1Z0-1061-24 Study Materials & 1Z0-1061-24 Exam collection & 1Z0-1061-24 Actual Lab Questions

It helps you to pass the Oracle 1Z0-1061-24 test with excellent results. Oracle 1Z0-1061-24 imitates the actual 1Z0-1061-24 exam environment. You can take the 1Z0-1061-24 practice exam many times to evaluate and enhance your Oracle 1Z0-1061-24 Exam Preparation level. Desktop 1Z0-1061-24 practice test software is compatible with windows and the web-based software will work on these operating systems: Android, IOS, Windows, and Linux.

Oracle CX Sales 2024 Implementation Professional Sample Questions (Q228-Q233):

NEW QUESTION # 228

In order to accurately allocate indirect costs to products, which of the following factors should be considered in the costing algorithm of Oracle Profitability and Cost Management Cloud Service?

- A. The type of cost driver used and the size of the activity level.
- B. The size of the cost driver used and the activity level.
- C. The number of cost drivers used and the number of activities.
- **D. The type of cost driver used and the activity level.**

Answer: D

Explanation:

Option 1: Answer this is correct. In order to accurately allocate indirect costs to products, it is important to consider the type of cost driver used and the activity level. The cost driver should be a measure that drives the cost of the activity, such as machine hours, labor hours, or units produced. Option 2: Answer This is incorrect. The number of cost drivers used and the number of activities may not be relevant in determining the accuracy of allocation of costs to products. Option 3: Answer this is incorrect. The size of the cost driver used and the activity level may not be relevant in determining the accuracy of allocation of costs to products. Option 4: Answer This is incorrect. The type of cost driver used is important, but the size of the activity level may not be relevant in determining the accuracy of allocation of costs to products.

NEW QUESTION # 229

Which of the following statements about configuring security in Oracle Profitability and Cost Management Cloud Service 2023 is true?

- A. Security can be configured only at the member level within each dimension.
- B. Users can be assigned to multiple security groups.
- C. The Maintain and Delete dimension privilege can be granted at the application and dimension level.
- **D. The hierarchy permission setting applies to only one level of the hierarchy.**

Answer: D

Explanation:

Option 1: Incorrect. Users cannot be assigned to multiple security groups in Oracle Profitability and Cost Management Cloud Service 2023. Each user can only be assigned to one security group. Option 2: Correct. The hierarchy permission setting applies to only one level of the hierarchy in Oracle Profitability and Cost Management Cloud Service 2023. This means that if a user is granted access to a specific level of the hierarchy, they will not automatically have access to the levels above or below that level. Option 3: Incorrect. The Maintain and Delete dimension privilege can only be granted at the dimension level, not at the application level, in Oracle Profitability and Cost Management Cloud Service 2023. Option 4: Incorrect. Security can be configured at both the member and dimension level within each dimension in Oracle Profitability and Cost Management Cloud Service 2023. This allows for more granular control over access rights.

NEW QUESTION # 230

Which of the following methods can be used to load data into Oracle Profitability and Cost Management Cloud Service?

- A. Data Relationship Management
- B. Smart View
- C. Data Integrator
- **D. Data Management**

Answer: D

Explanation:

Option 1: Correct: Data Management is a tool that can be used to load data into Oracle Profitability and Cost Management Cloud Service. It provides functionality to import and export large volumes of data through a user-friendly interface. Option 2: Incorrect: Smart View can be used for reporting and analysis purposes, but it is not a tool designed specifically for data loading. Option 3: Incorrect: Data Integrator is a tool used for integrating disparate data sources, but it is not typically used for loading data into Oracle Profitability and Cost Management Cloud Service. Option 4: Incorrect: Data Relationship Management is a tool used for managing master data, but it is not used for loading data into Oracle Profitability and Cost Management Cloud Service.

NEW QUESTION # 231

When setting up models and rules in Oracle Profitability and Cost Management Cloud Service, which of the following is a valid method to assign shared values for a rule dimension member?

- A. Running an MDX query against the dimension hierarchy
- **B. Creating a data map rule for the member**
- C. Setting up a custom mapping function in Groovy
- D. Publishing a CSV file through EPM Automate

Answer: B

Explanation:

Option 1: This option is incorrect because publishing a CSV file through EPM Automate is a method to load data, not to assign shared values for a rule dimension member. Option 2: This option is incorrect because setting up a custom mapping function in Groovy is a method to transform data, not to assign shared values for a rule dimension member. Option 3: This option is correct because creating a data map rule is a method to assign shared values for a rule dimension member. This can be done by specifying the member name, the shared value, and the data source type, and then mapping the member to the new shared value. Option 4: This option is incorrect because running an MDX query against the dimension hierarchy is a method to retrieve data, not to assign shared values for a rule dimension member.

NEW QUESTION # 232

What is the correct method to integrate data from external systems into Oracle Profitability and Cost Management Cloud Service?

- **A. Using the External Data Source feature**
- B. Using the Data Integration Platform Cloud service
- C. Using the Smart Data Integration feature
- D. Using the Data Import Wizard

Answer: A

Explanation:

Option 1: Correct. The Data Import Wizard is the recommended method to integrate data from external systems into Oracle Profitability and Cost Management Cloud Service. It allows you to easily import data in various formats such as CSV, Excel, and text. Option 2: Incorrect. The External Data Source feature in Oracle Profitability and Cost Management Cloud Service is used to define connections to external data sources, but it does not directly integrate data from those sources. Option 3: Incorrect. The Smart Data Integration feature in Oracle Profitability and Cost Management Cloud Service is used for real-time data integration and replication, not for initial data import from external systems. Option 4: Incorrect. The Data Integration Platform Cloud service is a separate service that provides comprehensive data integration capabilities, but it is not specifically designed for integrating data into Oracle Profitability and Cost Management Cloud Service.

NEW QUESTION # 233

.....

Services like quick downloading within five minutes, convenient and safe payment channels made for your convenience. Even newbies will be tricky about this process.
