Users will be able to customize the 300-710 practice test software

by time or question types. Supported on all Windows-based PCs.

Cisco Firepower technology is a comprehensive security solution that provides advanced threat detection and protection capabilities. It enables security professionals to monitor network traffic, detect and prevent security threats, and respond to security incidents in real-time. The Cisco Firepower NGFW and FMC are key components of this solution, providing a unified platform for network security management.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q228-Q233):

NEW QUESTION # 228

Drag and drop the steps to restore an automatic device registration failure on the standby Cisco FMC from the left into the correct order on the right. Not all options are used.

Enter the "configure manager add" command at the CLI of the affected device.

Step 1

Unregister the device from the standby Cisco FMC.

Step 2

Register the affected device on the active Cisco FMC.

Step 3

Enter the "configure manager delete" command at the CLI of the affected device.

Step 4

Register the affected device on the standby Cisco FMC.

Unregister the device from the active Cisco FMC.

Answer:

Explanation:

Enter the "configure manager add" command at the CLI of the affected device.

Unregister the device from the active Cisco FMC.

Unregister the device from the standby Cisco FMC.

Enter the "configure manager delete" command at the CLI of the affected device.

Register the affected device on the active Cisco FMC.

Enter the "configure manager add" command at the CLI of the affected device.

Enter the "configure manager delete" command at the CLI of the affected device.

Register the affected device on the active Cisco FMC.

Register the affected device on the standby Cisco FMC.

Unregister the device from the active Cisco FMC.

NEW QUESTION # 229

Which firewall design allows a firewall to forward traffic at layer 2 and layer 3 for the same subnet?

- A. integrated routing and bridging
- B. transparent mode
- **C. Cisco Firepower Threat Defense mode**
- D. routed mode

Answer: C

NEW QUESTION # 230

Cisco Security Analytics and Logging SaaS licenses come with how many days of data retention by default?

- A. 0
- B. 1
- **C. 2**
- D. 3

Answer: C

Explanation:

Cisco Security Analytics and Logging (SaaS) licenses come with a default data retention period of 90 days.

This retention period allows organizations to store and analyze their security event data for up to 90 days, providing sufficient time for security monitoring and forensic investigations.

References: Cisco Security Analytics and Logging Documentation, Chapter on License Information and Data Retention.

NEW QUESTION # 231

Which CLI command is used to control special handling of ClientHello messages?

- A. system support ssl-client-hello-display
- **B. system support ssl-client-hello-enabled**
- C. system support ssl-client-hello-tuning
- D. system support ssl-client-hello-force-reset

Answer: B

NEW QUESTION # 232
