data Management Data Load utility is not the recommended method for loading data into Profitability and Cost Management Cloud Service. This utility is typically used for loading data into other Oracle Cloud applications, such as Financials Cloud or HCM Cloud. Option 4: Incorrect. The Data Integration Platform Cloud (DIP) is not the recommended method for loading data into Profitability and Cost Management Cloud Service. DIP is a comprehensive data integration platform that can be used for various integration scenarios, but it is not the recommended tool specifically for loading data into Profitability and Cost Management Cloud Service.
