Which of the following is an advantage of automating pipelines in Oracle Cloud EPM?

- A. It reduces the need for manual intervention in data integration processes
- B. It simplifies user role management
- C. It creates period mappings for every data load
- D. It generates detailed real-time financial reports

Answer: A

Explanation:

Automating pipelines reduces the need for manual intervention in data integration processes, streamlining the workflow and ensuring that tasks are executed consistently.

NEW QUESTION # 49

What is the first step when creating a new data map in Oracle Cloud EPM?

- A. Scheduling the data map to run automatically
- B. Automating financial report generation
- C. Selecting the source and target applications
- D. Configuring user roles for data access

Answer: C

Explanation:

The first step in creating a new data map is selecting the source and target applications, which defines where the data will be moved from and to.

NEW QUESTION # 50

Which of the following is a key difference between data maps and Smart Push in Oracle Cloud EPM?

- A. Data maps are used for scheduling, while Smart Push is used for validation
- B. Data maps automate financial reporting, while Smart Push manages user roles
- C. Data maps require manual intervention, while Smart Push is fully automated
- D. Data maps move data between applications, while Smart Push moves data within the same application

Answer: D

Explanation:

Data maps are used to move data between applications or plan types, while Smart Push moves data within the same application, providing real-time synchronization.

NEW QUESTION # 51

When managing global period mappings, what should be considered to ensure successful data integration?

- A. Data encryption protocols must be applied
- B. The periods in the source and target systems must align
- C. The file size of each data load
- D. The number of user accounts accessing the period

Answer: B

Explanation:

Ensuring that the periods in both the source and target systems align is crucial for successful data integration using global period mappings.
